

Phillips Academy admits students of any gender, race, color, bandicapped status, sexual orientation, religion, and national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the school. It does not discriminate on the basis of gender, race, color, bandicapped status, sexual orientation, religion, or national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

PHILLIPS ACADEMY ANDOVER, MASSACHUSETTS 01810-4161 978-749-4050 www.andover.edu

Ibs material in this catalog is intended to provide general information concerning Phillips Academy rather than a complete record of any one year. It is not in any manner contractually binding, and the information berein is subject to revision and change.

PHILLIPS ACADEMY alumni have

made a difference in their communities as mothers and fathers, sons and daughters, teachers and mentors and friends.

They also have designed New York's Central Park; founded Search for Common Ground, an NGO focused on the prevention of international conflict; written the *Tarzan* novels; co-founded Facebook and served as online strategist for the Barack Obama campaign; treated ailing gorillas through the non-profit Mountain Gorilla Veterinary Project;

summitted the tallest peaks on seven continents; designed the Bunker Hill Monument;⁷ founded the Department of Photography at the Museum of Modern Art;8 co-produced and directed the PBS documentary CARRIER;9 built the first skyscraper;10 won three Olympic gold medals;11 served on the U.S. Supreme Court;12 been an anthropologist and a human rights activist in Burma;13 headed the Smithsonian Institution;14 been the first black graduate of Harvard University;15 won the Nobel prize for economics;16 become CEO of Ashoka, investors in social change;¹⁷ won an Academy Award;18 worked as a Nigerian political activist and advocate for women;19 served as 41st and 43rd presidents of the United States;20 founded and published GOOD magazine;21

coached three Super Bowl championship teams;²² starred in television's *The O.C.* and *House*;²³ started Higher One, a financial services company serving higher education;²⁴ founded Doshisha University in Japan;²⁵ served as commissioner of baseball and president of Yale University;²⁶ become editor-in-chief of *Self* magazine;²⁷ served as the first woman postmaster in the United States;²⁸ written *Friday Night Lights*;²⁹ rediscovered the ancient ruin of Machu Picchu in Peru;³⁰ served as founding director

of National Public Radio; worked in Third World nations as a plastic surgeon with Operation Smile; served with the Peace Corps in Togo, West Africa; carned the National Geographic Explorer for the Millennium award; become a leading authority on artificial intelligence, computers, and robotics; written the screenplay for M*A*S*H; freecived the Medal of Freedom; won a Tony Award as co-creator of the Broadway musical *Spring Awakening*; written a book about

military service in Iraq; 39 won the Mellon Foundation's Distinguished Achievement Award; 10 founded a market-based production co-operative in Afghanistan;41 built an art gallery in rural Tanzania; 12 flown fighter jets as the nation's first female Top Gun pilot;43 won honors for Depression-era photographs in Let Us Now Praise Famous Men;44 earned accolades as a leading contemporary abstract artist;45 served as chairman and CEO of CBS;46 won Emmy Awards for acting in China Beach; 47 received the Congressional Medal of Honor; 48 become president of Sun Dance Genetics; 49 created Planet Watch.org to promote earth-friendly practices;50 invented the telegraph and Morse code;51 won a National Medal of Science;52 authored How the Garcia Girls Lost

Their Accents; won three Pulitzer Prizes as an editorial cartoonist; become an authority on childrearing, as well as an antiwar activist; won the Nobel Prize for the cure of pernicious anemia; become mayor of Boston and president of Harvard College; won the Pulitzer Prize for environmental editorial writing at the New York Times; raised funds for the Berkeley Symphony Orchestra and organized several community projects for Andover's annual Non Sibi Day; practiced law and offered pro bono services to pows; recorded children's CDs including House Party, Family Dance, and Night Time!

What will you do?

This question is meant to inspire, not intimidate.

We expect you have many answers, but certainly not all. Of course, we can expound on how the mantle of the free world rests upon your shoulders. We can go on and on about your potential and great expectations. But the reason we started with some of our alumni's worthy accomplishments is not to prescribe where you will go or what you will do in your lifetime. Since Phillips Academy's founding more than 230 years ago, we have always believed that the end depends upon the beginning.

Imagine the next four years at Andover as *your* great beginning. Bring to us your intelligence and your tremendous curiosity, your mineral collection and your short stories, your football cleats and your charcoals. Pack your openness to try new things, your tenacity to learn things that upon first glance appear way over your head. Working together, we will erect the

scaffolding you need to someday reach answers to life's epic questions.

For now, it is all about the you of today. What will you do at Phillips Academy? These we know for sure: Expand your mind. Refine your thinking. Notice nuance. Widen your world. Learn Japanese from a new friend. Synthesize actions and epochs. See selflessness in action. Paint your face blue and white and scream wildly.

You also may read your poetry aloud. Be applauded. Learn to rely on your abilities. Try this. Try that. Find a love for fencing and tabouli, Möbius strips and geometry. Discover how much you care about other people and how many ways teachers can be there to help you earn your wings.

At Andover, your brain will do things you thought you could not do. And your heart will find things you have always wanted to do.

What is it then, that Andover can do for you?

STATEMENT OF PURPOSE

PHILLIPS ACADEMY, a residential secondary school, seeks students of intelligence and integrity from disease cultural, racial, socioeconomic, and geographic backgrounds.

The school's residential structure enables faculty to support students in their personal, social, and intellectual deselopment. The academic program fosters excellence in all disciplines within the liberal arts tradition. Faculty members guide students in mattering skills, acquiring knowledge, and thinking critically, creatisely, and independently. The school strives to help young people achieve their potential not only intellectually but also artistically, athletically, and morally, so that they may lead to possible and fulfilling lises.

The Academy is committed to establishing a community that encourages people of diverse backgrounds and beliefs to understand and respect one another and to be sens use to differences of gender, ethnicity, class, and sexual orientation. In its programs, the school seeks to promote a balance of leadership, cooperation, and service, together with a deeper awareness of the global community and the natural world.

Andos er s. 1778. Constitution charges the Academy to prepare. Youth from every quarter to understand that goodness without knowledge is weak... yet knowledge without point as is dangerous. This obligation challenges students in mind body, and spiritusee beyond themselves and to go beyond the familiar: to remain committed to discoping what is finest in themselves and others, for others and themselves.

This revised sersion of the Statement of Purpose, sorted by the faculty in winter 2000, read-rms the Academy's goals set forth in the Constitution of 1778.

What will you do at Andover?

Think openly and deeply.

Connect.

Serve and lead.

Cluster.

Speak out.

Compete and be well.

Perform and create.

Explore.

Embrace life.

Think openly and deeply.

Rigorous academics. Challenging curriculum. You have heard about them before. Both are indeed true of an Andover education—only more so. Andover has a particular academic alchemy that brings together bright. curious students with dynamic teacher-scholars. Let's call Andover's a "transforming" curriculum. An Andover education is an intellectual workout with faculty and peers who match your ability and [often] exceed it. If you are exceptionally capable in certain areas of study, you may enter the curriculum at advanced levels and go on to do independent and group work beyond the college entry level. Yes, you will learn to think critically and independently at Andover—to not only think outside the box but question why there is a box at all—and go on to construct your own structure. You will examine multiple perspectives, converse and debate, write, write, write, draw conclusions and schematics, work in teams, and pursue original research. You will analyze, rhapsodize, and agonize. You will put aside your carefully constructed pride and ask for help when you need to.

Andover's energetic community of learners begets a fertile environment for learning. Our size is a large part of our academic strength. The breadth and depth of Andover's course offerings present students with a wide variety of possibilities. Our faculty members, scholars and professionals in their own fields, do not use one teaching style to engage students. We feel that all students learn differently and that an effective approach to teaching is to use a variety of methods. Come confident in your abilities and prepare vourself for an intellectual adventure.

"For students to learn to think like an archaeologist or an anthropologist is very exciting."

HISTORY 100

World History 1000-1550: When Strangers Meet

The course could have been called simply World History 1, 1000-1550. But Andover's take on History 100 is far more than a whirlwind survey of facts and dates; it is an initiation into the multidimensional intellectual life of Andover. History 100: When Strangers Meet is a yearlong junior history class that, in its teacher's words, combines "skill work with a good story." The class focuses on three themes—one each term. Each theme connects key episodes in global history that contributed to the emergence of a global network. "By concentrating on a plotline such as the emergence and influence of European nation states and exploring specific stories such as the early interactions of European explorers and Native Americans we learn history in a very vivid, present way," says Marcelle Doheny.

Living up to its name on a whole other level, When Strangers Meet also helps to integrate a group of entering students that comes from widely divergent backgrounds, culturally and academically. One of the course's objectives is to build in students the skills of a scholar. "They learn how to think like historians—how to develop a thesis, how to use details to support that thesis, and how to find

meaning in the information. Some have already been exposed to that process, others have not. This establishes a common playing field for the upper years," says Doheny.

Students discuss, debate, reflect, and encounter the stranger in a host of ways including field research at Andover's own Peabody Museum of Archaeology with its foremost collection of Native American artifacts. "The Peabody is an unbelievably rich resource for us as it provides students with a chance to understand the past using nonwritten sources. For students to learn to think like an archaeologist or an anthropologist is very exciting."

Students inevitably have questions about current events. "We study *The Rise and Reach of Islam* their very first trimester. The notion that history helps inform the present is, I hope, something that we instill in our students," she says. "Students look at the Mongol invasion of present-day Afghanistan and want to know the latest news from that area. If the kids leave the classroom with questions to explore about the present, that is great."

BIOLDGY 600

Molecular Biology Laboratory Research

Into origine pendet. Phillips Academy's seal affirms it, and Krisien Johnson's take on teaching science manifests it. The end depends on the Leginning. It is hard to talk about advanced studies in molecular biology at Andover without acknowledging. Dr. Johnson's enthusiasm for interacting with students at every level of the science curriculum. It all starts with first steps.

I love teaching Intro to Biology to the ninth graders. If I can spark their interest, they will be the ones to go on to advanced study, to the molecular biology laboratory and beyond. I hope to introduce them to fields and opportunities they have never heard of," says Dr. Johnson.

To that end, she, along with the rest of the science faculty, is always coming up with creative ways to engage juniors, our freshmen. In one class they might physically act out a biological process. When we study the process of photographics, the students become parts of a chloroplast a flashlight is the sun, tenns balls are electrons.

Doing science is the first goal of Andover's science program. It is how many students learn best and how true understanding seeps in. It is the principle that also guides the Molecular Biology Research Program at Andover

The advanced program begins with *Biology 600*, a course in the basic techniques of laboratory research. Students learn how to clone DNA using bacteria, how to make copies of their own DNA from cheek cells, and how to carry out a well-controlled experiment and analyze data.

And then, with Dr. Johnson and other mentors, students use the laboratory to embark on their own independent research in molecular biology. Independent projects have ranged from looking at the abrogation of cancer cell proliferation in the presence of substances, such as vitamin D, to gene silencing in C elegans worms using RNA interference techniques to the complexities of improving the fidelity of in titro DNA replication.

"All of this research happens right here on campus because we have great facilities—and enthusiastic students and faculty. Keep in mind, these are high school students learning to carry out complex, well-controlled experiments, gather and analyze data, and troubleshoot problems," Dr. Johnson says. I enjoy seeing these young scientisty grow."

"I enjoy seeing these young scientists grow."

"Discourse and debate are so highly valued at Andover."

PHILOSOPHY AND RELIGION 430 Law and Morality

Law and Morality is the sort of class that promotes deep-into-the-night conversation. What does an ideal society look like? What role does government play in that? What role do we have as citizens? What authority should the government have over individual lives and choices?

Tom Hodgson, chair of the Department of Philosophy and Religious Studies, has been stimulating Andover's young minds for more than thirty years. Readings on justice and equality in society by Plato, 16th-century British philosopher Thomas Hobbes, and the 20th-century American John Rawls fuel robust classroom debate. "Discourse and debate are so highly valued at Andover. We debate both sides. By helping students to reflect on power and authority and by delving into the writing of great thinkers, this class helps them understand their own views and moves them to a deeper understanding of Western political philosophy and how that plays out today," he says.

The latter part of the class focuses on democratic theory during the last five years. How does democracy work here? Is it possible or even ethical to spread a "Freedom Agenda" around the world? "Unless we understand the under-pinnings of our own Western political philosophy, how can we hope to understand non-Western political thought?

"This generation of students must recognize the importance of elevating political discourse, and philosophy can help. The central goal of our discussions is not to declare winners in our debates or establish a single set of unassailable beliefs, but to deepen understanding of complex theoretical and practical issues. We should all come away with better informed and more open minds," he says.

When Phillips Academy began in 1778, it vowed to educate "youth from every quarter." The first class enrolled 13 boys. We presume our founder, Samuel Phillips Jr., himself a young man of 26, would be quite pleased to see how his fledgling school has grown. "Every quarter" today encompasses approximately 1,100 young men and women with a nearly equal number of each. (This ratio would likely delight Samuel's wife, Phebe, for it was she who conceived of an academy for girls, which would later become Abbot Academy.)

Our youth today come from a range of family backgrounds and educational experiences. Translated, that means Andover welcomes a panoply of people, with their own personalities. They come motivated and bright, as juniors (that's what we call our ninth-graders), as lowers (tenth-graders), as uppers (you're following now), and sometimes even as seniors and post-graduates (that is one extra year beyond senior).

You will find some students have lived their whole lives in one place (New York City, Tokyo, or Missoula, Montana), while others have barely stayed still. Some experienced their first snow with us, others have not yet put their feet in the sea. Andover youth wear jeans and t-shirts, hemp and pearls, sparkly flip-flops and vintage skirts, bows and beads and ties, and lots and lots of blue. You may find people you have been waiting to meet your whole life (but never even knew it). You will be guided by great teachers who are coaches and dorm counselors and mentors. Dormmates and classmates who are helpful, witty, inspiring, devoted, and perhaps occasionally inflexible. We are all, after all, very human, with soft hearts and hard resolve.

As E.M. Forster bade us in *Howards End*, "Only connect!" He went on to write, "Live in fragments no longer." By this measure, Andover is a true community—a sum of extraordinary, interdependent parts.

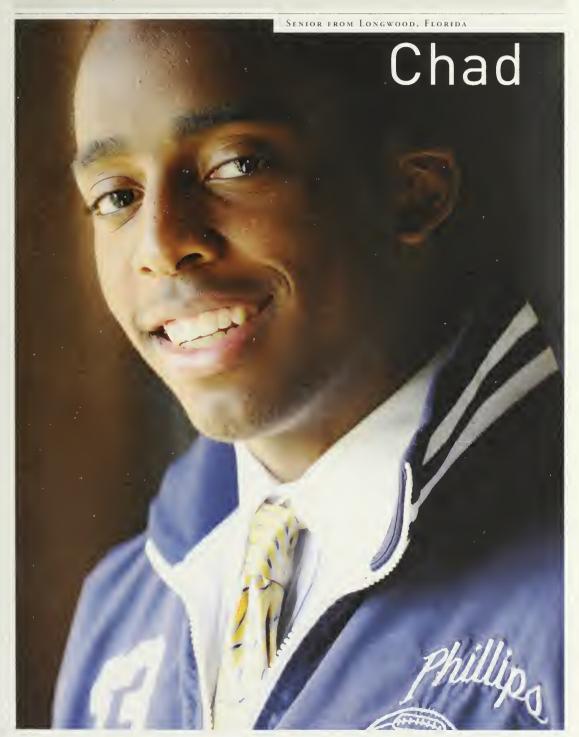

WHO AM I? It's as if Andover and I are working on it together. I have found, thus far, that 1] I am an actress. I had very little real stage experience when I got here and yet I quickly dove into our amazing theatre scene. Drama Labs, 24-hour plays, plays just for juniors. The day after auditions, I'm the first one looking for my name on the call board. 2] I am a copywriter. I love *Pot Pourri*, Andover's yearbook. I collect quotes from campus events and happenings and send them to the editors to incorporate into the book. The *Pot Pourri* room has a certain energy in it that makes me eager to attend meetings every week. 3] I am a dormmate and friend, living in the largest junior girls' dorm on campus. As a dorm representative, I work with the Cluster Council to plan events such as the Halloween Dance and the Pine Knoll Cluster dinner. We have all become very close in Nathan Hale. We watch *Grey's Anatomy* together and have Sunday brunch at the Andover Inn. 4] I am BLUE. I bleed blue, breathe blue. Phillips Academy has a lovely sense of community and a ridiculous amount of school spirit. GO BIG BLUE!

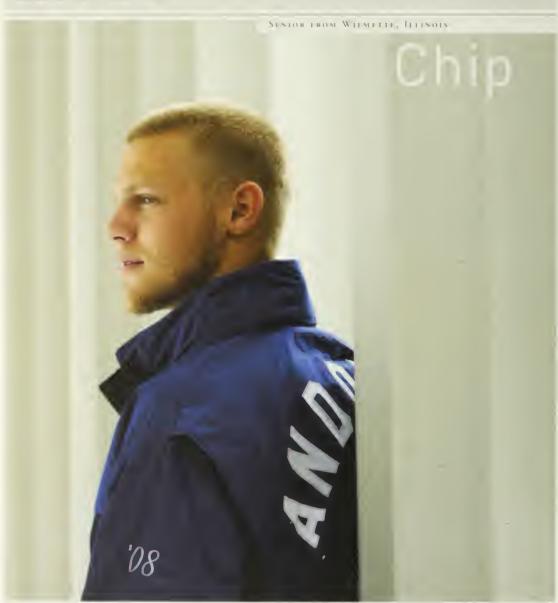

WHAT HAVE I LEARNED ABOUT MYSELF? I play the plane for the realization that music is emotive and the first the take of continuity in my life, for liam sentimental I love to read. I have taken to till a land with the halthors as Falkner and Dostoevsky in an attempt to trick myself The braining will read Progress is snall-like lengty making obscure historical references that are utility to will apply am art all a saying but create a nice effect. I am also fascinated Ly and the solution of the sol A problem to discuss a very opportunity to craft a sentence that places preservation st net to the sider my ef both those things a lam haif-Indian, haif-Scottish, The state of the s I all dia -P is itan - == et i Ind -- Pasi and I developed a cur os ty for the Ind an culture with and the result of a perfecand a war borbecause believe in the beauty of ach evement and symmetry fig. 1 day 'ear lear leder-t an-me bretter lamb unt intermittently subdued, sporadi-Industrial and often and the think I verused the pronoun of too often for my head size s well overg, Insuph, a lead eave officere

WHAT DO I FIND? My name is Charles but no one here calls me that. It's always Chad. I came to Andover in tenth grade because my public high school just wasn't challenging enough. I was so refreshed by how small Andover was (really!). I love being part of a team. When the home crowd is chanting your name, it's unbelievable. Andover football won the championship three years in a row. To be part of those victories was amazing. My friends here are from all over the world—Singapore, Paris, Mexico City. I guess one way to sum me up is open. I'm always open to something new happening next—improv comedy troupe, sports radio announcer, sports editor for the newspaper, running back, designing and building a computer game from scratch for my Independent Project. I did it all.

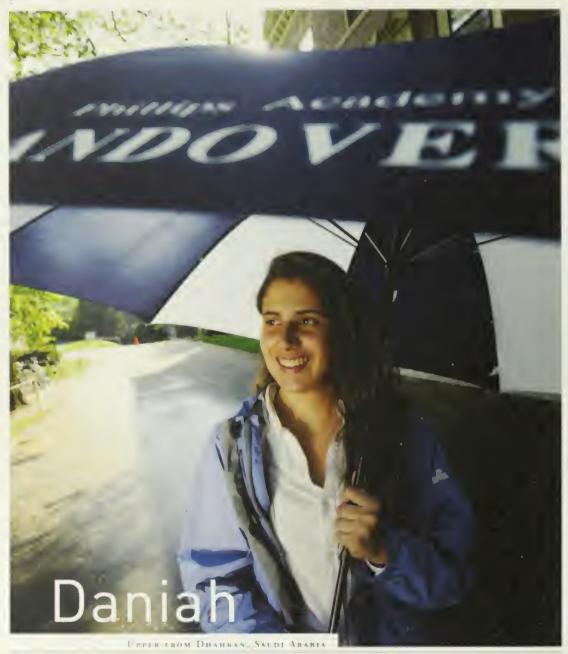

WHAT WILL I LEAVE BEHIND? With it is to And ver howed up with tong blonde hair and a It is will trought that mode me stand out other than the hair 1 d taken drum e i d boktt li waq od tujent, bit I wan t specta-ular in any t k dout my place t Andover in the front row of football and hockey the blood girt, cit. If all the country so rich

WHAT TYPE" AM I? Before Andover, I could answer that in a sentence. I was a math/science guy who dabbled in various musical instruments and tried to play sports. I can now say, proudly, that I have no idea what "type" of guy I am. I have acquired passionate interests in economics and international relations, enjoyed creative writing, and even begun to like literary analysis. • I have pushed myself further and further into the sciences, for which I still have endless enthusiasm. I have been able to take three Independent Projects — one in medicine run by the school physician, one in biology conducting research in our campus molecular biology lab, and one in chemistry conducting laboratory and academic research into environmental technologies. I've taken physics at the second- or third-year college level and look forward to Quantum Mechanics next term. No matter how hard I push, Andover has always been ready to push me further. I have been in Jazz Band and Concert Band on the alto, tenor, and baritone saxophones. I fought in vain to control the shaking in my knees as I took my first solo in front of an audience, blowing into the horn and wiggling my fingers desperately in hopes of sounding the right notes. I have played squash and fought through the inarticulable (not a word, I know) pain of crew—character building at its finest. I've discovered skills I never knew I had (still working on being in two places at once). I have seen talents in others, every day, that I can only wish I had. I've been encouraged and humbled more times than I can count, and each time learned a bit more about myself.

who AM I? I am a boy who has seen so much of the world. A boy who enjoys hearing sweet notes rising from the plane to my welcoming ears. I love diving into stories—imagining worlds foreign and familiar. One the outdoors—playing in the grass and the trees, feeling the wind brush my face and the sum warm misking love drawing my desired world, my favorite places. I love history and direction of the world came to be Every time I learn a piece of history, mind be resimple to the sum of the places. In the sum of the places is a puzzle piece that I have been collecting and putting the places in mind for almost 15 years, am a boy—with many interests. A boy who is becoming that A is a will as a goal to enjoy if e, succeed, and be true to myself. But most important.

STUDENTS

Serve and lead.

Phillips Academy's constitution was signed just two years after the U.S. Declaration of Independence. In the context of that burgeoning democracy, it stands that our founders would feel a responsibility for the public good.

That leads us to Andover's most indelible of tenets. Non sibi. "Not for self." Over the centuries, the notion of service to others has helped to define and guide the Academy. Today, non sibi not only lives at Andover, it flourishes in grand and in small ways—from service missions abroad to local grassroots initiatives to progress in "greening" the campus. The non sibi commitment runs so deep that more than 400 students each trimester and a large number of faculty and alumni are involved in multiple programs of service throughout the year. You may volunteer once each term or several hours each week. It may be part of an academic course or an independent project.

Like a mantra, non sibi helps all of us in the Andover community remember our responsibility to society in our own backyard and around the globe—to serve and to lead. Andover's outreach programs, which engage students beyond those who attend school during the academic year, fulfill the Academy's non sibi motto as a private school with a public purpose. For information about outreach programs, see page 99.

NON SIBI DAY

ANDOVER COMES TOGETHER

In October, the Andover community, at home and at large, "unites" for a day of community service. Students, faculty, staff, alumni, and parents work on projects and problems locally, nationally, and around the globe.

During the first Non Sibi Day, more than 100 different projects were developed and staffed by 1,600 volunteers in 27 states and 13 countries,

representing five continents. The entire ninthgrade class joined with Groundwork Lawrence in its annual Spicket River Cleanup. Other students and faculty painted, sorted donated clothing and food, served meals, and coached children from the Lawrence Boys and Girls Club. Alumni took on literacy projects, shorefront cleanups, vegetable harvests, and construction of homeless shelters.

SERVICE LEARNING

SPANISH 530: ADVANCED SPANISH LANGUAGE IN THE LAWRENCE COMMUNITY

The obvious "community servic" component of a class like *Spanish see* might involve tutoring students and elders in the English language. Or low about helping "vear-olds feel more comfortable about their dual heritage through student designed reading and writing curricula? Mark Curlei, the classes instructor, says it best:

We look at issues of duality in the Hispanic world, particularly asplicts such as bilingualism, biculturilism, and vouth identity. In partnership with two organizations in Lawrence, the Henry K. Oliver School and the Schior Center, we explored these topics through the eyes of scould-graders and elders of the Hispanic

community right next door. With the school children, we taught reading and writing in Spanish with folkloric tales from Latin America, with the elders we discussed the realities of living and growing up Hispanic in the U.S. and Lawrence. Our experiences with both groups were revealing and engaging for all involved, and they provided opportunities for us to take our learning beyond the four walls of the classroom on a weekly basis.

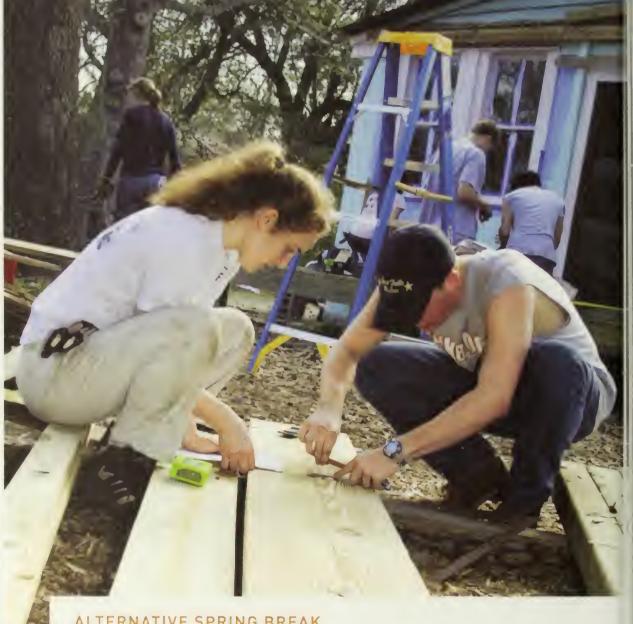

"It's true. Not only were we mentors for the vounger students, but they and the elders also taught us with authenticity about Hispanic-American life."

ALTERNATIVE SPRING BREAK

LENDING MANY HANDS IN SOUTH CAROLINA

Sinc. 1996, the Community Service Program has sponsored Alternative Spring Break trips to the Sa Islands of South Carolina for the first we k of spring vacation. Faculty and students pend the week working to refurbish and construct housing in cooperation with Rural Mission, Inc., a local organization focused on improving the quality of life for low-income residents. In addit on, students have the opportunity to meet and work alongside local

It's another way that Andover 'walks the walk' in its commitment to community service," says Chad Green, director of community service at Andover, who accompanies and works with the students along with faculty member Rev. Michael Ibner. Lach week hundreds of students participate in service projects on campus and in the community. Alternative breaks get them out to experience the wider world."

SUMMER INTERNATIONAL SERVICE

NISWARTH

During summer break, Andover sends a group of students and faculty to Mumbai, India, to work in partnership with an Indian school on children's rights, literacy, and community development projects. Appropriately, the three-week summer service-learning project is called *Niswarth*, which means *non sibi* in Hindi.

The students, working and living with counterparts from the Udayachal School in Vikhroli, a northeast suburb of Mumbai—study the status of children's rights in India and work with two prominent nongovernmental organ-

izations in Mumbai to learn about complex issues related to poverty, primary education, legal services, and basic health care for children in urban settings.

"One day students will be in an apartment, getting to know a family; the next they will be meeting with the CEO of a company or government minister. By immersing them in the daily life and giving them access to lots of perspectives, they are moved to pursue action in their own ways, whether it's microfinance or social justice or urban design," says Raj Mundra, instructor in biology, who developed the program and accompanies the students on the powerful journey. "They see beyond themselves and go beyond anything that is familiar."

For student reflections on their experience, visit the blog: www.niswarthandover.blogspot.com.

COMMUNITY SERVICE

AT-A-GLANCE

PUBLIC AND COMMUNITY SERVICE are integral to the educational mission of Phillips Academy. In accordance with the school's motto, *non sibi* ("not for self"), the Phillips Academy Community Service Program strives to:

- promote and provide structured opportunities for students, staff, and faculty to engage in public service;
- foster collaborative relationships with individuals, organizations, and schools that address problems and build upon assets of local and global communities;
- connect academic learning to community problem solving through the development of service-learning courses in a variety of disciplines;
- inspire responsibility and personal growth by supporting volunteers, encouraging student initiatives, and providing a comprehensive leadership education program; and
- motivate students to consider and act upon issues of social justice and civic responsibility and thus foster a commitment to a lifetime of effective participation in public life.
 - written by the 1997-1998 student coordinators and faculty advisory board

1

Spread the Love week, organized by the community service student coordinators and featuring four nights of programs related to social issues

3

Towns with projects with which Andover students volunteer.

Andover has partnerships with more than 30 different area organizations.

18.53

Percent reduction in energy consumption during the Green Cup Challenge

40

Houses repaired or built in the past 14 years thanks to the students, faculty, and staff who spent their spring break doing volunteer work in South Carolina

1,600

Volunteers for Andover's first Non Sibi Day worldwide community service day. The scope of the day included 100 service projects,

5 continents, 24 states.

Leadership opportunities in community service.

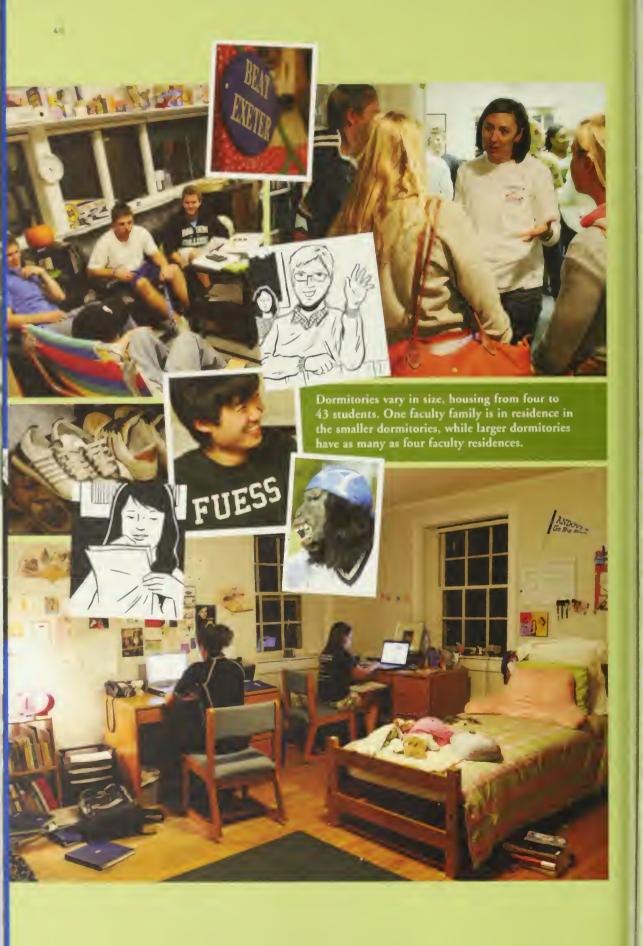

If you'd like to get involved beyond volunteering on a term-by-term basis, you can become a project coordinator, lead a Non Sibi Day project, be a member of the Community Engagement Council to plan awareness-raising events on campus, or be a team leader during the Walk for Hunger.

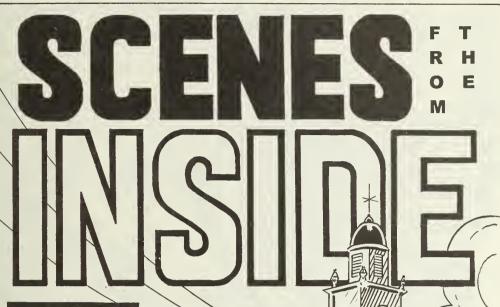

Cluster.

How best to describe the phenomenon of size at Phillips Academy? How can Andover at once feel small yet vast? Our bounty of classes and clubs and opportunities is indeed possible because of our sizeable student body, faculty, and resources. Yet students feel at home here, relishing the closeness of a small residential community. To answer this conundrum: Andover feels "small-big" because of our neighborhoods.

Imagine an expansive oak tree, say 250 years old. That's Phillips Academy. Then picture five of its strongest limbs. Those are our neighborhoods, our "clusters." The five clusters are organized by the geographic locations of their member dorms (those would likely be the smaller branches). Student orientation, special events, intramural sports, and weekly study breaks, called munches, are arranged by cluster. Each has its own Blue Key spirit leaders. Clusters serve as a home base for boarding and day students, from which they are encouraged to branch out into the larger community. You will quickly discover that your cluster is the best home away from home.

RESIDENTIAL LIFE

AT-A-GLANCE

THE CLUSTER SYSTEM OF FIVE DYNAMIC NEIGHBORHOODS within the school is the heart of Andover's campus life. Designed to create opportunities for close student-faculty interaction, clusters give students the advantages of a small residential community. Each cluster of about 220 boarding and day students and 40 faculty families is led by a cluster dean and is a microcosm of the school, including students from all backgrounds with all sorts of interests. Student orientation, intramural sports, weekday social functions, Blue Key activities, and discipline are all organized by cluster. During the course of the school year, each cluster takes on its own distinct personality and spirit. (Cluster affiliations do not define groupings for academics, extracurricular activities, or interscholastic athletics.)

1

Dining hall where everyone eats all meals, called Paresky Commons

4

Smallest number of students in a single dorm

7

Weekend events sponsored by clusters throughout the year.

These include a luau dance, casino night, a fashion show, a cabaret, and Cluster Day, a full day of Olympic-style cluster competitions, concerts, and barbeques on the lawn.

43

Largest number of students in a single dorm

95+

Percent of the faculty living on campus

100+

Proctors and prefects
helping to make dorm life fun!
They organize hall events,
act as a liaison between
the house counselors and
the students, and serve as
older sibling figures who
have "been there, done that"
and can dispense advice
at the drop of a hat.

220

Day and boarding students from all classes in each cluster

1.800 +

Movies available to rent free-of-charge through the on-campus library. If you're not in the mood for a film, you can also borrow board games and game consoles from the Student Activities Office.

Speak out.

If Andover's academic program helps you learn to speak up with confidence, then extracurriculars give you a chance to speak out with passion. Student organizations are central to the Andover experience. No matter how busy the schedule, students always find time to try something new, delve deeper into their interests, discover new abilities. Right now, you might be the only one in your school interested in swing dancing, cricket, or theatre improv. At Andover, no student is an island for long. During your first week on campus, you will be courted by nearly 90 student-run clubs and groups. As a ninth grader, you might approach the activities as you would a buffet, partaking in several. By your lower or upper year, you inevitably will connect with others who share your affinities and focus on your favorites. Perhaps you will lead a cultural or religious group, serve as a diplomat to the Model United Nations, or join the Math Club or Eco-Action Group. If you do not find an existing club or publication to match your vision, we encourage you to launch your own. At Andover, anything is possible.

The Five Ws, One H, and TGIF

Andover's student newspaper, *The Phillipian*, gives a glimpse of all that the Academy has to offer—opportunities to support a cause, lead a rally, perform on stage, hear a provocative speaker, make a point, test one's wit and wisdom, create and display art. If an opportunity does not exist, oftentimes students will take a grassroots approach—lobby support, seek funding, start a new club, or invite their own guest speaker.

Originally founded in 1877, *The Phillipian* itself is a stellar example of how devoted Andover students are to their organizations and clubs. The editorial staff responsible for *The Phillipian*, volume CXXX never failed to deliver an issue each Friday during the academic year. That's 29 issues, 400 or so pages, countless late nights, hundreds of editorial decisions, and probably hundreds of thousands of words. Even at Andover, that commitment and enthusiasm is nearly unmatched.

Letter from the Editor

For more than half a century Phillips students have had the benefit of a free press. It is an honor and a responsibility that is seldom allowed to high school students. Not only does this provide the Andover community the typical benefits of a free press, such as an objective source of news and an open forum of discussion, it also gives the students involved a unique and invaluable educational experience.

Until I joined *The Phillipian* I had never had the opportunity to accomplish something entirely on my own. I had always had a teacher or a parent or some other mentor to fall back on when things got tough.

We report, we write, we edit, we design layout, we fact-check, we edit again, we "PDF" and we send our pages to press all on our own. We also deliver our newspaper,

balance our budget, manage our website, make long-term plans and design business strategies. We are careful to consider our public image and, when necessary, remain mindful of community politics.

The fact that students are granted a free press is representative of Andover's philosophy. Phillips Academy gives you the freedom to explore your aspirations, the resources to achieve them, and, in case you fail, just enough cushion to keep fighting. Our failures are our own, but so are our successes. There is nothing more rewarding than that.

James Editor-in-Chief, *The Phillipian* Volume CXXX

ANDOVER GOES NEED-BLIND

FINANCIAL BACKGROUND NO LONGER A FACTOR FOR APPLICANTS

"It's the right thing to do, and it's the only thing to do."
—Barbara Landis Chase, Head of School

Phillips Academy has adopted a needblind admission policy for the 2008-09 academic year. The Admissions Office will make acceptances without regard to applicants' financial backgrounds and will meet all financial need of its accepted students.

In an exclusive to *The Phillipian*, Head of School Barbara I and that Chase said that the school will meet this goal, set out in Andover's 2004 Strategic Plan, years ahead of schedule

Nearly all members of the Board of Trustees participated in a conference call with Chase on Friday, November 16, when the final decision was made to make Andover need-blind.

All those present on the call voted to go need-blind for the upcoming year after a thorough discussion, said Oscar L. Tang '56, the President of the Board of Trustees.

James (left) and Thomas, executive editor, relax in *The Phillipian* offices, knowing that another issue has been wrapped up and will soon hit the hallways.

Four Andover Students Film Discussion for CNN, Forum Featured Scoop08 Reporters and Editors

Aimid bright lights and heavy duty filming equipment, Jessica Cole '108, *Phillipian* News Director Jack Dickes '109, Alexander Heffner '08 and Harvard Ireshman Prateek Kumar '07 fielded questions in a CNN panel discussion taped. Wednesday in the library's Freeman Room to be aired in the coming weeks.

The four PA students discussed their involvement in Scoop08.com and the upcoming national election with Emmy award-winning host Rtck Sanchez.

The panel discussion will air as an upcoming segment in the CNN television series entitled "The League of First Time Voters."

Scoop08.com, the brainchid of co-founders Heffner and Andrew Mangino, a junior at Yale, is an online political magazine written by high school students from across the United States and abroad.

Anchor Rick Sanchez interviews the six participants.

Candidates Plaster Uncommons with Colorful Campaign Posters

A life-size poster of Ishan '09 covers one vil of Uncommons, flinked by a hot pink poster urght students to vote for Michele '09 On another is a headshot of a smiling Arin '09 reading, "Vote Arun"

As the race to become the next student bildy president has kicked off, candidate have begun their campaign blitzes. With Uncommons as a single space and with many bill to be ards surrounding the area, many and dates have chosen to hang posters, some mall some bill disorder hage.

After said. I need a lot of people to kn w my face, to be able to associate a name to go with my face. What better than the orm is potential of my self."

RECENT NEWS

International Club Aids Earthquake Victims

Countless times throughout the school year, students are reminded to place emphasis on the importance of diversity within our student body through the saying, "Youth from every quarter." The phrase is well justified, as the Phillips Academy student body consists of students from 23 countries and 47 different states, with over ten percent international students. This immense amount of diversity was epitomized at the International Festival, hosted by the International Club, where food from nearly every quarter of the world was sold.

"The festival went fantastically. Through the many generous donations made by downtown restaurants, all the food sold was pure profit, which translated to a lot more money to help the Chinese earthquake victims and the cyclonestricken Burmese," said the co-head of the International Club.

300 Participate in Annual Day of Silence Protesting Hate Against LGBT Students

The campus seemed quieter than usual last Friday. Students protested discrimination against lesbians, gays, bisexuals and transgenders by remaining silent during the 12th annual National Day of Silence.

Nearly 300 Andover students signed up in Commons to take the vow of silence. Though not everyone who signed up participated, Frank Tipton, faculty advisor for gay, lesbian and bisexual issues and instructor in history said he felt the Day of Silence achieved its goal of raising awareness.

Nette '09, president of GSA and arts editor of *The Phillipian*, said, "We are silent on this day in order to recognize the LGBT teens across the nation who are forced to be silent. They shouldn't need to stay silent."

Editors and Club Presidents Pass Torches to Underclassmen

As Seniors turn their focus from studying to suntanning, they are turning their extracurriculars over to new student leaders.

Though some clubs already have new boards up and running, others are just beginning to review leadership candidates for 2008-2009.

"A great majority of the time, it's a pretty smooth transition from one board to the next," says Kennan Daniel, assistant director of student activities.

School publications generally have their boards switch over earlier in the school year to ensure that the new editors have support available if they need help.

PA Advanced Mock Trial Team Victorious in Debut Interscholastic Competition, Judged by Superior Court Justices

In its first interscholastic competition on Sunday, Phillips Academy's Advanced Mock Trial team defeated the St. George's School from Vancouver, Canada in the first competition judged by federal judges.

Out of 110 points, PA's Mock Trial team received 99 points, winning by a three-point lead over St. George's 96 points.

Mock Trial is in its third year as a club. The advanced team that competed on Sunday consisted of 11 students, and the novice group consisted of 9 participants.

"The trial was evenly matched and Andover performed well with their witnesses."

Rob '09, President of the Mock Trial

Happenings Around Campus

Too "Cool" for School: The Addison Goes Mod

II part Saturday night Andover students were transperted from snows, present-day New England transperses (1950's California at the Addison Gallery's Birth of the Cool' party

Addition not a swanky flashback with the Site day area party complete with desserts, mock till a very partoin access swing dancing, outfits of bild prints. Ence patterns and bright colors. The air of color a sopor freation was unique among one-mous events.

The west was impreceded ted in its creativity. It was the first stadent-organized party in the Addison Gallery and it was an event where students could a her and discuss art or just have fun With its then ed die scode, the Birth of Cool party atmosphere flowed students to step outside their normal paramas and portray a different character.

Communicating Through Music

Normally, musicians perform under the direction of a conductor, but this was not the case this past Sunday when over 20 students performed in the Academy Chamber Music Society's concert

Andover's Chamber Music Society does not function as many other clubs do

At the beginning of each school year, students who express interest in the organization can speak to music teacher and performer, Holly Barnes, to audition Barnes then organizes groups of students to perform together based on their musical aptitude.

Chamber music is performed by a small, intimate ensemble of musicians without the direction of a conductor

Poet Robert Pinsky Inspires Audience

Former Poet Laureate Robert Pinsky would want you to read this article aloud—at least, he would if it were a poem.

Pinsky, who served as U.S. Poet Laureate from 1997 to 2000, is an established poet, editor and translator of poetry and prose. His full collection of work includes an impressive 18 books. He paid the Phillips Academy campus a visit last 1 riday. April 25

Addressing the packed audience in Kemper auditorium, Pinsky's opening remark elucidating a poem was "My conversation has had to do with forgetting. Remembering and forgetting are the same process, you can't do one without the other."

Many of the poems that he selected to read aloud were indeed about reminiscence and forget-tulness, enlightenment and oblivion. The two ideas were blurred and interwoven throughout his works, sometimes juxtaposed and other times merged seamlessly

"UM became an official club last spring. Like any other club, UM was required to submit an application for review and approval, which meant finding a faculty advisor."

UNACCOMPANIED MINORS

The long hours that Andover students spend each night in the library might give us the misleading image of complacent youths, but is there really such a thing as an "obedient teen?" Three seniors recently-formed an ensemble named Unaccompanied Minors. The entirely student-run ensemble is still just getting on its feet, but the group

promises to make an impression on the community.

According to Lucy '08, one of Unaccompanied Minors' three co-heads, the ensemble is "by no means a rebel group." Most members regularly attend the traditional orchestra. UM is simply another chance for motivated musicians to hone their skills and play some interesting music.

Winter Pep Rally

Phillips Academy gets pumped for Winter Term Andover/Exeter games

This year, the winter term pep rally, a much-anticipated event, featured some very unique and entertaining skits that kept the audience excited and full of energy, breaking up the monotony of Winter term.

In addition to leading cheers, the ten Blue Key heads performed witty skits based on popular, contemporary television shows, as well as sports-related fragments; a mock "ESPN" show counting down the five best Andover/Exeter upsets was used to introduce the various teams.

Thor '09 said, "I thought the pep rally was really good, and very fun... Everyone likes spirit and cheering for their grades and sports, and that's obviously demonstrated by the people going to games at A/E."

PA CompSci Team Wins Invitational High School Programming Contest for Second Consecutive Year

While some Andover athletes spent the pair weekend demonstrating their physical ability others conquered opponents a week prior with brains, not brawn

Marking its second consecutive win, the Phillips Academy Computer Science team swept the 20th annual Invitational High School Programming Contest, he'd at St. Bonaventure University in New York, defeating 12 other teams

The teams were given one computer and three hours to write program solutions for nine problems. Andover solved all of the problems correctly

The challenges included simulating children's games, analyzing statistics and detecting tumors in an MRI image

The contest judged teams both on accuracy and speed, but the time totals for all teams only included minutes on winning problems.

In preparation for the contest, the team held practice for three and a half hours at a time, during which the team members tried to simulate the actual competition

"Every program had to be absolutely perfect from calculations to spelling and punctuation or else the program was considered incorrect."

Compete and be well.

En garde Hike! Slide! Spike! Ohmmm. The sound of balance has many intonations at Andover. Do you consider yourself an Athlete or an athlete? A serious competitor, a let's-try-it-and-see beginner, or someone in between? Andover's athletic program, both broad and deep, offers dozens of sports, dance, and movement options at every level of instruction. As a competitive athlete you will work with coaches widely recognized as the best in secondary education. Varsity teams also face strong interscholastic competition from other independent schools and from Boston-area colleges. If you are more of a recreational athlete, try out cluster sports (intramural teams) in soccer. Ultimate Frisbee, or squash to name a few. Take an instructional class in water polo or hip hop or yoga. We celebrate the multi-season athlete—the diver who is also the lacrosse player, the cross-country runner/ice hockey player/dancer. With athletic facilities among the finest in the country. Andover offers many enriching ways to connect body, mind, and spirit—to find just the right balance in your life at Andover. Oh, and the contagious Big Blue spirit—that is deep devotion, pure lunacy, and all Andover.

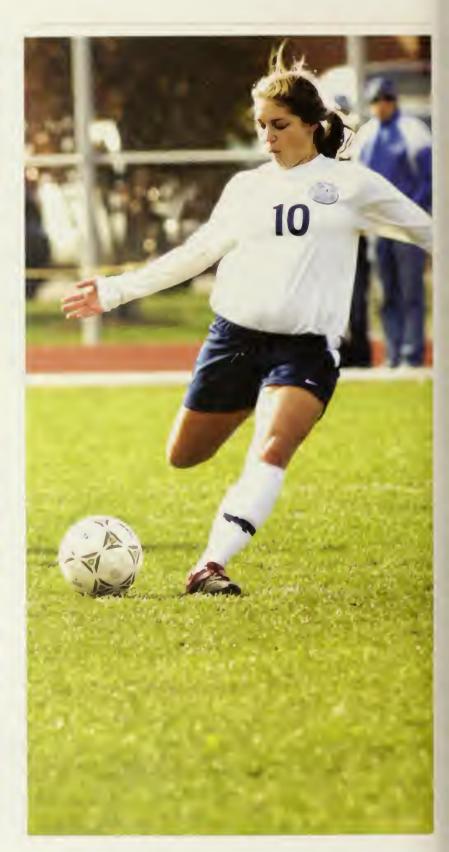

ATHLETICS

AT-A-GLANCE

PARTICIPATION AT ALL LEVELS In keeping with Andover's commitment to provide a depth and breadth of choices to its students, the athletic department offers dozens of sports, dance, and exercise options at every level of instruction. The training room is fully staffed with three certified athletic trainers who work with the school physician and the staff at Isham Health Center. Recreational athletes have as options not only intramural and instructional sports, but such special programs as Outdoor Pursuits, classical ballet, basic fitness (FIT), modern dance, yoga, and aerobics. All juniors (ninth-graders) and lowers (tenth-graders) also take one challenge-based physical education course five hours a week for one term. These students are tested for physical aptitude and instructed in safety, health, and exercise physiology, learn drownproofing, master a ropes course, and gain the information and skills they will need to maintain lifetime wellness.

Perform and create.

The arts flourish at Andover. Intellect combined with artistry leads students on astonishing journeys in search of self and connection with others who share their grace and sensibilities or with whom they have nothing in common. Our students are first and foremost scholars, yet many are also practicing artists.

You may come to Andover as an accomplished violinist, modern dancer, anime artist, or painter. We have the faculty and the facilities to keep the terrain challenging and fresh. Perhaps you have never picked up a pastel but always wanted to capture mountains, or illustrate your graphic novel, or make a public service film. Maybe you play piano by ear and finally would like to read music, or investigate the theories of music and tone, or take ballet for the first time. You may captivate a full house with your solo on a Steinway grand or perform with the 100-member orchestra. You will learn to master the butterflies that swirl in your stomach before a live show and impress the community with your talent and grace.

With all of the arts opportunities at Andover—from the walls of the gallery to the stage of the chapel—you are bound to find a most satisfying path for your self-expression.

SAYER

WENHAM, MASSACHUSETTS

"My head is always halfway in the studio and my body always waiting to get there." She found in Andover the high school of her wishes: stimulating programs in academics and dance. "Andover transformed me as a dancer. I have always pushed myself a lot, and I expected a lot out of the program. I was so uptight at first. Opening up to modern and jazz dance brought my ballet to a whole new level. There are so many opportunities to perform here. I'm improving because I'm dancing more and having more fun." "Instead of narrowing who I am, I feel dance has driven me to be my best," says Sayer. "It has taught me discipline and work ethic and how to balance all of the demanding aspects in my life. I don't like to think that all there is to me is dance. I think dance is the core from which the rest of my character grows."

Max SPEARFISH, SOUTH DAKOTA

His muse found him in a church basement. While his friends pounded the keys of the tired upright piano, 7-year-old Max teased apart the melodies of hymns. He moved on to a portable keyboard at home—earning a quarter from his dad for every Led Zeppelin tune he picked up by ear.
Max grew up fly-fishing, skiing, and loving his home at the foot of the Black Mountains. His first piano gig was in a nursing home—he played for milk and cookies. He appeared in coffee-houses and lounges in several states, recorded CDs, learned about the music business, and won a national kid talent contest.
Max joined Andover as an upper (Grade 11). "I knew from my first visit to Andover, when I got swept into a two-hour jazz improv session, that I had not only found my academic challenge, but my musical challenge, as well."
Jamming with visiting Tibetan monks, absorbing the diverse world rhythms of fellow musicians into his own compositions, playing for audiences with his jazz trio—it's the "unexpecteds" that make Andover so great. "What happens here is a fusion. It's so powerful."

KEVIN AND KYLE

WOOSTER, OHIO

The graduating class of St. Mary's Elementary School was 22 percent Kevin and Kyle. None of the other seven graduates were identical twins or saxophone players. When they came to Andover they were still the only twins in their class, but they were far from the only musicians. At Andover, they have grown more independent, in general, and also more independent of each other. They live in separate dorms, take different classes, and have spent the summer thousands of miles apart (Kevin in Russia, Kyle in China). They have never really had the psychic synchronicity that people expect, except when it comes to music. They both play sax in Andover's full Concert Band (Kevin, tenor; Kyle, alto) and break down into smaller musical groups during the week. With fewer instruments, the combos are more chamber-like. They competed in a Battle of the Bands on drums and bass guitar, recorded a song in the WPAA studio, and composed jazzy music. They are drawn to music that is "melodious yet has certain chords that complicate that."

Simone

GLOUCESTER, MASSACHUSETTS

'My first travels to Thailand inspired me to delve deeper into issues of identity and how one perceives and represents self." • Simone combines her artistry (painting, photography, textiles) with a passion for human rights and community service. For three summers, Andover has made possible Simone's independent studies in Thailand. • "The following year in Thailand, through field research and photography, I examined the role of women in rural village societies with agrarian economies. I instituted a self-portrait project with children from village schools—the process and resulting drawings went far beyond my expectations and produced surprising interpretations of identity. I returned to Thailand last summer with art materials and artist papers to introduce and enliven children's imaginations to the creative process. When I returned to Andover, I coordinated an exhibition, Foreign Findings, in the Gelb Gallery," Simone says. • "Art is proof of existence. The things we make are records and capsules of a moment in time and state of being. To create is to establish our voice and role in the world and mark its surface with our unique footprints."

ABBY

VERO BEACH, FLORIDA

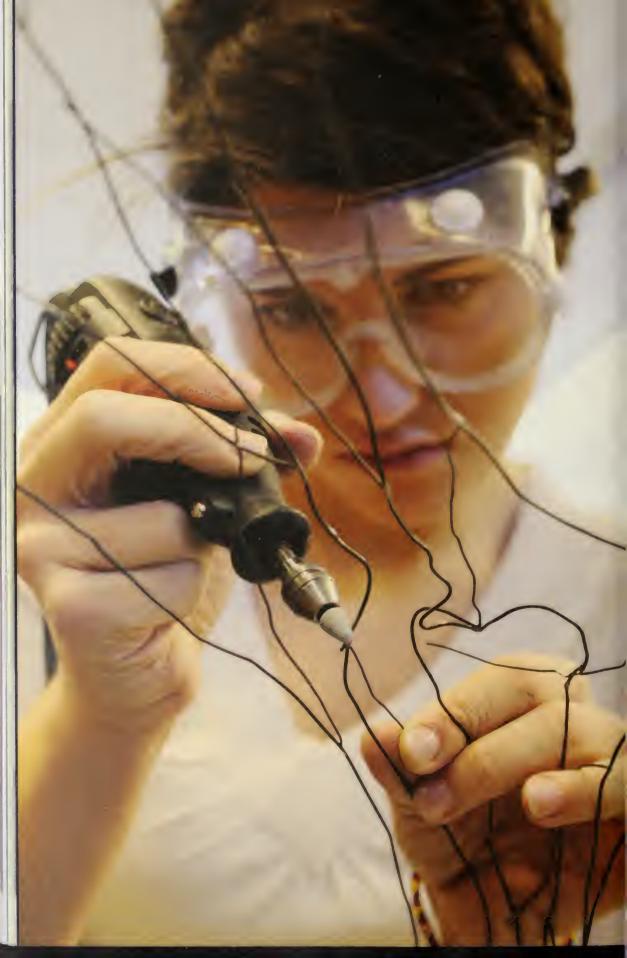

Abby grew up in the "Citrus Capital of the World," on the stage of what she says is "the most fantastic children's theatre in the world...! didn't want to go to boarding school; I wanted to go to Andover." • The quality and quantity of Andover productions astounded her. And the "scene" has only erupted more since she arrived as a ninth-grader. • As producers of Drama Lab, Abby and Lucas, along with two other seniors, did it all. "We approached Drama Lab like it was a creative business. There used to be one poorly attended Drama Lab, production every two weeks on a Sunday afternoon. We changed it to three 20-minute, student-directed one-act shows every Friday night. The response has been phenomenal in terms of audience (about 10 percent of the school comes out) and in the stacks of applications to direct and participate." • Drama Lab alone amounts to about 30 or 40 shows annually. Abby also has produced the much-anticipated Grasshopper Night ("a high school talent show done really well") and the exhilarating and exhausting 24-Hour Play event. "Andover literally gives you the keys to the theatres and great faculty mentoring, and the rest is up to you."

CHELSEA GOSHEN, KENTUCKY

A man heard a young harpist play on the radio. He, by chance, ran into her father in a country store in Kentucky. His high school alma mater in New England would be perfect for the gifted musician, he said. That serendipity brought Chelsea, the self-described country girl, to Phillips Academy. • "I'm really happy with nature and fields, being with horses and dogs," Chelsea says. "Then I found that Andover was the only school to employ a harp teacher. Music theory is top notch. Music is really integrated into my life now. It's a lot with academics, but hard work never hurt anyone, and I enjoy being here." • Chelsea has toured major U.S. cities with Andover's full Chamber Orchestra and the Cantata Choir and has flourished as a solo artist of the harp. "When I really know a piece, I go into a trance—not remembering my fingers, they are just working on their own. Just feeling and breathing. I don't worry about the music anymore. I just am."

THE ARTS

AT-A-GLANCE

1

Performance of the *Nuteracker* every other year

1

Theatre and dance tour to the Edinburgh Fringe Festival every other year

1

Hand bell choir

1

Rock music practice room

2

Student-run dance groups: Blue Strut (jazz) and Hypnotic (hip-hop)

2

Percussion practice rooms

3

Areas of exploration in the visual arts: two-dimensional design, three-dimensional design, and electronic imaging

3

Theatres on campus; student art exhibitions each year; music performance spaces

3

Main stage dance shows each year: two faculty-choreographed and one student production, The Dance Open 3

Choral opportunities, including:

90-member Chorus

35-member Gospel Choir

15-member Fidelio madrigal

3

Major theatrical performances each year with sets and costumes

4

Orchestras, including:

100-member Academy Orchestra

35-member Chamber Orchestra

20-member Amadeus Ensemble

20-member Corelli Ensemble

4

Choreo Labs per year

9

Final Cut Pro editing suites

11

Performance music ensembles

12

Recent Cantata destinations.
The choir has performed in
Italy, Puerto Rico, Bermuda,
China, Montreal, and Hawaii,
among other places.

16

Grand pianos available for practice including a new Steinway Concert Grand in Cochran Chapel

19

Music practice rooms

30

Smaller student-produced and directed theatre productions each year

45

Teachers who give instrumental music lessons, from banjo to bagpipes and everything in between

70

Student, faculty, and guest artist concerts on campus each year

120

Digital and video cameras dedicated to the arts program

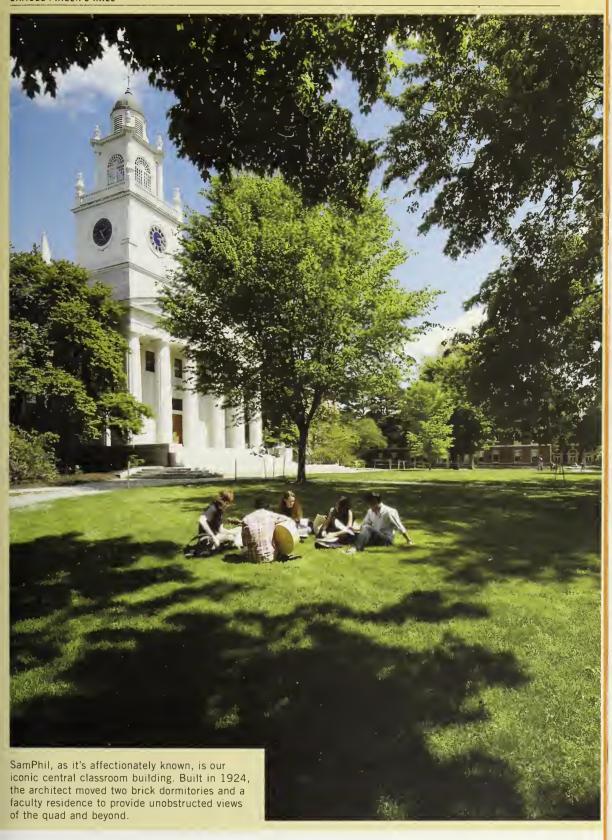

400

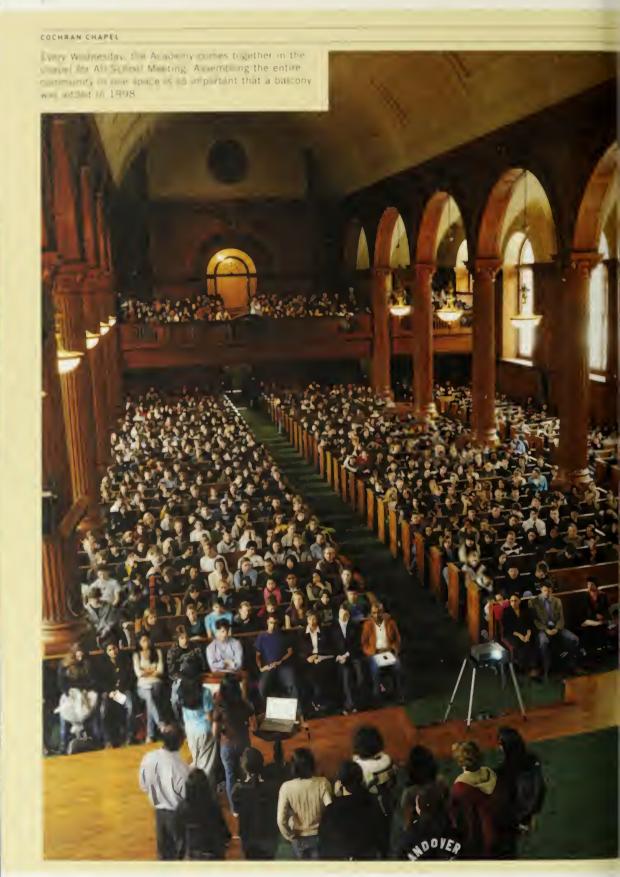

Videos produced and edited by students in a given year

Explore.

Andover's campus, on first view, is the quintessence of a New England residential academy. Historic buildings, a bell tower, elm-shaded paths connecting our small neighborhoods, many playing fields, statuary, wood-paneled dining halls. But wait. Look closer and you will find that history is preserved not just for antiquity's sake. Our 500-acre campus is a hub of intellectual activity—set only 21 miles from Boston in the picturesque town of Andover, Massachusetts. Consider these resources. One hundred and nine classrooms: more than 200 computers; language and music laboratories; a licensed radio station streaming audio online; 24 extensive science laboratories and classrooms in the Gelb Science Center; an 85-acre bird sanctuary; a swimming pool—the list goes on. In its 16th-century origin, the word facility meant "the unimpeded opportunity for doing something." That's how we look at our facilities at Andover—giving students unimpeded opportunities to succeed, as well as to be enchanted.

THE HISTORIC TOWN OF ANDOVER, founded in 1646 in Essex County, is home to Phillips Academy. With more than 31,000 residents spread across 32 square miles, the town is a bustling combination of rural New England charm and high technology business.

Throughout its history, Andover has had brushes with both notoriety and fame—from connections to the Salem witch trials of 1692 to the Battle of Bunker Hill, where 350 Andover men saw action. During a postwar visit, President George Washington, was so impressed by the young Phillips Academy that he later sent members of his family to school here.

Long before the Civil War, the antislavery movement caught fire in Andover. Harriet Beecher Stowe wrote *Uncle Tom's Cabin* just before moving to Andover with her husband, who assumed leadership of the Andover Theological Seminary—then on the grounds of Phillips Academy. Andover became an active stop on the Underground Railroad. And when war came, more than 600 Andover men marched south with the Union Army. Later, Sojourner Truth made trips to Andover, campaigning for women's rights and racial equality.

The 20th century brought industrialization and textile mills to Andover and nearby Lawrence. The nation's first "model industrial community," named Shawsheen Village, was built on Andover's northern edge to house the headquarters and residences of American Woolen Mills' management.

Today, the heart of Andover lies along Main Street, which runs through the primary business district and up the hill to the Academy's leafy campus. Students can make the trip on foot—in roughly 10 minutes—to Starbucks, the venerable Andover Book Store, Bertucci's restaurant, the tiny landmark Lantern Brunch, a major pharmacy, and a mix of clothing, sports, and gift stores. A commuter rail station in town allows students to take full advantage of the arts, sports, entertainment, and educational and historic attractions in nearby Boston and Cambridge, only 20 miles to the south.

For directions see: www.andover.edu/about_andover/visiting.htm

LOCATION

AT-A-GLANCE

PHILLIPS ACADEMY'S LOCATION provides unique access to a rich mix of topography, urban amenities, athletic venues, and cultural and intellectual opportunities. Twenty-one miles north of Boston, and roughly the same distance west of Salem, Gloucester, and the sea, Andover also lies within easy reach of the mountains of Vermont and New Hampshire, the charm of Maine, and the intellectual riches of Cambridge, the Museum of Fine Arts, and many other world-class attractions.

AVERAGE HIGH AND LOW TEMPERATURES

Embrace life.

For all the ways we journey together at Andover, our goal is to point you toward independence. This is not a final destination, rather a next step on an evolving exploration of life and learning. While you are with us you will be called to many challenges. You will learn to manage your time, set priorities, and see your way through difficult lessons (which may entail the very self-possessed task of asking for help). During this adventure, you will learn to assess information, grapple with big questions, synthesize seemingly unrelated sources, care for yourself, and care about others. You will learn that reaching your potential is only the beginning; push further and you will discover a new horizon. You will answer "What can I possibly do to help?" with creative solutions and assured action. You will leave Andover as an "act-er" and an "enacter." You will continue to think openly and deeply, to serve, and to lead. With goodness and knowledge as your foundation, you will develop personal values and a moral compass, both of which will guide you long after Andover. The road ahead presents a world of possibilities. It is our pleasure and privilege—Andover's teachers, staff, and alumni—to serve as guides on your quest.

Where will you go?

This week, next summer, 5 years, 10 years from now...

Andover students answer.

"To continue my studies and complete the puzzle."

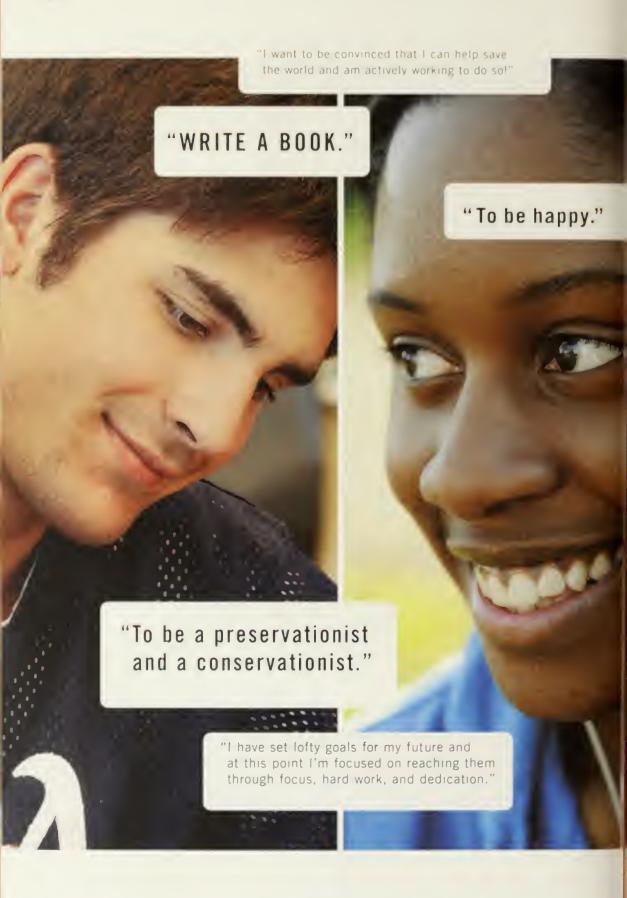

"I hope to be fluent in three languages and very well traveled."

"Investigative journalism."

"To take the road least navigable—the one I perceive to be the most adventurous, with the brightest light at the end of the tunnel."

COLLEGE MATRICULATION

AT-A-GLANCE

ADMISSION TO COLLEGE is not the only goal of an Andover education; it is the next important step in your life's journey. The college counseling office carefully guides uppers and seniors through the college admission process. Their goal is to help Andover students take charge of this important rite of passage and to provide them with the tools, the power, and the information they will need to make wise choices as they plan for their future.

GREETING FROM THE HEAD OF SCHOOL Barbara Landis Chase

In our contemporary world, there are few places that provide a strong sense of community to the people who live and work in them. Phillips Academy students and faculty have found just such a place. The author John Gardner writes, "The traditional community could boast generations of history and continuity. Only a few communities today can hope to enjoy any such heritage." Andover's 2,33-year history creates the kind of continuity that is, indeed, rare in American secondary schools or in institutions of any kind. We invite you to experience this community as you come to know Andover.

Andover was founded during the American Revolution on the principle that it would be open to "youth from every quarter" and with the motto *non sibi*, meaning "not for self." These ideals have created a culture of leadership and service that has endured for more than two centuries.

Foday, a \$16.4 million financial aid commitment makes those ideals a reality for 45 percent of our students. Our need-blind admission policy, instituted three years ago, means that financial need is not an obstacle to admission. Andover's commitment guarantees that the demonstrated need of each enrolling student will be met 100 percent. Given the continuing global economic pressures, we are especially proud to be among the very few institutions to support families in this comprehensive way.

Andover students do indeed come "from every quarter." In September, more than 315 new students will join our community from places including Colorado and Connecticut, South Carolina and South Dakota, Brazil, Scotland, Singapore, and Kazakhstan. They will be welcomed by returning students from California and Canada, Jamaica and Japan, Maine and Minnesota.

They will immerse themselves in activities rarely available at the high school level. Students may study the stars from the observatory of a state-of-the-art science center. They may master a world language such as Chinese or Russian or take part in a master class taught by a visiting scholar or performing artist. They may compete in national math or music events or act in a theatre production directed by a Broadway playwright. They may curate an art exhibition, host a radio program, join the Ultimate Frisbee team, or start a club with impact beyond Andover through microfinance. Perhaps they'll cover these activities as a reporter for the *Phillipian*, the nation's oldest secondary school newspaper.

In all this, students will be guided by faculty members who welcome curiosity and inspire greatness in their classrooms, educators who are accomplished authors, athletes, scientists, mathematicians, linguists, historians, musicians, and, above all, mentors to their students. To be sure that students get the most out of our rich academic and extracurricular offerings, we continually assess our academic program to ensure its breadth and depth, flexibility, and rigor.

The daily schedule allows time for advising and the development of critical reading and analytical writing skills. Teachers collaborate to create multidisciplinary programs that address the most challenging questions facing our global society. Seniors have the opportunity to design independent projects as a culminating academic experience. Each of these initiatives links directly to the singular visionary goal of our Strategic Plan, to educate "outstanding youth from every quarter by effectively challenging them to develop their potential and to depart as thoughtful, versatile, responsible participants in a global community."

Whether you visit the campus several times or come to know Phillips Academy only through this catalog and an interview, we hope the exploration will be an intriguing and enriching experience.

Welcome to Andover.

HISTORY

Phillips Academy, founded in rural New England during the Revolutionary War, speaks today to the richness of many traditions and is testimony to the dreams and aspirations, viable still, of its founders. Although it has been coeducational only since 1973, the recognition of the importance of education for both young men and young women was present at the beginning.

In 1778, Samuel Phillips and his wife, Phebe, made a "bargain." If she would move from Cambridge to Andover to help him in establishing Phillips Academy, he would afterward join her in founding an academy for girls. And so the commitment was made and the educational endeavor begun.

On April 21, 1778, the Constitution of Phillips Academy was signed. Both Samuel and Phebe Phillips died before her dream of a girls' school could be realized, but not before the dream could be handed on to willing hearts. In 1828, Phillips Academy trustees and other Andover residents met with Mme. Sarah Abbot to plan the school that would open its doors on May 6, 1829, as Abbot Female Academy, one of the first schools in New England to be founded for young women.

Each school in the years that followed remained faithful to the commitments made in its constitution: "to enlarge the minds and form the morals of the youth committed to its care." Each had a long and rich life and witnessed its students' growth, both in self-discovery and in service to others. And in 1973, Samuel and Phebe Phillips' bargain was realized anew as Phillips Academy and Abbot Academy merged and created a distinctive coeducational institution that combined the best of both traditions. "Finis origine pendet," the Academy seal affirms. The end does indeed depend upon the beginning.

THE ACADEMIC PROGRAM

Andover's academic program offers a strong and broad foundation in the arts, humanities, mathematics, and natural sciences. The Academy's extensive and rigorous curriculum, along with its flexible approach to teaching and individual development, not only prepares students superbly for college, but instills in them a lifelong love of learning.

Between the ages of 14 and 18, students make significant leaps in their cognitive development. Andover varies its teaching methods to suit these developmental stages and to present effectively the material and methods of inquiry specific to each discipline. Initial placement in math, science, and foreign language varies according to the level of accomplishment each new student exhibits upon arrival. Quickly paced introductory courses provide the structure and guidance necessary for young learners to build basic skills and to handle progressively more difficult material. At the same time, students who are exceptionally capable in certain areas of study are encouraged to enter the curriculum at advanced levels.

As students progress, they are presented with increasing choice so they may fashion a largely individualized program in their senior year. For advanced students, Andover provides extensive elective offerings, with courses beyond the college entrance level. Before they graduate, students may do research with recombinant DNA, study the calculus of vector functions, compose a major musical work, or direct a play.

Students also have the opportunity to participate in an increasing and evolving array of programs that span the globe. Current examples include service learning in the neighboring city of Lawrence; archaeology in Central America; and language immersion in Europe and China. Through these programs, as through our core curriculum, Andover strives to educate its students and faculty to understand the world *and* its challenges from a global perspective.

An open-minded perspective also informs Andover's approach to teaching. Our dynamic teachers reject the rigid orthodoxy of a single teaching method in favor of techniques that suit the material at hand. Students find themselves in small class discussions one day and in a group project the next; they conduct research, prepare and present demonstrations, and question guest lecturers; they think, write, compute, and experiment. In short, they learn to examine the world from many different points of view. The result is a vibrant program rooted in a philosophy of "learning by doing" that is constantly evaluated for its effectiveness. Our teachers debate pedagogy, review and adapt offerings, revisit syllabi, and integrate new technologies.

Mindful of our faculty's multiple talents and scholarship in their respective disciplines, the trustees and alumni of Phillips Academy have established a number of generous professional development funds to support term sabbaticals, year-long sabbaticals, summers abroad, and winter break opportunities. Faculty take these opportunities to develop new courses, conduct research abroad, study

1782

Paul Revere, known as the best craftsman of metals in Boston at the time, is commissioned to make the Phillips Academy seal. Around the symbol of a rising sun and a hive of industrious bees, he cast the educational faith of Andover's founders—"The end depends upon the beginning." The founders' religious and patriotic commitment to the common good is symbolized by the second motto on the silver seal, non sibi, meaning "not for self."

1789

President George Washington stops at Phillips Academy during his tour of New England. Washington addresses the school and holds an informal reception, which he attends on horseback. 1789

The first scholarships from John Phillips are recorded "in consideration of further promoting the virtuous and pious education of Youth."

across disciplines, author books and textbooks, and complete advanced degrees. They collaborate on research and projects as far away as India, South Africa, and China, or as local as Lawrence, Mass, Navajo or Pueblo reservations, or post-Katrina New Orleans. Driven largely by faculty mitiative, these projects illustrate tremendous ambition and innovation and ultimately inspire their teaching.

In their commitment to various fields of expertise, and in their eagerness to engage and guide students. Andover's 222 faculty members create a vital and interactive atmosphere in their class rooms, laboratories, or wherever their teaching takes them. They challenge their students, encourage mayiery of detail, and set high standards, while providing support and compassion to help students flourish. Indeed, it is this generous and spirited exchange among a community of learners that makes the Academy a special place for both faculty and students.

Academic Departments

See Course of Study for course listings.

Art department courses involve students in the creative process and help them explore artistic thinking. Students have the opportunity to investigate areas in depth on both the introductors and advanced levels. Loundation courses teach the skills necessary to create images and consider how elements such as line, shape, and color can communicate meaning. Exhibitions by faculty and visiting artists, along with the resources of the Addison Gallery and the Peabody Museum. nhance the studio experience. Students who wish to pursue veveral terms of art can choose from a range of introductory and advanced courses taught by a faculty of nine practicing arists. The Advanced Studio Art course offers uppers and seniors the opportunity to broaden their art experience at an advanced level, develop and enhance their art portfolios, document work for college admission portfolios, or prepare Advanced Placement (AP) portfolios.

CLASSICAL STUDIES

Four full-time members of the classics department teach courses in classical studies and in classical languages designed to provide students with a broad introduction to classical civilization through history literature, mythology, and etymology. Additionally,

through the study of Greek, the department offers students a direct entry into Greek literature. Students master the Greek alphabet easily in the first few class meetings and quickly discover that the poetic and expressive qualities of Greek language and literature stimulate the imagination and illuminate the early political and intellectual development of the Mediterranean basin

ENGLISH

The English department seeks to develop students skills in reading and writing.

In English 100. An Introduction, students begin to understand the rich relationships among reading. thinking, and writing. They develop their ability to read closely, actively, and imaginatively, and they practice several types of writing, primarily in response to what they read. Their work during fall term is assessed but not graded.

In English 200. Writing to Read. Reading to Write students study expository writing in the fall, poetry and short fiction in the winter, and a longer novel in the spring. Throughout the year, they study the relationships between form and content in both their own writing and the writing of published essayists. poets, short-story writers, and novelists.

In English 300. The Seasons of Literature, students study the literature of tragedy, comedy, romance, and satire and write about it in a variety of rhetorical

modes. In the spring they study Shakespeare. In the elective program, students are invited to select from among two dozen specialized courses each term.

DIVISION OF WORLD LANGUAGES

A faculty of 26 teachers in the Division of World Languages offers Andover students many choices. Ancient languages offered are Greek and Latin, the source languages of Western thought and literature. Modern languages offered are Arabic, Chinese, French, German, Japanese, Russian, and Spanish. Emphasis is on the spoken word, and the target language is the means of nearly all communication in the classroom. The learning of skills in the first two years leads to a third year of structure review and topical study in literature and civilization. With this foundation, many students choose to move into more specialized areas. At all levels of study, students supplement their course work with video and audio materials, computers in the Language Learning Center, and with such activities as theatrical performances, radio shows, cultural festivals, language tables in the dining hall, visits by performing groups, and occasional trips to special events in Boston and at nearby schools and universities.

Students interested in pursuing two languages should consult with the head of the division.

In upper-level courses, students can prepare for many Advanced Placement examinations and can qualify to take advanced courses when they enroll in college. Superior students may carry out independent projects under careful guidance, or they may enroll in a post-Advanced Placement course. All languages other than Japanese offer opportunities for acceleration. Note that Arabic is open only to 11th- and 12th-grade students.

HISTORY AND SOCIAL SCIENCE

The study of history and the social sciences is fundamental to a liberal education. An understanding of the American past continues to be vitally important for a participating citizen in a constitutional republic, though that alone is not enough. The examination of

other cultures is crucial for broadening our understanding of an interdependent world and, therefore, the study of international cultures is integrated throughout the department's program.

Courses in history in the junior and lower years emphasize major themes in world history and teach skills and concepts essential to the study of history and the social sciences, thus preparing students for more advanced courses in the field. In the upper year, most students study U.S. history. Seniors and qualified uppers choose from a variety of elective courses and research seminars, all of which challenge students to explore topics in greater depth and with increasing sophistication.

In all courses, students work individually and collaboratively, and write extensive essays, including research and policy papers, using government documents, newspapers, letters, diaries, and interviews—the raw materials of history. Students receive instruction as well as guidance from the department's faculty of 20 instructors.

MATHEMATICS

The 27 members of the mathematics department teach a curriculum built around a core sequence of elementary algebra, geometry, and precalculus. The department also offers many elective courses, including elementary and multivariable calculus, analytic geometry, probability, statistics, computer science, linear algebra, and vector analysis. More than one-third of all mathematics is taken electively, much of it in preparation for Advanced Placement examinations in calculus, statistics, and computer science.

The department, located in Morse Hall, is equipped with computers, graphing calculators, and computer projection equipment. Computer courses include introduction to computers and preparation for the Advanced Placement tests in Computer Science. Computer languages include Python and Java.

At Andover, the community of students who like math is sizeable. Many join the math team or the computer science team, both of which are spirited, challenging, and fun—and have ranked number one in New England in several prestigious competitions.

1825

Oliver Wendell Holmes, poet, literary leader, and doctor, graduates from Phillips Academy. Holmes immortalized Bulfinch Hall, "the classic hall," in his 1878 poem *The School-Boy*.

1827

"Do females possess minds as capable of improvement as males?" is the subject of the 1827 Philomathean Society debate. May 6, 1829

Abbot Academy, one of the first educational institutions in New England to be founded for young women only, opens its doors. Founded by Sarah Abbot, it has 70 girls in its first class. The school thrives and ultimately merges with Phillips Academy in 1973.

These students share their curiosity and knowledge with their peers and with a faculty of dedicated mathematicities who have written math textbooks and are at the forefront of curricular movements in the field

On weeknights, an evening math study centerproctored by faculty and peet tutors, is available to all

MUSIC

The niusic department faculty consists of time resident teacher performers, 35 adjunct instrumental teachers and one full time librarian. All faculty members are active performers in the Boston area, and most of them have graduate degrees in music. Instrumental lessons are available on all band and orchestral instruments and on the piano (classical and jazz), organ, harpsichord, harp, guitar (classical, folk, rock, and jazz), bagpipes, African drums, and voice.

Andover offers courses in all areas of music study and for all levels of students, and sponsors 60 to 70 student, faculty, and guest arrist concerts on the campus each year. The music building, Graves Hall, has three large teaching classrooms, a music library (recordings, computer lab, and scores), an electronic music studio. 19 practice rooms, and two large rehearsal spaces. Performances at Graves Hall take place in the recently renovated Timken Performance Room. Most of the concerts that involve large performing groups take place in Cochran Chapel. The basement of Cochran Chapel houses a fully equipped rehearsal room and a library of choral music, and upstairs is one of the department's treasures, a 30-stop, double-manual, tracker-action organ.

PHILOSOPHY AND RELIGIOUS STUDIES

The Department of Philosophy and Religious Studies veeks to initiate students into three fundamental and related human quests: the search for meaning, the search for justice, and the search for the foundations of knowledge. The department's courses provide an introduction to outstanding literature in each held of study and to the skills necessary for critical appreciation of that literature. The department faculty, who believe

that the distinctiveness, power, and universal features of a tradition can often be disclosed by a comparative focus, seek to help students become aware of the many voices that together inform religious and philosophical traditions. The department faculty also encourage students to engage actively in reflection on the personal significance of the questions they have chosen to explore. Thus, active class participation is an essential part of this process and of a student's grade.

PSYCHOLOGY

Fhe psychology department faculty consists of three doctoral level licensed psychologists and a licensed social worker who teach and provide psychological counseling services. We offer three elective courses (Introductory Psychology, Developmental Psychology, and The Brain and You) that examine the complexity and diversity of psychological inquiry, major theoretical perspectives, and the fundamental concepts in the field. All courses place an emphasis on helping students explore the relationship between psychological knowledge and personal growth in the context of a diverse social environment.

SCIENCE DIVISION

The program exposes students to a range of science that will enable them to be informed citizens and to pursue further study in those areas of science that interest them. The introductory courses provide a solid foundation for interdisciplinary or disciplinebased advanced work. Electives provide opportunities for students to place their scientific knowledge in a broader context and to explore topics that are rarely encountered in a secondary school science curriculum. In fulfilling the requirement of two yearlong courses, students work individually and in groups to become active, confident questioners, problemvolvery, and experimenters. The range of course offerings allows students, in consultation with teachers and advisors, to craft a program responsive to their interesty, abilities, and backgroundy.

BIOLOGY

Introductory courses give students a general background and an understanding of some of the current trends in biology.

Advanced courses permit students to study some topics in considerably more depth. The laboratory and field work in these courses give students experience with the techniques of chromatography, electrophoresis, spectrophotometry, statistical analysis, dissection, and genetic engineering, as well as qualitative and quantitative field analyses.

Students who love working in the laboratory and have completed a year of biology and chemistry are invited to join the laboratory research course, where they learn state-of-the-art genetic engineering techniques and apply them to independent research projects. This course provides a unique opportunity for advanced biology and chemistry students to work in close collaboration with a faculty mentor and peers in an informal laboratory setting. Some students use the course as a springboard to further summer research work and competitions.

CHEMISTRY

In the core introductory course of general chemistry, students explore the central themes of all chemistry: structure, kinetics, and thermodynamics. Within this framework, topics include atomic structure, stoichiometry, gases, solids, solutions, equilibrium, electrochemistry, and nuclear chemistry, among others. Interactive lectures, chemical demonstrations, and group work help students realize how these seemingly abstract ideas are an integral part of everyone's world. Computers and calculators (for graphing, data analysis, and audiovisual applications) are proving increasingly useful components in this endeavor. Investigative lab work enriches the way in which students explore chemistry and is a vital component of the program. Working alone and in groups, students probe the chemical world with a variety of tools, including top-loading and analytical balances, pH meters, and spectrophotometers.

INTERDISCIPLINARY SCIENCE

In addition to three term-contained environmental science courses that focus on the scientific, economic, cultural, ethical, legal, and aesthetic considerations affecting the environment, the science division offers several term-contained interdisciplinary courses, some taught in cooperation with other Academy departments.

PHYSICS

The physics department offers several introductory courses at various levels of difficulty. Courses cover topics such as mechanics, heat, waves, electromagnetism, light, and modern physics. The 16-foot observatory dome in the Gelb Science Center houses a research-grade telescope that can be controlled remotely with a computer. This facility enhances course work and project work. Recent projects include solar, lunar, and planetary study, astrophotography, computer simulations, and orbit analysis. The physics department is well equipped with laboratory and demonstration materials, equipment, tools, and supplies. Most yearlong courses include a significant laboratory component.

THEATRE AND DANCE

The Department of Theatre and Dance offers students diverse opportunities to develop skills in all aspects of performance and production. Although the department houses two distinct disciplines, theatre and dance, they share a mutual goal: to guide students toward an understanding of performance as a form of communication and expression.

The dance program offers pre-professional training that prepares students to enter college dance programs or conservatories, while also serving students who wish to take dance as a form of recreational and lifelong fitness. Students have the opportunity to study dance through academic, athletic, and extracurricular programs. Three levels of ballet and modern technique are offered exclusively through the athletic program, while choreography and performance opportunities are both curricular and cocurricular. The Andover Dance Group is our primary faculty-

1842

1852

The Teachers' Seminary at Phillips Academy becomes the English department and coordinates with the classics department. Calvin Stowe and wife Harriet Beecher Stowe arrive in Andover. He is a professor at the Andover Theological Seminary, and she has just finished writing *Uncle Tom's Cabin*. Harriet begins to hold social events that are criticized as leading to "dissipation for the students."

dire red performing ensemble, which consists of the most dedicated and gifted dancers. Other student run groups, include 1127, hip hop, and tap groups. To broad in the students, exposure to the dance world ach year, the department hires gifted artists ranging from local choreographers to residencies with internationally known choreographers and dancers.

His rhearre program is designed to educate studenis in the theory design, and practice of dramatic expression it preparation for their continued deselopment at the collegiate level. Our curriculum is Frounded in the study of drama through experiential featning, serving the pre-professional as well as those with no prior experience. Students have the opportuours to study acring, directing, costuming, scene design I ghting, public speaking, and playwriting as electise courses within our diverse course of study. We offer an extensive performance schedule through our play production elective course, resulting in three ta ulty directed shows a year. The theatre program also boasts dynamic cocurricular opportunities through Dramalabs, a series of student-directed one act plays produced every I riday night in our theatre

Dance and theatre performances are held in two fully equipped theatres. Steinbach Theatre four black box for lang Theatre (our mainstage theatre). Both venues feature flexible seating, computerized lights, and digital sound. In alternate years, a Department of Theatre and Dance production tours internationally. With six faculty-directed plays and dance shows per year in addition to more than 25 student-directed or choreographed shows, there are ample opportunities for everyone to be insolved.

Guidance and Support

COLLEGE COUNSELING

The College Counseling Office carefully guides appear and seniors through the college admission process. Counseling begins in the winter of the upper year with a series of meetings to outline the 18-month cycle and to explain and demystify the process. Each student is assigned to one of six college counselors;

the student and counse or meet first to review a ademic, personal and extracurricular histories and goals and then to identify criteria for the development of an initial college list. Individual and group meetings continue in the fall and winter of senior year, focusing on the refinement of the list and the details of the applications themselses. As partners in the process, parents receive periodic nesssletters from the College Counseling Office, are invited to on canpus programs on college admission, and are encouraged to share their ideas, insights, and concerns with their child's counselor. The College Counseling Office is committed to the proposition that finding good matches betsseen students and colleges is the key element of the college process. Andos er graduates choose colleges that cover a range of sizes, levels of selectivity, and locations. The Andover experience is valued by college admission committees at selective colleges, and many students compile records of accomplishment that make them attractive candidates at highly competitive colleges and universities. Stillcollege admission is increasingly competitive and there are no guarantees. Even students with impeccable college credentials may not be admitted to the most selective colleges and universities. The College Counseling Office's goal is to help Andover students take charge of this important rite of passage and to provide them with the tools, the confidence, and the information they will need to make wise choices as they plan for their future A list of college matriculations for the 2009 graduating class appears on page 83.

ADVISING AND SUPPORT SYSTEMS

At the heart of the Phillips Academy experience are student-faculty relationships. Many of these relation ships develop organically through day-to-day engagement in every venue of the campus with the shared enterprise of learning. Others are more structured to ensure that each developing adolescent is constantly offered the gifts of sustained adult attention and support. 1996 Steering Committee Report II.

For boarding students, the primary adult contact is a house counselor whose apartment is in the dormitory and with whom the student often forms a close

1854

The second of th

1865

Richard T Greener is the first Africal Amerial is destit grallatefil Pilips Acade y Class is 1265 He goes on to become the first black grallate "Harvard"

personal relationship. In addition, every Andover student has an individual advisor who helps design the student's course of study and extracurricular program and follows up with biweekly meetings. Together, the house counselor and advisor work to ensure that each student is challenged but also thriving, fully involved but not overwhelmed.

For ninth-grade boarding students, advisors are assigned by dormitory. When the ninth-graders move to upper-class dorms, they are assigned permanent advisors.

For ninth-grade day students and for all students who enter in grades 10 through 12, permanent advisors are assigned. The permanent advisor and student are paired until graduation, so their relationship grows as the years go by.

Additionally, every student has five or six classroom teachers, a cluster dean, and a coach or special activities supervisor (plus a college counselor for uppers and seniors) each term. These adults provide a network of support for every student at Andover. House counselors, day student advisors, and classroom teachers write to parents at the end of the fall and spring trimesters, and all Andover faculty members encourage parents to call or e-mail them with questions or turn to them for information about their sons' and daughters' progress.

EXTRA HELP

Classroom teachers are available for extra-help sessions during the morning conference period and at other times as well for those who need additional assistance. The Academic Skills Center meets with students individually to teach strategies for organizing work, managing time, and improving study skills. Tutoring in individual courses is provided through the peer tutoring program. Psychological counseling is available at the Graham House Counseling Center.

Evening study halls are available in each of the following disciplines: math—four nights a week; science—four nights a week; and writing—four nights a week.

FLEXIBLE PLACEMENT

Initial placement in math, science, and foreign language varies according to the level of accomplishment each new student exhibits upon arrival. Flexibility in course offerings permits those with particular ability in these areas to move forward at a pace that makes the best educational sense for them. As students progress, they are presented with increasing choice so they may fashion a largely individualized program in the senior year.

Resources

The school's endowment of approximately \$700 million (as of May 1, 2010) supports student scholarships and tuition, maintenance of the campus, academic programs, and the Academy's faculty. Among the school's resources are 598 dormitory rooms, 109 classrooms, an astronomical observatory, more than 200 computers, a video and electronic imaging center, language and music laboratories, a licensed radio station streaming audio online, 24 extensive science laboratories and classrooms in the Gelb Science Center, an 85-acre bird sanctuary, 35 art and music studios and practice rooms. a state-of-the-art theatre complex, three gymnasiums, a swimming pool, 18 playing fields, 18 tennis courts, two dance studios, an all-weather track, Phelps Stadium, and a state-of-the-art skating complex that features two skating rinks, dedicated locker rooms for both varsity and junior varsity hockey teams, a training room, and a heated viewing area.

THE ADDISON GALLERY OF AMERICAN ART

In 1930, when Thomas Cochran, Class of 1890, gave to the school the Addison Gallery of American Art, he wrote that he wished his gift "to enrich permanently the lives of the students of Phillips Academy by helping to cultivate and foster in them a love for the beautiful." Serving as both a nationally recognized museum and an educational resource for the school and the region, the Addison enriches the life of Phillips Academy and the community in many ways. The museum's holdings are world-renowned and include works by, among others, John Singleton Copley, Benjamin West, Thomas Eakins, Winslow Homer, James A. McNeill Whistler, Walker Evans '22, Edward Hopper, John Sloan,

1867

Shimeta Neesima leaves Japan for America as a stowaway on the ship Wild Rover. He is adopted by the shippowner, an Andover trustee, and takes on the name Joseph Hardy Neesima. In 1867 Neesima graduates from Phillips Academy, later from the Andover Theological Seminary. Neesima becomes the first Japanese to be ordained a Congregationalist minister. He returns to Japan and founds Doshisha University, now the largest private university in Japan.

1872

Modern foreign languages are introduced into the classical department.

1873

The *Courant* is founded as Abbot's history and literary magazine.

Vexander Calder Hans Hohnann, Georgia O'Keeffe, Robert Frank, Jackson Pollock, Frank Stella, 54, Jasper Johns, Andrews Wyeth, and Sol LeWitt

The Addison serves Andover's students and the public with 12 to 15 exhibitions each year drawing on the permanent collection but also mounting imporrant loan shows traveling throughout the world. Recently the museum presented lecommodating Nature The Photograph of Frank Gohlke, Carroll Dunham A Print Survey Lye on the Collection Views and Vieupoints, Birth of the Cool California Art. Deign and Culture at Midientury Class Pictures Photographs by Dawond Bey Ipsuid Days Arthur Wesley Dou and his Hometoun, and Angela Lorenz The Artist Book as Volume of Knowledge The gallery also sponsors an artist-in residence program that brings artists to Andover to create art and to work with students. Well known to connoisseurs, artists, art lovers, and scholars, the Addison is one of the great treasures of the American museum community

Reopening in spring 2010 after an addition and renovation, the Addison will be even better positioned to serve the needs of students, faculty, alumni, and the American art world.

THE OLIVER WENDELL HOLMES LIBRARY

The hub of Andover's intellectual life is the Oliver Wendell Holmes Library, named after the famous physician, poet, and wit who was a member of Phillips Academy's Class of 1825. The building contains the Academy's main collection of more than 130,000 printed books, supplemented by full-text electronic access to an additional 50,000 volumes. The collection also includes materials in the Text Exchange, a textbook loan program established to assist scholarship students and others by providing free access to textbooks. Home to more than 200 years of Phillips Academy archives and several Special Collections, the OWHL subscribes to 250 current American and world language serials. It provides access to thousands of additional journals through tul text electronic databases, receives several daily newspapers, and has an extensive microform collection. The Web-based OWHL catalog also provides access to materials at the Addison Gallery of

American Art. Brace Center for Gender Studies William B. Clift Music Library, Community and Multicultural Development (CAMD) library, and Robert S Peabody Museum of Archaeology Membership in the NOBII consortium provides access to the collections of 2" other academic and public libraries. Because of Andover's strong acidemic tradition, the library's mission includes responsibilits for reaching students how to effectively and efficiently retrieve and evaluate information in all for mats. The building, which features wireless Internet access, open stacks, seminar rooms, classrooms, and faculty research carrels, is open seven days a week for a total of 86 hours to support student and faculty study and research. A collection of laptop computers, e-readers, and digital audio devices is available for student use.

THE ROBERT S. PEABODY MUSEUM OF ARCHAEOLOGY

Founded in 1901 through the bequest of Robert S. Peabody (PA 1857), the Peabody Museum was established as a place for students to discover "sciences such as archaeology." During its 100-plus years at the vanguard of the development of American archaeology as a discipline, the Peabody Museum pioneered field techniques that included the use of carbon-14 dating, convened the formative meeting of the Society for American Archaeology, and served as a model for compliance with the Native American Graves Protection and Repatriation Act of 1990. Its approximately 600,000 objects, photographs, documents, and reference materials represent diverse indigenous cultures in the Americas and reflect more than 12,000 years of culture history. These collections support innovative curricula in history, biology. math, art, Spanish, and English, and provide community service and research opportunities for students. Human Origins, an interdisciplinary biology department/Peabody Museum elective, draws heavily on the Peabody's internationally recognized research collection and extensive hands-on educational materials.

The Peabody Museum sponsors two summer expeditionary learning projects. Pecos Pathways, a three-week cultural exchange between Andover stu-

THE BRACE CENTER FOR GENDER STUDIES

The Brace Center for Gender Studies, in historic Abbot Hall, provides resources for the study of gender issues, enhancing and strengthening Andover as a coeducational institution. The center sponsors lectures, films, and forums on adolescent growth and development and the influence of gender on individual achievement. It houses an extensive lending library of books on genderrelated topics. Each year, the center provides research grants to faculty and student fellows who present their findings in public forums. Presentations have included "The Historic Problems of the Japanese 'Company Man"; "The Role of NGOs in the Empowerment of Senegalese Women"; "Whatever Happened to Feminism? The Paradoxical Decline of Feminist Self-Identification Among Young Women"; and "Muslim Women as Leaders in the Modern World."

THE MONCRIEFF COCHRAN SANCTUARY

The Moncrieff Cochran Sanctuary is an 85-acre tract of rare beauty on the northern end of campus. Dogwood, azalea, rhododendron, and laurel provide a succession of bloom from late April to mid-June. Trails wind around two ponds and through extensive natural wild areas and are used all year long by hikers, bird watchers, cross-country runners, mountain bikers, cross-country skiers, and the Academy's Search and Rescue program.

Resources in Technology

Every student is provided an e-mail account, a private telephone line, a personal voice mailbox, and a PAnet account. PAnet, the Academy's Intranet, provides a virtual community in which students, faculty, and staff can share their works and ideas, and parents can keep abreast of campus life and access select information about their child. PAnet offers the Blackboard suite of products, which is used by most colleges and

universities. It includes such features as Internet access, online courses, streaming media, Web-based email, campus information and announcements, discussion groups, and online file storage.

Andover's state-of-the-art fiber optic computer network provides high-speed computer access to more than 85 academic, administrative, and residential buildings on campus. Network access is available to all students in their dormitories, as well as through the public Technology Learning Centers (TLCs) on campus, which house more than 200 computers and are staffed by professionals who provide assistance to students and faculty. A wireless network is also available in the Oliver Wendell Holmes Library, Paresky Commons, all academic buildings, and selected administrative buildings and dormitories.

THE PHILLIPS ACADEMY COMPUTER CENTER

The Phillips Academy Computer Center (PACC), located in the library's lower level, is the Academy's primary computing facility. Open more than 70 hours each week, the PACC is available to students, faculty, and staff for their individual use, while classes in nearly all academic subjects are held in the computer seminar rooms. An evolving hub of electronic technology, the PACC houses more than 90 Windows and Macintosh computers and contains a variety of other equipment, such as high-resolution scanners and high-speed laser printers. Technical staff members provide assistance to users, and handouts or software manuals are available as references for every software package.

THE FRANCES YOUNG TANG THEATRE

The Frances Young Tang Theatre in George Washington Hall is a highly sophisticated, 350-seat flexible courtyard theatre that can be reconfigured to accommodate proscenium, three-quarter, or arenastyle stagings. The theatre boasts a computerized light board and digital sound system and is complemented by a second "black box" theatre and a classroom theatre studio. The three theatres are supported by a large scenery shop, a costume shop, and two makeup and dressing rooms.

1878

In November, Andover plays its first football game against Exeter (and wins), beginning the long athletic rivalry between the two schools.

1893

Abbot Academy introduces college prep courses and strengthens the classical studies program. 1901

The required morning chapel begins at 7:50 a.m., a year's tuition is \$100, and a student can generally expect to pay about \$3 a week for food. Many students coming from a distance board with local families in the town of Andover for about \$4 a week

The Borden Gymnasium is dedicated

1902

THE AUDIO VISUAL CENTER AND KEMPER AUDITORIUM

The Audio Visual Center supports the Academy's 70 electronic classrooms, coordinates live webinar events (including Commencement and the State of the Academy presentation by the head of school), and loans students 60 digital video cameras and 75 digital still cameras in support of their art curriculum. Kemper Auditorium is a 215 seat state of the art the arte used for fectures, meetings, movies, concerts, and many other special events. The auditorium is equipped siith a high definition projection system, full surround sound, and a PA, system—all remotely controlled by a unified system.

THE POLK-LILLARD CENTER FOR VIDEO AND ELECTRONIC IMAGING

The Polk Lillard Center for Video and Electronic Imaging is capable of importing, creating, manipulating, and exporting professional graphics and state-of the art electronic imagery. Students have access to 47 Macintosh computers, as well as color printers, scanners, software packages designed for photo manipulation and processing, digital camcorders, nonlinear professional editing systems, and digital cameras.

THE LANGUAGE LEARNING CENTER

The first fully digital facility in the country, the language learning Center has served the students and faculty of the Division of World Languages since 1996. On the leading edge of educational technology, the center delivers interactive instruction in seven languages. Students use film, sound, text, and the Internet to enhance their language learning. Many of the materials in the LLC have been created by Andover teachers, and consequently are tightly integrated with our curriculum and approach. Students often use technology to produce their own projects, from research papers to presentations to films.

THE WILLIAM B CLIFT JR MUSIC LIBRARY

The William B. Clift. Ir. Music Library's enormous collection of classical, rock and roll, blues, 1277, reggae, country, and hip hop music, plus musical scores, sound effects CDs, comic routines, and much more, is available to the entire campus. With the center's integrated MIDI keyboards and computer technology, students are also able to compose and resise original musical pieces.

Off-Campus Programs

Several outstanding off campus programs are available to Andover's students. Phillips Academy turtion, fees, and financial aid, however, do not necessarily cover the full cost of these programs.

SCHOOL YEAR ABROAD

School Year Abroad, an independent program under the aegis of Andover, Phillips Exeter Academy, St. Paul's School, and 23 other independent schools, offers to qualified uppers and seniors a full academic year of living and studying in China, France, Italy, or Spain. A new program in Vietnam begins in the fall of 2009. While abroad, students live with host families, participate in the activities of local athletic and social clubs, and pursue a course of study (both in English and in the local language) under the supervision of teachers from Andoser and other member schools and native teachers. School Year Abroad offers travel and all college testing and provides full academic credit, permitting students to graduate from Phillips Academy south their own class. Andover students who seish to participate must consult with their advisors or the dean of studies. Financial aid is available. School Year Abroad now also conducts summer programs in China and France. For more information, please call School Year Abroad at 978-725-6828.

SUMMER LANGUAGE PROGRAMS ABROAD Summer Study in Modern Languages

The Academy has instituted a program to support scholarships for four- to eight-week summer in-country immersion programs for 20 to 25 students per summer. Only continuing students are eligible for this support.

Outreach Programs

In its tradition of service and leadership and as an integral part of its mission, Phillips Academy commits its institutional resources to provide programs both on the Andover campus and in the broader world of education to constituencies beyond those served through its core academic program.

Andover's outreach initiatives have evolved over the last three decades as distinctive programs in the advancement of education.

ANDOVER BREAD LOAF WRITING WORKSHOP (EST. 1987)

Summer workshops and year-round networking and education for public school students and teachers to enhance literacy and improve the teaching of writing. National in reach, with Lawrence, Mass., as its base, Andover Bread Loaf also involves tutoring by PA's community service students.

INSTITUTE FOR RECRUITMENT OF TEACHERS (EST. 1990)

An intensive four-week summer program, plus yearround mentoring, that prepares rising college seniors and recent graduates from diverse communities for graduate school and teaching careers in schools and universities.

(MS)²: MATHEMATICS & SCIENCE FOR MINORITY STUDENTS (EST. 1977)

An intensive three-summer math and science enrichment program for talented and economically disadvantaged African American, Latino, and Native American public school students.

PALS PROGRAM (EST. 1988)

A two-year summer and winter program for Lawrence, Mass., middle school students. Provides enrichment in math, language arts, and sciences, with mentoring by members of PA and Andover High School community service programs.

Summer Session

THE PHILLIPS ACADEMY SUMMER SESSION

The Phillips Academy Summer Session offers its students academic and personal growth in a rigorous precollege setting. It provides demanding classes, invigorating afternoon activities, engaging trips to colleges, cultural and social activities, and comfortable dormitories that prepare students for collegiate residential life. More than 60 courses are offered in literature and writing, the visual arts, music, languages, computer science, mathematics, the natural sciences, philosophy, the social sciences, and English as a second language. The average class size is 14. Applicants must be graduates of the seventh, eighth, ninth, tenth, or eleventh grade with a strong school record and a serious desire to spend the summer in challenging, disciplined study. Financial aid is available. Phillips Academy students may enroll in summer enrichment classes. Please call or write:

The Phillips Academy Summer Session Phillips Academy 180 Main Street

Andover, MA 01810–4161 Telephone: 978–749–4400 E-mail: summer@andover.edu

William Wegman Artist and photographer

STUDENT LIFE

What makes Andover such a terrific place? The students—their energy, their optimism, their willingness to learn new things, and their varied backgrounds.

Students come to Andover from Brooklyn and Beijing. Some are conservative, while others are liberal. They represent a variety of religions and cultures. We have students with special talents in areas ranging from math to theatre and from sports to music; some arrive with demonstrated abilities in all areas, but many develop new interests while they are here. Our multifaceted adult community offers Andover students the opportunity to meet others who can share their interests and appreciate their strengths while providing useful advice when they need it.

The school's cluster system, combined with our academic and psychological counseling services, our Office of Community and Multicultural Development, our chaplains and our health center, enables Andover to provide extensive opportunities for support and guidance. We offer a rich residential curriculum of programs dealing with such issues as health and wellness, interpersonal relationships, drug and alcohol use, human sexuality, and racism. We also take care to maintain a low student-faculty ratio in the dormitories so house counselors can oversee their young charges while collaborating with each student's advisor as needed.

Andover's goal is to bring to campus talented students "from every quarter" who can enjoy the advantages of its size while at the same time feel adequately supported and part of the community.

DAILY LIFE

Andover operates on a trimester system. The year begins in early September and ends in June, with breaks in December and March. Students normally have four or five class meetings per day. Classes are held on Monday through Friday, with shortened class days on Wednesday morning and classes on selected Saturday mornings in the fall and spring terms. Classes do not meet on Sunday.

The weekly schedule provides time for independent study, rehearsals, and sports, for informal visits to the museums, and for extracurricular activities. Students participate in athletics at least four afternoons a week; in addition, interscholastic competitions are held on Wednesday and Saturday afternoons.

All students also spend about two hours each week in the school's work program, which is designed to instill a sense of community responsibility for the daily operation of the school, to remind students of the practical elements of life beyond academia, and to

help the school reduce its operating costs. Students share the jobs of cleaning the dormitories' hallways and common rooms and helping in classrooms, offices, and laboratories.

THE CLUSTERS

The cluster system is the heart and soul of Andover's community life. Clusters create the personal atmosphere of a neighborhood in which people get to know each other through living together and sharing in cluster functions.

The dean of students oversees the five clusters, each of which is supervised by a cluster dean who knows all the students in the cluster, works closely with student leaders, and is available to students and parents for information and advice. Clusters do not affect students' classes, their extracurricular activities, or interscholastic sports, but student orientation, intramural sports, weekday social functions, Blue Key spirit activities, and disciplinary procedures are all organized by cluster.

1932

Cochran Chapel, given by Thomas Cochran, Class of 1890, is built, and then extensively renovated in 1998.

1933

Claude Fuess becomes the 10th headmaster and brings about curriculum revisions, emphasizing breadth and variety. four years of history are required in order to increase an awareness of the Western world; four years of science are required; and art and music appreciation courses are added to the curriculum.

1940

In the mid- to late 1940s war-related courses are added to the curriculum, including navigation and meteorology.

1942

The Andover Summer Session is inaugurated under the direction of Wilbur J. Bender, with the participation of 197 boys.

HOMEWORK

Academic course work is intensive and involves about 20 to 25 hours of outside of class preparation each wisk. On nights before classes, formal study hours begin at 8 p.m., at which time students must be signed in to their dormitories of an academic area on camput. By 10 p.m. (9.30 p.m. on Sunday and fluir day), students must be studying in their dormitories and signed in for the night.

Despite the amount of time that must be spent on academic pursuits, most students become involved in extracurricular activities and social events. By allowing students to make some choices about how they spend their time, Andover encourages independence and personal responsibility.

ALURRICULAR ACTIVITIES

Extracurricular activities are an important aspect of a student's education, and Andover offers a rich fare, thanks to the range of interests among the student body. In fact, there is no limit to the variety of organizations or the enthusiasm of their members. Students who do not find an existing club or organization that meets their needs are encouraged to start one.

DOMMITORIES

Boarding students live in boys or girls' dormitories with house counselors and their families. The dormittories vary in size, housing from four to 43 students. One faculty family is in residence in the smallest dormitories large dormitories have as many as four faculty residences. All living arrangements encourage close relationships among students and between students and house counselors. Parents can easily keep in rouch with students. Each boarding student has a private telephone with votce mailbox as well as an e-mail account and in-room high-speed Internet access. Day students have e-mail accounts and voice mailboxes. All students can receive U.S. mail and package delivery through their student mailboxes in George Washington Hall. One-third of the boarding students live in single rooms, two-thirds in double rooms Because students benefit from knowing in inbers of all classes, most dormitories bouse low retippers, and seniors. Juniors, the youngest students benefit from extra supervision and guidance and of live together in dormitories with special study and lights-out policies.

NINTH GRADERS JUNIORS

Andover's ninth graders (juniors) enjoy the support of an academic and residential program specially crafted for their class. A coordinated approach per mits classroom teachers, house counselors, and advisors to confer and plan as they address these young students' needs and encourage their growth. Each junior day student is assigned to a faculty member who serves as the student's advisor throughout the student's Andover career, providing continuity and support as the student marures. Junior boarding students live in designated junior dormitories with house counselors who monitor their progress carefully and with upper or senior prefects who have been selected because they are role models for good study habits, self-confidence, and community spirit. For ninthgrade boarding students, advisors are assigned by dormirory. At dormitory meetings, juniors explore topics ranging from study skills and time management to community living and goodness, that help Andovers youngest students adjust to living away from home With this foundation beneath them, junior boarding students move in the tenth-grade year to upper grade dorms where, along with a house counselor, each is paired with a permanent faculty advisor who sees him or her through the Andover career.

MEALS

Meals are served in Paresky Commons, a central dining hall comprised of four handsome, traditional dining rooms and two modern serving areas. Several entrees, a pasta bar and salad bar, and homemade bread and soup are available daily. The cost of meals is included in the tuition of both boarding and day students.

RULES AND DISCIPLINE

Honesty and respect for self and others are principles that guide expectations for interactions among all members of the Andover community. The *Blue Book* outlines behavioral guidelines, policies, and rules. Students should know and comply with these rules.

When a student violates a school rule, a hearing is conducted by a disciplinary committee made up of members of the student's cluster. In this way, faculty members and students most familiar with the student investigate the infraction and determine an appropriate disciplinary response. We believe developing adolescents can learn from their mistakes. Therefore, we practice a second-chance system that allows students who commit a major rule violation to remain at school so long as they demonstrate a willingness to follow rules in the future. However, serious offenses involving a student's integrity or social offenses that threaten the well-being of individuals or the school community may lead to immediate dismissal.

WEEKENDS

Social events during the week are limited by the demands of the academic program, but the weekend program on campus is exciting and varied. Weekend activities include theatre and musical performances, dances, concerts, coffeehouses, lectures, movies, art exhibitions, plays, and informal activities. Day students may attend all of these events and are permitted, with their parents' and the house counselor's permission, to sleep over at a friend's dorm; similarly, boarders, with proper permission, may sleep over at a day student's home.

DRESS CODE

Andover does not have a formal dress code, but students are expected to be neat and clean and to dress appropriately for each occasion.

RESIDENTIAL EDUCATION AND SUPPORT

Andover takes seriously its responsibility to help students maintain a healthy lifestyle and has developed several specific programs to address alcohol and drug use, human sexuality, nutrition and body image, and many other issues that concern young people today. Some of the programs are required, some are voluntary; all are for boarding and day students alike.

We offer a rich personal and community education program (known as PACE) as a complement to our outstanding academics. PACE is a developmentally sequenced array of classes, presentations, and discussions that address topics pertinent to the social and psychological development of adolescents. Included in the PACE curriculum are citizenship, peer mentoring, and programs for juniors; a PACE Seminar to develop in 10th-graders the skills and insights necessary for living successfully in a pluralistic society and global village; and programs for uppers and seniors that focus on transitioning to adulthood and gaining skills necessary to succeed beyond Andover. Additionally the PACE curriculum provides programs on HIV/AIDS awareness, alcohol and substance abuse prevention, respect, responsibility, boundaries in relationships, and health and wellness topics including sleep, nutrition, and stress.

Students also attend Martin Luther King Jr. Day seminars in January and Wellness Week education workshops in November.

The Brace Center for Gender Studies, the Women's Forum, and the Date Rape Prevention Team offer programs to educate the community on gender issues. Those wishing to explore the issues of diversity can join CAFE (Community Awareness for Everyone). Other student-run organizations and support groups deal with such issues as body image, the aftermath of divorce, and standing against drugs and alcohol.

ISHAM HEALTH CENTER

Phillips Academy employs a full-time physician/medical director who is board-certified in pediatrics and pediatric endocrinology, a licensed nurse

1955

late 1950s

1964-1965

The Russian language is first taught at Phillips Academy.

With the realization that some material being taught at Andover is repeated when students enter college, Advanced Placement credit begins at Phillips Academy with a chemistry course and a fifth-level French class.

In response to a national teacher shortage, the Andover Teaching Fellow Program is inaugurated to recruit and train young men for the teaching profession.

The decision is made to admit the best 250 candidates regardless of their ability to pay tuition. Phillips Academy's enrollment increases to more than 800 students. The Search and Rescue Program, an outdoor activity course involving kayaking, mountain hiking, climbing, rafting, and first-aid skills, is introduced. This innovative program becomes a model for Outward Bound USA.

prictition is and a full complement of registered naises to staff Isham Health Center. The center is an 18 hed receised hospital and is open 24 hours a day while school is miscosion. Services provided by Isham is culd lab work and X rays, a pharmacy, mitrition onlisching with a registered dictitian, and scheduled unites for orthopedies sports medicine, dermatology, and psychiatry. The Isham staff maintains close association with approximately 60 medical surgical, and dental special six in the Andover and Greater Boston on numities who are readily available for consultation. Tham Health Center also welcomes requests for follow up and continuing care from students home physicians.

THAM HOUSE COUNSELING CENTER

The Counseling Center, located in its own building on Wheeler Street directly behind Cochran Chapel, his two primary roles to serve the individual psychological needs of stridents, faculty, and staff and to foster the psychological health and well being of the Phillips Academy community. The Counseling Centers services include individual and group councling, psycho-educational programs, specialized trining programs, and consultation services to parents, teachers, and departments. All services are provided without charge. Appointments may be scheduled through the Graham House secretary 0, 8-749-4360 or through an individual counselor. Drop in visits are also welcomed.

THE LAMPIS MIN STRY

The aim of Phillips Academy's interfaith ministry is to respond to the spiritual needs of the Andover community. The chaplainey, led by the director of spiritual and religious life, is comprised of representatives from the Jewish, Protestant, and Roman Catholic traditions.

Each of our religious communities gathers weekly for both worship and fellowship. Student faith associations—it clinding the Andover Christian Fellowship, the Cathouc Student Fellowship, the Hindu Student Union, the Jewish Student Union, the Muslim

Student Union, and the Andover Interfach Council provide an opportunity for students to deepen their faith through study discussion, and service All of these activities are voluntary and open to all members of our community

The chapel also organizes services and programming for major religious holidays such as Ramadan, Yom Kippur, and Laster, in addition to marking important secular holidays. Fhrough our commiment to all traditions of faith we hope to promote both interfaith dialogue and spiritual development

OFFICE OF COMMUNITY AND MULTICULTURAL DEVELOPMENT

In keeping with the school's Statement of Purpose, the mission of the Office of Community and Multicultural Development is to raise awareness and encourage understanding of differences of race, ethnicity, religion, gender, socioeconomic class geographical origin, and sexual orientation. The office sponsors workshops, lectures, and educational programs for the cuttre Phillips Academy community and contains a small library and reading area. The dean, student advisors, and program coordinators provide support to individual students and student groups. Additionally, the office coordinates professional development opportunities for faculty and promotes mentoring programs.

Learning takes place differently for each person within this complex and diverse community. Students and faculty benefit from attending our many organized cultural celebrations, lectures, and workshops throughout the year. Sometimes the most meaningful learning comes in informal conversations sparked by current societal issues. CAFF (Community Awareness for Everyone) provides an open forum for students and adults to gather and engage in cross-cultural dialogue.

Students learn that through investigation and greater understanding of experiences outside their own they are better prepared to come to a greater understanding of themselves. We have an obligation to assist in their awareness of an ever-evolving world and the role they can play in making a difference-

MESSAGE FROM THE DEAN OF ADMISSION Jane Foley Fried

Welcome to the adventure of the secondary school admission process—a journey that will ask you to look hard at yourself and your dreams, and where they best may be realized.

Consider all you have accomplished so far—the academic classes you have taken, the service you have performed in your community, the sport or art you've worked at so hard, the moments when your family and friends needed you and you gave of yourself. Where will it lead you?

What are your current interests and what might interest you that you have never even considered before? Who will you become and what will help you to develop your talents, knowledge, and experience? What are your dreams and how will you achieve them?

Those questions become increasingly relevant as you consider leaving your home or your hometown school for a boarding school.

We are delighted you have taken an interest in Andover. This historic school is known for the breadth and depth of its curriculum and cocurriculum and for the enormous variety of experiences we offer. It is also known for helping its students develop independence, appreciate diversity, and become leaders—all increasingly important qualities in today's complex world.

The faculty and students here have gathered from cities and suburbs and towns and villages all over the world to pursue their dreams together. Our campus is expansive, but our residential "cluster system" of neighborhoods provides the support found in schools a quarter of our size.

Andover welcomes applications from high school-aged students from all grade levels. Each year, we enroll approximately 200 ninth-graders, 75 tenth-graders, 20 eleventh-graders, and 30 one-year seniors (twelfth-graders and postgraduates).

As Andover is unique, so will you find this catalog. The main section gives you impressions—in students' own words and in photographs—of who we are in our diverse and multifaceted selves, as well as how and where we learn, live, play, and grow together. In this section are facts and figures to help you navigate all of the exceptional components that comprise an Andover experience. The enclosed *Course of Study* contains detailed descriptions of all academic courses and a list of all faculty.

We take great pleasure in introducing you to Andover as we anticipate the great pleasure of learning more about you. To begin the admission process, please complete the Candidate Profile online at www.andover.edu/admission. Next, schedule a personal interview at the Shuman Admission Center on Salem Street. For students who cannot visit campus, a complete list of alumni admission representatives is available online at www.andover.edu/admission.

1973

1973

A student penned this verse and posted it to a door the day of the SAT test. I think that I shall never see A waste quite like an SAT. An SAT is just a test to find which people guess the best. With paragraphs of boring lore penned before the Civil War. I think erosion is to rocks... and blackened in the proper box. For un-computer types like me such nonsense is an SAT. Poems are changed by fools like me but God would blow his SAT.

1977

The Phillips Academy Cantata Choir and Chamber Orchestra come into existence under the direction and guidance of William Thomas and begin making spring tours. Past tour destinations have included Belgium, France, Italy, England, and many cities in the United States.

ADMISSION AND FINANCIAL AID

The school's constitution, written in 1778, states that Andover "shall be ever equally open to Youth of requisite qualifications from every quarter". With this principle in mind, the basic requirement for admission to Andover today continues to be evidence of sound character and strong academic achievement. The school is especially interested in candidates who demonstrate independence, maturity, and concern for others in addition to high performance in studies and activities. Valuing diversity in its student body, the school seeks to bring together a community from all parts of the country and from intany nations.

The school's endowment covers approximately one-third of the cost of an Andover education. Therefore, in fact, every student receives financial and. In addition, because of the generosity of a large number of alumni, parents, and friends, Andover's admission process is need blind—financial and is not an obstacle to admission at Andover. (See Financial Aid and Financial Aid Planning, page 109.)

Application Procedures

Priority will be given to day student candidates who complete the application and interview by January 15, and to boarding candidates who complete the application and interview by February 1. A decision from the Admission Committee will be mailed on March 10. The possibility of admission is considerably lessened for all applicants who complete the process after the stated deadlines, and decisions for this group may not be rendered before May 1. A deposit of \$2,000 is required to reserve a place at the time admission is offered to an applicant. If you have questions about Andover's admission or application procedures, please call or write.

Office of Admission

Pholips Academy 80 Main Street Andover, MA 01810-4161

Admission office direct line: 978-749-4050 Academy switchboard: 978-749-4000, ext. 4050 Admission office e-mail: admissions@andover.edu Academy Web site. www.andover.edu

Office hours: Monday through Friday, 8:30 a.m. to 4:30 p.m., designated Saturdays, 8:30 a.m. to noon. September 25 through January 15.

RESIDENTIAL STATUS: BOARDING AND DAY

The decision to be a boarding or day student is a one time-only choice. Admission counselors are happy to assist families in making this decision in advance of the application deadline.

Families are urged to consider carefully all aspects of each option, including transportation, hnances, accessibility to the variety of on-campus activities, and the relative merits of living at home versus school residence for the student. Please understand that awards for financial aid candidates who live in day student towns are always based on the day student tuttion.

Students residing in Andover or North Andover must apply as day students. Applicants from the following Massachusetts cities and towns have a choice: Boxford, Bradford, Dracut, Georgetown, Groveland, Haverhill, Lawrence, Lowell, Lynnfield, Methuen, Middleton, North Reading, Reading, Tewksbury, and Wilmington, and also Atkinson, Pelham, Plaistow, and Salem, N.H.

Candidates living outside our day student area but intending to move before September to a day student town should discuss the situation with an admission counselor, apply as boarders, submit a letter of intent to the admission office prior to the application deadline, and notify the admission office when the move is completed. At that point, such candidates will be changed to day student status. Current students who move to either Andover or North Andover will be required to become day students.

FIVE STEPS TO BE COMPLETED FOR APPLICATION

Candidates are strongly encouraged to review the most up-to-date application instructions located at www.andover.edu/admission under the "How to Apply" navigation link.

1. Become a Candidate for Admission

Fill out the Request Information form at www.andover.edu/admission or call 978-749-4050 to request a catalog.

2. Complete the Candidate Profile

To begin the application process and receive admission materials, complete the Candidate Profile located at www.andover.edu/admission and submit the nonrefundable \$30 fee (\$60 for international students). The Candidate Profile should be submitted well in advance of the stated application deadlines. An applicant file will not be created until the Candidate Profile is received. Fee waivers are available.

3. Schedule a Personal Interview

Day student candidates must complete their interviews by January 15 and boarding candidates by February 1. Candidates are encouraged to schedule interviews in either the spring, summer, or early fall of the year before they intend to enter. It is in everyone's best interest for the interview to take place as early as possible. A visit to the Academy is desirable, as it gives candidates a chance to have questions answered and see the school.

If a candidate or a member of the candidate's family needs disability-related accommodations, please notify the admission staff at 978-749-4050 in advance of scheduling an interview so we can make appropriate arrangements. Please allow two hours for the tour and interview, and be sure to dress with the weather in mind. After the interview, candidates and their families are welcome to walk about the campus, visit the Addison Gallery of American Art, or watch games and practices. Candidates who cannot visit the Academy are themselves responsible for arranging an interview with an alumni admission representative. Alumni admission representatives are listed on our Web site. We do not conduct telephone interviews.

4. Return the Final Application Forms

Final application forms should be completed and submitted as soon as final grades are available for the fall term. The transcript must include current grades for the application to be complete. Priority consideration is given to day student applications submitted by January 15 and to boarding applications submitted by the advertised deadline of February 1. (Candidates who apply after February 1 should return forms immediately.) Teacher recommendations should be from current teachers. We cannot accept any application forms by fax.

5. Take the Appropriate Standardized Admission Test

Applicants for grades 9 or 10 submit either the Secondary School Admission Test (SSAT) or the Independent School Entrance Examination (ISEE). You can register for the SSAT at www.ssat.org and for the ISEE at www.erbtest.org.

Applicants for grade 11 submit either the SSAT, ISEE, SAT, or PSAT. Applicants for grade 12 or a post-graduate year submit either the PSAT, SAT, or ACT.

Whenever possible, international students for whom English is not the primary language also should submit the Test of English as a Foreign Language (TOEFL).

The TOEFL, SSAT, and ISEE must be completed during the academic year in which an application is submitted.

INTERVIEWS WITH ALUMNI

REPRESENTATIVES

While it is advisable from the student's point of view to visit Andover, distance frequently renders a visit impractical. When this is the case, the candidate should e-mail or telephone the most conveniently located alumni admission representative (AAR) and arrange for an interview. After you arrange for an interview with an AAR, please notify the Andover admission office of the date of the interview and the name of the interviewer. This procedure will help us keep your records up to date. To find an AAR near you, please refer to the online list at www.andover.edu/admission.

1986

到村

Headmaster McNemar and the chief of foreign relations for the Soviet Ministry of Education sign an exchange program with the Novosibirsk Physics-Mathematics School in Siberia. The program, the first of its kind for high school students anywhere in the United States, begins the following fall. Later in the decade, Nobel Laureate and peace activist Andrei Sakharov (left) visits the Academy.

1994

Barbara Landis Chase becomes the 14th head of school, the first woman to hold the position

"Our students will need courage and compassion, a sense of balance and of humor, a commitment to work and to their families, a sure sense of themselves and a deep commitment to the community. They will need knowledge and goodness."

—Barbara Landis Chase Investiture Address

SECONDARY SCHOOL ADMISSION TEST

The 2010–2011 Student Registration Information Brechare published by the Secondary School Admission Fest Board, Princeton NJ 08540, will be soft by Andover to all candidates. This brochure describes the Secondary School Admission Fest, which will be given on the following dates:

October 16, 2010*	Lebruary 5, 2011
November 13, 2010	March 5, 2011
December 11, 2010	April 9, 2011
January 5, 2011	June 11, 2011*

"1 \ Canada sites only

Candidates are strongly urged to take the SSAI administered in either November or December 2010. Otherwise, candidates should take the January 2011 administration.

TWELFTH-GRADE OR POSTGRADUATE CANDIDATES

In tead of the Secondary School Admission Test, sentor and postgraduate candidates must take either the Preliminary SAF or the SAF Reasoning Test of the College Board. Prospective students may register online for the PSAF and SAF at www.collegeboard.com.

Postgraduates are full-fledged members of the senior class and are eligible for all school activities. Because of their academic credits, they frequently have maximum flexibility in course selection.

EARLY DECISION

Andover does not participate in any early decision plan for admission.

School Costs and Affordability

TUITION AND FEES

The tuition for 2010–2011 is \$41,300 for board instudents and \$32,200 for day students. The averagannual cost to educate a student at Andover is morthan \$70,000. The difference between the annual cost and the tuition charge is made up from gifts and income from endowment, which are the products of the generosity of a unini, parents, and friends. For reserve a student's place for a given school year, a non-refundable deposit in the amount of \$2,000 must be received by the acceptance deadline. April 10, in the case of a newly admitted student, or by May 1 in the case of a returning student. The deposit will not be refunded under any circumstances.

The tuition, less the above deposit, is billed in two equal amounts, with half the tuition and fees due July 15 and the final payment due December 1. The award of financial aid scholarship or loan reduces the billed amount accordingly.

An optional Tuttion Refund Plan is offered, at 2.5 percent of tuition, to protect against the departure of a student for any reason. Under this plan, 65 percent of the unused portion of the tuition for school days remaining is refunded (excluding the \$2,000 non-refundable enrollment deposit and any financial aid scholarship grants).

Unless the Tuition Refund Plan has been pur chased, no tuition refund will be made for any student who withdraws, is dismissed, or is absent for any reason after registration.

The And er are a team of viein a again Exerer of ic Dobe by Fern Coperation No. Y

Tuition covers instruction, board, room (including basic furniture), physical training and most athletic privileges, use of laboratory equipment and material, and admission to all authorized athletic contests and most authorized entertainment at George Washington Hall or elsewhere on campus, including the Saturday evening movies.

The school provides sports uniforms and most athletic equipment. Students are required to bring their own footwear and are urged to bring whatever other personal athletic equipment they already possess.

OTHER EXPENSES

Tuition does not include a technology fee, materials for art courses, medical expenses and insurance, telephone charges, textbooks, laundry, school supplies, or breakage and/or damage to school property. Typically these expenses total about \$2,400 per year. Tuition does not cover private music lessons or the cost of participation in School Year Abroad or other off-campus programs.

Bills for items not included in tuition charges may be rendered at any time during the school year. All charges must be paid by their due date in order to assure a student's place at the Academy. Students with past-due bills may be asked to leave at any time. The diploma of the Academy will not be awarded to seniors whose school accounts are not paid in full by June 1.

Financial Aid and Financial Aid Planning

Financial need should never discourage a student from applying to Phillips Academy. Andover awards financial aid under a need-blind policy and offers grants for low-, middle-, and upper-middle-income families. Andover meets individual family need with grants; no student loans are awarded. To help all Andover families with financial planning, the school has created the Andover Plan, a package of payment options.

Because Andover values and seeks an economically diverse student body, aid is awarded only on the basis of demonstrated need. Full scholarships are awarded based on a comprehensive analysis of need, not a predetermined gross income. Need depends on many variables, such as family income, number of children, age of parents, other tuitions, unusual medical expenses, taxes, assets, liabilities, and so on.

Phillips Academy Financial Aid 2010-2011

Operating Budget: \$16.4 million
Financial Aid Scholarship Grants: \$15.3 million
Student expenses: \$1.1 million
Average grant for returning students: \$32,000

The best way to find out if you qualify for financial assistance is to apply.

NEED-BLIND POLICY

The 2010–2011 incoming class represents the third to be admitted under Andover's new need-blind policy, which removes financial need as an obstacle to admission. Andover's commitment also guarantees that the demonstrated financial need of each enrolling student will be met 100 percent with financial aid grants. Andover is proud to be among the very few institutions to support students in this comprehensive way.

1998

Andover celebrates the 30th anniversary of the school's African-Latino-American Society and the 25th anniversary of coeducation on campus.

April 24, 1999

Andover kicks off Campaign Andover, the largest fundraising drive in secondary school history, to raise \$200 million in support of scholarships, salaries, technology, resources, and campus improvements.

May 1999

Andover's Robert S. Peabody Museum of Archaeology takes part in the repatriation and reburial of sacred artifacts and the remains of about 2,000 Pecos Indians exhumed during an expedition led by Andover archaeologist Alfred V. Kidder from 1915 to 1929. It is the largest reburial of human remains to ever take place in the country.

TO APPLY FOR FINANCIAL AID

- 1. When filling out the Candidate Profile (located on the parents should check yes for financial aid
- 2 As pert of our campus wide effort in environmental sustainability, the financial and application is now paperless. Please visit the National Association of Independent Schools NAIS) Web site at www.sss.nais.org.after November 15 to fill out the Parents. Financial Statement (PLS) online. NAIS's School & Strideni. Services (SSS) uses a formula nationally accepted among independent schools to analyze need and provides Andover with a preliminary estimate of your family's ability to contribute to educational expenses. The process assures that all schools to which a studeni applies will base their calculations on the same data.
- 3 Please send copies of your most recent IRS 1040 and W2 forms to SSS. Subsequently, SSS will convert your paper documents to PDF format and make them available electronically to Andover.

Requests for aid filed after the February Edcadline may not be processed in time to be included in the initial allocation of financial aid funds.

If you would like to request a paper version of the PLS, please call our office at 978-749-4059.

INTERNATIONAL FAMILIES

In addition to completing the PFS, international families also must complete the international financial aid form. Families may obtain a form by downloading it from Andover's Web site at www.andover.edu or by contacting the Office of Financial Aid.

FEE WAIVERS

We recognize that applying to secondary schools can be a financial burden for some families. With verification of financial need, Andover may waive the fees for the admission and financial aid applications and standardized testing. For more information about fee waivers, please call our office at 978-749-1059.

DIVORCED OR SEPARATED PARENTS

The resources of both parents must be considered in cases where a divorce or separation has taken place. Each parent will be asked to submit a separate PES and will not have access to the other parent's application information. The availability of complete information from both parents is essential to assure a fair assessment of the family contribution. Tack of this information may result in no award of aid or an arbitrarily low financial aid package.

FINANCIAL AID AWARD NOTIFICATION

Financial aid award letters are mailed in the same envelope as the letter of admission, on March 10. For more detailed information, direct your e-mail, letter, or telephone call to:

James I- Ventre, Director of Financial Aid Phillips Academy 180 Main Street Andover, MA 01810-4161 Telephone: 978-749-4059 E-mail: iventre@andover.edu

FINANCIAL PLANNING: THE ANDOVER PLAN

All families, whether or not they are receiving financial aid, benefit from planning carefully the way in which they will pay for their children's education. Accordingly, Andover created the Andover Plan, which offers parents different payment options. The program was designed with the help of Tuition Management Systems, a division of Key Bank, NA. Briefly, the options include a one-time tuition payment that avoids tuition increases; a program that accesses a credit loan; and arrangement of a monthly budgeting plan. All students who are enrolled on a full-time basis are eligible for these plans, which are explained in detail on the following page.

GENERAL INFORMATION

The Educational Program

Philips Academy's educational program comprises academic, athletic, and community dimensions. The *Blue B-k* describes for students and their parents the opportunities requirements, responsibilities, and expectations associated with these different elements. The *Course of Study* focuses on the academic program.

The Academic Curriculum

The curriculum of Philips Academy comprises a required core of studies believed to be fundamental to a liberal education and elective courses designed to fit the interests of the individual student. Instruction is given in all subjects usually required for entrance to higher learning institutions.

The diploma requirements, chosen by and voted on by the entire faculty as essential elements of the academic program, are designed to ensure that Phillips Academy graduates successfully complete a course of study in a broad range of disciplines and skills that, in the judgment of the faculty provides the appropriate foundation for a liberal education. The requirements are further specified as to skill level and content by the academic divisions and departments, with the oversight of the Academic Council Certain requirements vary in keeping with the length of time a student attends the Academy.

Classroom groups are small enough to permit individual attention, and students are placed in sections fitted to their skill levels. Accelerated sequences and advanced courses offer particularly able and well-prepared students opportunity to progress at a rate commensurate with their ability and ambition. Most departments offer courses beyond the level of preparation for college.

Topics, texts, and materials occasionally may not win the full approval of all students or parents. However, they will be selected carefully and thoughtfully within our academic departments, then presented and considered in managed contexts. Parental objections to course materials will not affect student placement in sections or courses.

The Trimester Plan

The academic year is separated into three trimesters. There are two types of weekly class schedules: one during which classes meet only Monday through I-riday, and the other during which classes also meet on Saturday morning. Within a given week, classes are scheduled to meet according to varying patterns. Many departments offer vearlong courses, as well as those that are term-contained [completed in one trimester]. The diploma requirements are stated in terms of full-year courses or trimester courses, depending on the academic area involved.

Placement of Newly Admitted Students

Students entering their first year are sent placement mare rials, including forms for present teachers to complete and self administered diagnostic tests in elementary algebramusic, and some world languages. These items are used by the Academy to aid in proper placement or recommendation of course levels. New students are also asked to complete to the best of their ability a course selection form indicating the courses they wish to take during the coming year. Although the placement material may alter a student's preliminary selections somewhat, it is helpful, for planning purposes, to know the levels each student thinks he or she is ready to enter.

Placement in the level of a subject may be independent of a student's grade level in school; through advanced placement at entrance or by taking accelerated courses, many students fulfill requirements early, thereby gaining increased opportunity for college-level or other elective courses.

For full membership in a given grade, students should have credit for the work of the previous grade or its equivalent. However, students are rated as members of a given grade if their deficiencies for full membership in it do not exceed a certain number of trimester courses.

Grade levels at Andover have unusual names: ninthgraders are called Juniors, 10th-graders are called Lower Middlers or Lowers, 11th-graders are called Upper Middlers or Uppers, and 12th-graders and postgraduates are Seniors.

International Students

Phillips Academy recognizes that international students who are here for only one year may face unique transitional issues because of their relatively short tenure at the school. The Academy therefore provides some initial specialized courses in English and U.S. history in which language proficiency is less necessary. (See the introductory paragraphs for the English and history sections of this book.) However, all students at Phillips Academy, including international students, are expected to perform competently in the school's basic curriculum.

Advising

Each student has an advisor. This faculty member is expected to guide the student in shaping a well-thought-out, long-term academic program that will incorporate both breadth and depth. In planning a program of studies, the student's needs and aspirations, insofar as they can be identified, are carefully considered, as is the necessity of meeting diploma requirements. The student's needs may include college and career plans, strengths and weaknesses revealed by previous performance and aptitude tests, and character and personal development.

As each student will also work with a college counselor (starting in winter term of upper year), advisors are not asked to be experts on the entrance requirements of individual colleges and universities, programs within these schools, or the National Collegiate Athletic Association (NCAA). Students and parents are encouraged to research such requirements on their own by going to the Web sites of individual instutitions.

The advisor meets with the new student during the orientation prior to the beginning of classes in September to review and approve the course selections the student has made during the spring or summer. Subsequently the student meets biweekly with his or her advisor to establish a personal relationship and to ensure that issues that arise concerning the student's academic program are addressed promptly. Midway through each term the student and the advisor together make or confirm course selections for the upcoming term and review long-range plans.

From time to time during the academic year the advisor (for day students) or the house counselor (for boarders) will report to parents concerning the student's growth and progress. Late in the spring, students in the three lower classes (Juniors, Lowers, and Uppers) and their respective advisors will prepare course selections for the coming year; a copy of these selections will be mailed to parents in June. The advisor will welcome any information and suggestions parents may wish to offer.

Workload

Phillips Academy's academic program is based upon the premise that students are capable of studying independently, responsibly, and with self-direction.

During junior year, students may take five or six courses as deemed appropriate by the student with guidance from the advisor and Advising Council, a group of faculty appointed by the dean of studies. Subsequently, students are expected to carry five courses each term. On occasion and with the approval of the Advising Council, programs of four or six courses may be taken (see page 7 for the six-course and four-course load policies). Over the span of their last two years, students are required to complete at least 27 trimester units, with at least 12 of those units taken in the senior year.

No student may take more than two courses in one department per term. Furthermore, with the exception of spring term Seniors, a student who wishes to take two courses in a single department must take a five-course load, with the following exceptions: two math courses when one—and only one—is a computer course; two art courses when one is art history; two music courses when one—and only one—is performance-based. Students who, in the spring term of their senior year, wish to take two courses in one department may do so as part of a four-course load. Taking three courses in a single department is not permitted.

In most courses, especially those taken to meet diploma requirements, class time and homework together can be expected to require a total of about nine hours per week. Certain upper-level elective courses, as noted in their descriptions, may require more than the standard four to five hours of homework per week.

Academic Assistance

Students in need of academic assistance should first seek help from their classroom teachers. Additional help is available at the Academic Skills Center (ASC), where students can sign up for peer tutors or work with an adult on study skills, organizational skills, and time management. Other sources for academic support on campus include the Math and Science Study Halls, the Writing Center, CAMD (Community and Multicultural Development Office), the Writing Workshop, and language tutoring at the Language Learning Center (LLC).

Phillips Academy does not offer remedial courses, training in English as a Second Language (ESL), or tutoring by faculty members other than out-of-class help offered by teachers to students enrolled in their courses.

In compliance with the Americans with Disabilities Act (ADA) and upon request, the Academy will provide accommodations that are reasonable and appropriate to students with properly documented disabilities. Students who wish to request such accommodations should contact the coordinator of services for students with disabilities for information concerning the Academy's procedures for documenting the disability and the need for accommodation(s). As these procedures take some time, immediate implementation of accommodations may not be possible.

Attendance

Regular attendance in class is an essential element of a Phillips Academy education. Students are expected to attend all academic classes. Instructors, if approached in advance, are permitted (but not required) to excuse students from a class meeting if the absence from that meeting will not add to weekend time. Only cluster deans may give permission to extend weekend time, and they may do so without consulting instructors. (See *Blue Book* for further information.)

Diploma Requirements

The Lose dip on a requirenem is the satisfactory completic of a four year's condary school program of which at lear their immesters must be at Andover. The student must be in good standing not on probation or under suspection in the time of graduation. A student who has been different discounterable for a diploma unless readmitted.

In mirror endus required for the diploma are

for all the lumors 51 for all the Uppers 48 for all the Uppers 48 for all the Semons 48

A colority required program includes nine trimester cred to an I not be nine to world languages, eight in mathe pair's asset in history and social science, and six two fully at courses in history science. Details about the manner in which these requirements are to be hiffilled can be found in the opening descriptions of the departments on time!

In ord-r to be eligible for a diploma, all students must satisfy the swimming requirement of the Department of Physical Education

Certain diploma requirements vary with the class level at which the student enters Phillips Academy Entering Juniors and Lowers must pass Physical Education 200 and one trime for colurse offered by the Department of Philosophy and Religious Studies, usually in the lower year. Some modifications of the language requirement are that for entering Uppers and Seniors, Entering Seniors with no previous world language experience must pass a car in a world language.

Because of recent changes in the diploma requirements for art, music, and theatre and dance, students who matriculated in the fall of 2008 for later) have a different set of requirements from those who matriculated prior to 2008. Students matriculating in the fall of 2008 or later are subject to the following diploma requirements in the vix all and performing arts.

- Entering Juniors must earn no fewer than four credits in art. music, and theatre and dance combined, with at least one credit each in art and music. Students should have completed one credit in art and one credit in music by the end of the lower year.
- Entering Lowers must earn no fewer than three credits in art music, and theatre and dance, with at least one credit each in art and music.
- Entering Uppers need pass on vone trimester of either art or music at the Academy

Students who marriculated prior to 2008 are subject to the following diploma requirements in the visual and performing arts.

- Entering Juniors must earn two credits in art and two in music, and take one term of theatre and dance. Students may furful the theatre and dance requirement by take any of the theatre and dance academic classes.
- Entering I owers must earn a total of three credits in art and music, with at least one in each area
- Entering Uppers need pass only one trimester of either art or music at the Academy

A Senior must earn a minimum of 12 graded trimester credits during the senior year. Seniors must have passing trimester grades for all courses taken during their spring trimester Independent Projects are counted as graded courses.

The Academy's diploma requirements provide a solid foundation for further study in a broad range of areas, while allowing students some latitude to pursue their own particular interests. However, students should be aware that most colleges require or expect course work beyond our diploma requirements. For example, most colleges expect students to take four full years of English, and at least three years of language, science, and history or social studies. Some majors, such as engineering, might require four years of science, and math through calculus. We advise students to consider thoughtfully the Program Recommendations' sheet from the College Counseling. Office. In addition, students who are considering college athletics should be aware of the NCAA eligibility rules lawwincaa.org).

DIPLOMA REQUIREMENTS AT A GLANCE FOR STUDENTS ENTERING IN 2008 OR LATER

	4-year student	3-year student	2-year student	1-year student
Trimester Credits (including transfer credits)	54	51	48	48
Art, Music, Theatre and Dance	1 art, 1 music, plus 2 more of art, music, and/or theatre and dance	1 art, 1 music, and 1 more art, music, and/or theatre and dance	I art or music	None
English	English 100, 200, 300, and 310	English 200, 300, and 310	English 300, 310, and 3 terms at 500-level	3 terms
World Languages	1 year of 300-level or 1 term of 400-level, or 2 years of one language + 1 year of another, with at least one of these being a less commonly taught language	1 year of 300-level or 1 term of 400-level, or 2 years of one language + 1 year of another, with at least one of these being a less commonly taught language	1 year of 300-level or 1 term of 400-level or completion of 2 years of a new world language (following successful student petition)	If student does not have three years of language previously, 1 year
History and Social Science	History 100 in 9th grade, History 200 in 10th grade, and History 300 and 310	History 200 in 10th grade and History 300 and 310	History 300 and History 310	If not entering credit for U.S. history, then either <i>History 300</i> or <i>320</i> , followed by <i>History 310</i>
Lab Science	2 yearlong lab sciences	2 yearlong lab sciences	2 yearlong lab sciences	2 yearlong lab sciences
Math	Completion of Math 280 or 340	Completion of Math 280 or 340	Completion of Math 280 or 340	Completion of 500-level or higher course or <i>Math 400</i>
Philosophy and Religious Studies	1 term (10th grade unless granted an exception)	1 term (often in 10th grade)	None	None
Physical Education	1 term (9th or 10th grade)	1 term (10th grade)	Pass swim test	Pass swim test
Personal and Community Education	Assigned (10th grade)	Assigned (10th grade)	None	None

DIPLOMA REQUIREMENTS AT A GLANCE FOR STUDENTS ENTERING BEFORE 2008 (THE GRADUATING CLASS OF 2011)

4-year student

Frimesier Credits (including transfer credits)	51
Art and Music (placements and specific requirements or music determined by testing)	Evear of either art or music in 9th grade, followed by two additional courses in in the other discipline
English	Inglish 100, 200, 300, and 310
World Fanguages	Flirough 1 year of 300 level or 1 term of 400-level, or 2 years of one language + 1 year of another, with at least one of these being a less commonly taught language
History and Social Science	History 100 in 9th grade, History 200 in 10th grade, and History 300 and 310
Fab Science	2 yearlong lab sciences
Math	Completion of Math 280 or 340
Philosophy and Religious Studies	F term (F0th grade unless granted an exception)
Physical Education	1 term (usually in 10th grade)
Personal and Community Education	Assigned (10th grade)
Theatre	F term

Accelerated Sequences

The Andover curriculum offers accelerated sequences in most academic departments. It provides special programs in the modern world languages, designed to cover four years' work in three, or five years' work in four. The programs are open, on invitation of the departments, to especially able and ambitious students.

Advanced Placement Courses

A large number of Phillips Academy students take College Board Advanced Placement (AP) tests in May to establish advanced placement in college courses or credit toward the college degree. Advanced Placement examinations are offered in American History, Art History, Art Studio (2), Biology, Chemistry, Computer Science (A and AB), Economics (2), English Language and Literature, Environmental Science, European History, French Language and Literature, German, Government and Politics (2), Latin Vergil and Literature, Mathematics (AB and BC), Music Theory, Physics (C), Psychology, Spanish Language and Literature, Statistics, World History, Chinese, and Japanese.

Six-Course Load Policy

Because of both the rigor of individual courses and the Academy's commitment to limiting class size, taking a sixth course after junior year, whether for credit or as an audit, is considered a privilege and not a right. If a student can be scheduled for six courses, approval of that program is automatic only if (a) the sixth course is *Music* 900–910 or *Physical Education* 200, (b) the student has earned an honors average in the previous term, or (c) the sixth course is *Theatre* 520 and the student has no grade lower than a 4 in the previous term.

In all other instances, the Advising Council will meet during the second week of classes to determine which students will be allowed to continue with six courses. Only in rare circumstances will a student with a grade of 3 or lower in a discipline in which s/he is continuing be allowed to take a sixth course other than *Music 900–910* or *Physical Education 200*.

Approval of a six-course load, whether granted automatically or by the Advising Council, is conditional upon a satisfactory record at the midterm. Any student with a single D or lower at the midterm or a nonmedical incomplete will be required to drop a course, returning to a standard five-course load. Students with one or more medical incompletes or a low 3 at the midterm will be allowed to continue with six courses only with the approval of the Advising Council. Thus, all students taking six courses must understand they may be asked to drop a course after midterm despite having done the work in that course for half of a term.

Four-Course Load Policy

All students, including seniors, normally carry five courses each term. Four-course loads are granted only with permission of the Advising Council, which will consider the overall rigor of the proposed program and the student's individual situation. At least three of the four courses must be designated *advanced* or *honors* courses (see below) for a four-course load to be approved, unless the student requesting a four-course program needs to attend to a significant academic or personal concern. Except in the spring term of senior year, a four-course load may not include two courses in the same department.

Courses Designated as Advanced

The following have been designated advanced courses: Art: 400 level and above; English: 500 level and above; World Language: 400 level and above, and 150 and 250 courses taken after the diploma requirement has been fulfilled; History: 400 level and above; Mathematics: 510 and above; Music: 400 level and above; Philosophy and Religious Studies: 400 level and above; Sciences: 500 level and above; Theatre: 510 and 520.

Independent Projects:

The Abbot Independent Scholars Program (AISP)

The AISP provides selected Seniors (and the occasional younger student) who have exhausted the course offerings in their desired area(s) of study an opportunity to work independently with a faculty mentor for course credit. The number of credits assigned to a student's independent project depends on the nature and scope of the planned work. Each project is graded on the standard 0–6 scale by the supervising faculty mentor.

Seniors who have successfully completed a term of independent work may apply to be Abbot Scholars in the spring term. As an Abbot Scholar, the student will pursue an independent project (typically a continuation or expansion of work done previously), prepare some form of public exhibition based on his or her work, and, together with his or her mentor, participate in a colloquium involving all Abbot Scholars and their mentors.

Additional information on the AISP and its application process is available on PAnet under Academic Resources, Student Information.

Special Courses in World Languages

Special courses covering the work of two years in one are open to qualified Seniors in German, Greek, Latin, and Russian. These 100/150 or 150/0 courses are designed primarily for students of proven linguistic ability wishing to begin a second or third language in their Senior year. Entering Uppers or Seniors who do not place out of the language requirement must study a world language until they either fulfill the three-year requirement or graduate.

Course Enrollments and Cancellations

The school reserves the right to change advertised courses, to alter the dates on which they are offered, and to cancel, a any time up to the third day of classes, any advertised ourse in which enrollment is judged to be inacceptably small. I ikewise, the school has the right to restrict enrollment in any course when sign ups exceed the departmentally determined course capacity. Students who are enrolled in the first term of a continuing (41, 2, 3) course in ay have priority in subsequent terms.

Adding and Dropping Courses

To transfer into or drop a course, a student must first obtain a signed Course Drop Add Slip from his or her advisor then take it to the scheduling officer in George Washington Hall to complete the process. Section changes Jame course, different time or teacher) and level changes leg. Chemi try 300 to Chemistry 250) must be approved by the department chair. No student may transfer into a class without an official transfer slip signed by the sched ning officer fransfers into term-contained courses must take place during the first five calendar class days of the term. Advisors may approve the dropping of term. contained courses only during the first three weeks of class in a given term. Students wishing to drop a termcontained course after the end of the third week of class in a given term - or a yearlong or two-term (12) course after the first five calendar days of the course must ask the assistant dean of studies for permission to petition and obtain the approval of the student's counselor, the student's advisor, the instructor, the department chair, the college counselor, as appropriate, and the assistant dean of studies. Requests to petition must be made before the end of the second week following midterm. No requests will be considered after this date. Credit for yearlong and T2 courses is granted, at the discretion of the department chair, only if the student is passing the course at the time it is dropped and only for that portion completed. Yearlong and T2 courses are considered to be long-term commitments. Only in rare instances, for academically compelling reasons and with permission of the Dean of Studies, may Seniors petition to drop yearlong or T2 courses for the spring term. In those rare instances in which a student is in clear danger of failing in spring term. the teacher may initiate a drop of a yearlong or T2 course: the drop would then need to be approved by the department chair.

Student Requests for a Change of Teacher

Recognizing that effective education requires productive relationships between teachers and students and that such relationships take time to develop, and recognizing also that open discussion between the parties involved in seemingly difficult relationships is itself an important part of education, the Academic Council has approved the following general procedure on student requests for a change of teacher.

- L Permission for a student to change teachers in a multisection course may be given by the department chair. The Academy does not accept requests for specific teachers in these multisection courses.
- 2. If there has been no previous relationship between the student and teacher, no request for change will be considered until an appropriate period of time has passed (at least one term). During this time both patties are expected to make good faith efforts to develop an effective relationship.
- 3. Requests for change informed by an appropriate period of experience will be considered only after a conversation about the request has occurred between the student and the teacher, in keeping with departmental policies. The department chair is available to facilitate these conversations, if either student or teacher so desires.
- 4. Students are advised that permission to transfer carries no guarantee that the student will be assigned to any particular section or teacher. Students are also informed that such transfers may require that other elements of their schedule be altered.

Auditing Courses

In order to audit a course, a student must have the permission of both the teacher and the department chair. To switch to audit status in a course that a student originally had registered to take for credit, a student must follow the same steps required to drop a course except that the student must have the permission of both the teacher and the department chair, no matter when during the term the student is requesting the switch. A lack of effort on the part of a student is not a valid reason to switch to audit status.

Failing Course and Trimester Grades

Unless stated to the contrary in a department or course description, a student who receives a failing trimester grade has the option of making up the failure by passing an examination administered by the academic department involved. The timing of any makeup examination is at the mutual convenience of the student and the department.

There is no time limit for the makeup of a failing course grade, either single-trimester or multiple-trimester, though a student may not be eligible to advance to the next course in a sequence until the failure is made up or the course is successfully repeated.

There is, however, a time limit for the makeup of a failing trimester grade when that trimester is part of a multiple-trimester course (T2 or yearlong). Such a makeup must be completed by the last day of classes of the following trimester, prior to the start of extended period week.

A Senior who has a failing spring trimester grade is not eligible for his or her diploma until the failure is made up, even if the course grade is passing. Such a makeup (whether by exam or other work) cannot be attempted until at least two weeks after graduation.

College Entrance Examination Board (CEEB) Test Dates

Tests will be held on campus in 2010-2011 as follows:

October 9	SAT and Subject Tests
November 6	SAT and Subject Tests
December 4	SAT and Subject Tests
January 22	SAT and Subject Tests
May 7	SAT and Subject Tests
May 2 to May 13	AP (Advanced Placement
	examinations)

June 4 SAT and Subject Tests

Note: Most students should plan to take the June 4 exams at test centers near their homes, not on campus.

Computer Center

A computer center, located in the lower level of the Oliver Wendell Holmes Library, is available for student use. It houses three computer classrooms and a fourth lab filled with an array of Macintosh and Windows computers. A wide range of software is available, and instruction in computer usage is provided.

Personal Computers

Though there is no expectation that they do so, students are encouraged to bring personal computers to the school. However, Phillips Academy can assume no responsibility for the care, security, or maintenance of these studentowned units. Further information concerning personal computers is available upon request from the director of technology.

School Year Abroad

Students may elect to spend their Upper or Senior year studying in France, Spain, Italy, or China with School Year Abroad (SYA). A fall-term program in India is also available. Originated as an off-campus program by Andover and later joined as a sponsor by Phillips Exeter and St. Paul's School of Concord, N.H., SYA is now an independent program, both legally and financially. Students live with host families while pursuing a course of study under the supervision of teachers from SYA's associate schools in the United States. SYA provides students with courses that earn full academic credit at Andover and with the experience of immersion in a foreign culture. Students wishing to participate should consult their advisors or the assistant dean of studies for advising for guidance in the selection of courses for the years prior to and following the year abroad. SYA is a yearlong commitment. Students will not be permitted to return to the Academy for winter or spring terms.

Summer Session

Phillips Academy's Summer Session is a five-week-long enrichment program for boys and girls of high school age. While Summer Session courses may reinforce and enrich a student's education, they do not earn Phillips Academy credit, except in the case of geometry.

PLANNING A PROGRAM OF STUDY AT ANDOVER

The following is designed to help Andover students and their parents understand the curriculum and to show the major decisions (and their consequences) that face students at each stage of the four-year academic program

The Main Choices at Each Stage of a Four-Year Program

While a student's program of studies is adapted each year to his or her changing situation, the future consequences of each course should be noted, for certain choices in one year open the way to later options—and may close the door on others

JUNIOR YEAR (FOR CLASS OF 2012 AND BEYOND)

Lach trimester a Junior may take five or six courses. All well take History 100 and English 100. In other subjects, students may have their placement adjusted as a result of the placement exams or questionnaires sent to them in the spring

In selecting courses, students are reminded to check the diploma requirements. A Junior's program typically will resemble the following outline.

1. Mathematics	enter the sequence by placement of the department
2 World Language	enter the sequence by placement of the department, usually at the 100 level
3. English	English 100
1 History	History 100
5. Elective	usually a yearlong science, with most students taking <i>Biology 100</i> (students placing in <i>Math 280</i> or higher may wish to consider other sciences)
6. Flective	usually a term of art, music, theatre/dance or physical education

(Occasionally, Juniors will be prepared to take SAT II Subject Tests at the end of the year.)

LOWER MIDDLE YEAR

Each trimester a Lower must take five courses. New students may have their placement adjusted as a result of the placement exams or questionnaires sent to them in the spring.

A student wishing to participate in the School Year Abroad program during the upper or senior year should discuss these plans with the advisor and seek guidance for the selection of courses for the lower year.

In selecting courses, students are reminded to check the diploma requirements. A Lower's program typically will resemble the outline below.

Lowers may take the Preliminary Scholastic Aptitude Tests (PSATs) in the fall, and some take the College Board SAT II Subject Tests during the lower year.

New Students

1. Mathematics	of the department
2. World Language	enter the sequence by placement of the department
3. English	English 200
4. Science	usually a yearlong science
5. History 200, Physical Ed Elective	art, classics, computer, music, philosophy and religious studies. or theatre/dance

Returning Students

1.	Mathematics	continue the sequence
2.	World Language	continue the sequence
3.	English	English 200
4	Science	usually a yearlong science
5.	History 200, Phil/Rel Studies, and Physical Ed., if not yet completed	unless petition for an alternate program has been granted

UPPER MIDDLE YEAR

During the upper and senior years, a student must accumulate a minimum of 27 trimester units. A unit equals one course taken for one trimester. A pass/fail course may be elected as a fifth course only.

New students may have their placement adjusted as a result of the placement exam or questionnaire sent to them in the spring. As a matter of general policy, advisors encourage depth in the selection of courses for the upper year. In selecting courses, students are reminded to check the diploma requirements. An Upper's program should resemble the outline below.

Uppers should take the Preliminary Scholastic Aptitude Tests (PSATs) in the fall; all take the SAT I in January; and many take the College Board SAT II Subject Tests in June of their upper year. Some also take the College Board Advanced Placement (AP) tests in May of their upper year.

New Students

1. Mathematics	enter the sequence by placement of the department
2. World Language	enter the sequence by placement of the department
3. English	begin the sequence (English 301, 310)
4. History	usually History 300 (T2), 310 (The United States) (though this may be taken senior year)
5. Elective	art, computer, history, another mathematics, another language, music, philosophy and religious studies, science, psychology, or theatre/dance

Returning Students

1. Mathematics	continue the sequence	
2. World Language	continue the sequence	
3. English	continue the sequence (English 300, 310)	
4. History	usually History 300 (T2), 310 (The United States)	
5. Elective	art, computer, another English, history, another mathematics, another language, music, philosophy and religious studies, science, psychology, or theatre/dance	

SENIOR YEAR

During the upper and senior years, a student must accumulate a minimum of 27 trimester units. A unit equals one course taken for one trimester. A pass/fail course may be elected only as a fifth course; an Independent Project counts as a course. A Senior must earn a minimum of 12 graded trimester credits during the senior year. Seniors must have passing trimester grades for all courses taken during their spring trimester. In selecting courses, students are reminded to check the diploma requirements. New students, including international students, should pay particular attention to the introductory paragraphs for the English and History sections of the book. A Senior's program should resemble the outline below.

Many Seniors retake the SAT I in November and the College Board SAT II Subject Tests in December, and take the College Board Advanced Placement (AP) tests in May.

New Students

1. Mathematics	enter the sequence by placement of the department; if the requirement is not yet satisfied, enter <i>Mathematics 400</i>
2. World Language	enter the sequence by placement of the department if the requirement is not satisfied
3. English	as placed by the department
4. Elective	art, computer, another English, history,
5. Elective	mathematics, a 150/0 language, music, philosophy and religious studies, science, psychology, or theatre/dance

Returning Students

Usually most diploma requirements have been satisfied. Careful selection of electives for continued depth in the student's chosen areas is encouraged. Two-year students must take English electives at the 500 level each term.

COURSE NUMBERS

I is trivial git corresponds to the level of the course

- Lete 1 = 100, for courses that introduce a subject (NP4N 100) or that are typically taken by Juniors (BIOI 100, FNGI 100)
- Let e 2 = 200, for courses that are the second level in a sequence (SPAN 200) or courses that are typically taken by Lowers or Juniors (ART 225, HIST 200)
- Let el 3 = 300 for courses that are the third level in a sequence SPIV 300) or for courses that are appropriate for Uppers LNGL 300 or for luniors, Lowers, and Uppers PIRT 300, CIIFM 300)
- Level 1 = 400, for courses that are the fourth level in a sequence, or for courses that are appropriate for Seniors but do not quality for the 500 of 600 designations)
- Let el 5 = 500, for courses equivalent to college freshman classes, sometimes but not always, indicated by explicit preparation for an AP exam
- Level 6 600 for courses that would typically be taken by majors in the subject in college, or for courses typically taken after the first year of college
- Performance based credit = 900, for course credit associated with performance, such as music lessons or participation in music ensembles for credit. Numbers followed by "H" indicate higher level performance requirements, such as ensembles with competitive auditions.

The second and third digits (as in ART-225) reflect organizational schemes at the departmental level, and therefore will be used differently be different departments. Letters are also used for these purposes.

KEY TO COURSE DESIGNATIONS

A course number ending in /0 denotes a yearlong course | Example: MATH-1000 | . A number ending in /1, 2, or 3 indicates that the course is term-contained, but sequential, and may be taken for one, two, or three terms | Example: IHDA-520 | 1, 2, 3 | A number with no term designation indicates a course that is term-contained but may be taken only once | Example: ART-310 | .

The designations F. W. and S indicate the trimester during which the course is offered: F = Fall; W' = Winter: S = Spring. Some courses require a two-term commitment:

they are indicated by a 12 following the course name (Example: PH) \$\inp 80.4 Calculus Based Physics | 12 | Carefully check each course description for any other limitations prerequisites, permission of instructor or department chair required, etc.

Final	Digit:	Indicates:
-------	--------	------------

/()	Yearlong course
/1	Course offered in fatt trimester
/2	Course offered in winter trimester
/3	Course offered in spring trimester
/4	12 course offered in fall and winter
15	12 course offered in winter and spring

INTERDISCIPLINARY STUDIES

The following courses were created and are taught by teachers in two or more academic departments, for full descriptions, please refer to the pages and departments indicated under each title below

Brazilian Cultural Studies

(not offered in 2010-2011)

Out of Tune: Music and the State in the Twentieth Century

(One credit assigned in either History or Music) HIST-SS485 or MUSC-485

Disease and Medicine in the United States: Pox and Pestilence

(One credit assigned in either History or Science) HIST-SS480 or SCIE-480

The Brain and You-A User's Guide

(One credit assigned in either Science or Psychology) SCIF-490 or PSYC-490

ART

The visual arts program emphasizes artistic thinking and the development of creative ideas in relation to the techniques of a medium, history of visual ideas, and expressive potential of one's own experience and culture. Students have the opportunity to explore particular areas in depth on both the introductory and advanced levels.

Because of recent changes in the diploma requirements for art, music, and theatre and dance, students who matriculated in the fall of 2008 (or later) have a different set of requirements from those who matriculated prior to 2008. Please see pages 5–6 of this *Course of Study* for a more detailed explanation of these requirements.

Students who matriculated as Juniors and Lowers must take one of the Visual Studies Studies (ART-225A, B, or C), which qualifies them for any 300-level Introductory Concentration Course or a 400-level course upon permission of the department chair.

Students with a strong background in art may seek permission from the chair to enroll directly in a 300-level art course chosen in consultation with the chair of the art department. Exemptions will be granted on the basis of a student's previous course work and a portfolio of work.

Students who matriculated as Uppers in the fall of 2008 (or later) may fulfill their diploma requirement in the visual and performing arts with *ART-250*, or they may enroll in a 300-level or 400-level course upon permission of the department chair.

Entering Seniors have no diploma requirement in art. They may take any 300-level course, or a 400-level course upon permission of the department chair.

With the exception of ART-400, no art course, if failed, can be made up by examination.

There will be a studio fee for each course, with the exception of ART-300 and ART-400. Additionally, students should expect to help pay for some art materials.

FOUNDATION COURSES

The ART-225 and ART-250 Visual Studies courses focus on artistic thinking and visual vocabulary. Why does man create? And how? Projects, discussions, and visits to the Addison Gallery and Peabody Museum focus students on their own creative work and what they perceive in the world around them. Juniors and Lowers choose from one of three areas (2-D, 3-D, or media) to explore the connection between making and thinking. Uppers and Seniors enroll in ART-250.

ART-225A Visual Studies 2-D Studio

(F-W-S)

For Juniors and Lowers. In this studio students use twodimensional media (e.g., drawing, collage, painting, mixed media, artists' books) and photography to expand their perceptual, conceptual, and technical skills, and develop the visual language needed to communicate their experiences and ideas.

ART-225B Visual Studies 3-D Studio

(F-W-S)

For Juniors and Lowers. In this studio students use threedimensional media (e.g., wire, clay, wax, paper, plaster) and photography to expand their perceptual, conceptual, and technical skills. By expanding their visual literacy students are able to observe, critically and analytically, their surroundings and visual culture.

ART-225C Visual Studies Media Studio

(F-W-S)

For Juniors and Lowers. In this studio students make photographs and short videos to focus on two central areas of media: photography and time-based images (film/video). Through projects, presentations, and discussions students explore how these media have changed the ways people perceive the world, and express their ideas and feelings.

ART-250 Visual Studies

(F-W-S)

For Uppers and Seniors. *Visual Studies* explores ways in which ideas are translated into images. While learning to think as artists, students will use visual language to communicate their ideas (e.g., line, shape, value, texture, color). Student projects will focus on the expressive possibilities of image making and developing the craft to convey content. In class presentations and lectures, examples from art, media, and popular culture will provide context for discussions relevant to personal and cultural topics.

INTRODUCTORY CONCENTRATION COURSES

Students who matriculated as Juniors or Lowers must complete a foundation course (ART-200, 225, or 250) prior to enrolling in a 300-level course. Students who matriculated as Uppers may fulfill their diploma requirement in the visual and performing arts with ART-250, or they may enroll in a 300-level course upon permission of the department chair.

ART-300/2

ART-300/3 Visual Culture: Discovering the Addison Collection

Throughout the term, students will view selections from the collection of the Addison Gallery as it relates to the history and context of American art. Each week various themes will be explored and diverse works from the collection will be viewed and discussed from a perceptual point of view. Students will meet the gallery staff and experience what makes a museum function. Readings, writing assignments, and research projects will help students engage, confront, and discuss a wide range of art forms and imagery. Issues surrounding the making and viewing of art will be explored. Students have the option of continuing with the second term of ART-300. Spring term students will curate an exhibition as a culminating project for the term. (Ms. Crivelli)

ART-301 Architecture I

(F-18-5)

This course will introduce the basic principles of architectural design through a sequence of related projects in mechanical drawing, site analysis, and research into precedent, culminating in the design of a space or structure. With hands on sketches, drawings, and models, students will explore the issues of a well-thought-out structure and learn to see the environment in terms of human scale, materials, and the organization of space. Class time will include discussions and demonstrations, as well as studio time. There will be a required evening lab. (Ms. Bovajian)

ART-302 Ceramics I

11 W 5

Ceramic I is designed for students with little or no prior experience with clay Students will learn a wide variety of forming techniques that allow them to explore solutions to conceptual problems. The instructional emphasis will be on using ceramics as an expressive medium, with handbuilding techniques predominating. Projects might include tile mosaics, clay masks and poitraits, boxes, vessels, and teapots. Class time will include demonstrations, critiques, and slide and sideo discussions, as ssell as studio time Students can expect to tackle projects that engage many of the key design concepts covered in the diploma requirement courses in art. Assignments for this class will explore the historical and contemporary uses of ceramics, as we has the fundamental aesthetics of three-dimensional form. Students will see their pieces through the entire ceramic process, from wet clay, to glaze, to fired finished work. This course has a required evening lab. (Mr. Zaeder)

ART-303 Computer Media I

151

Computer technology offers an indispensible set of tools for an artist, profoundly influencing the ways in which ideas and images are generated, constructed, and presented. Various methods of digital manipulation allow an artist to integrate photographic and traditionally generated imagery le.g., drawing, painting, printmaking, sculpture). In the first part of the term, students will work on small projects as a way to experiment with the expressive and technical potential and possibilities of Adobe PhotoShop. During the second part of the term, students will design, define, and construct a final project of their choice le.g., a thematic portfolio of individual or sequential images, a visual book, a CD-ROM, or a mixed-media collage or sculpture). (Ms. Zemlin)

ART-304 Drawing

F-70 - 5

This course will provide students with a sequential exploration of drawing methods and concepts. Students will learn skill's and concepts relating to contour, gesture, and fully rendered drawings. They will work with an assortment of materials while understanding the depiction of three-dimensional objects on a two-dimensional plane.

rise of light and dark contrast, use of proportion, and perspective sighting. Assignments are designed to develop students' skills in direct observation and to encourage creative, expressive thinking. The creative process will be explored through hands-on studio projects, formal assignments, critiques, and discussions of historical, contemporary, and multicultural art. Frips to the Addison Gallery and other places of interest will complement the coirse (Ms. Crivelli, Ms. Trespas)

ART-305 Painting I

(F W)

This class is designed to introduce students to the basic elements of painting with swater-mixable oils or acrylic paints. Specific problems are assigned to facilitate the study of fundamental paint handling, color mixing, and blending. Issues of form and space relationships, composition, and development of ideas are addressed in balance with the student's need for self-expression. Class critiques, slide talks, and visits to the Addison Gallery complement the actual painting process. This class requires students to attend an evening lab. (Ms. Trespas)

ART-306 Photography I

(F-W-5)

This introductory black and white film course will explore, through presentations, demonstrations, and group critique, traditional photographic image making. Beginning with basic camera manipulations and film processing, students will be encouraged to explore the magic of light-sensitive silver materials. Laboratory instruction in printing fine art images with variable contrast filters will be provided. Assignments and discussions of historical landscape, portrait, and/or still life genres will further direct each student to examine how a photographer carefully selects and represents his or her vision of the world. A supervised evening lab opportunity provides additional time for technical help and individual critique with the instructor. Class meets four periods a week, with five hours of preparation. Rental film cameras are available from the art department. (Ms. Harrigan and department)

ART-307 Mixed Media Printmaking

(12.)

Students discover and develop personal imagery while learning several types of printmaking techniques, including relief, monoprint, drypoint, and collography. Images are constructed through collage, drawing, and painting on—and carving into—surfaces such as rubber, wood, metal, and plastic. These are inked, in most cases with water-based inks, and transferred to paper by hand or by means of a printing press. Often several impressions will be "pulled" from one printing plate and combined with another. A collaborative project, book arts, and digital printing methods also are explored. Emphasis is on gaining technical, conceptual, and formal skills while developing a student's ideas through various types of printing and mixed media combinations. Critiques, slide talks, and field trips

to the Museum of Printing and the Addison Gallery contribute to students' understanding of the history, concepts, and processes behind printmaking. (Ms. Trespas)

ART-308 Sculpture I

(w-s)

Winter Term—Sculpture I: Clay, Plaster, and Metal. Sculpture has become an all-inclusive field, with contemporary sculptors working in a wide range of media. In this class we will work with a variety of materials, such as wood, clay, plaster, and metal. Students will have the opportunity to learn a basic set of technical and conceptual skills for working and thinking three-dimensionally. Projects will involve an investigation of the communicative potential of materials, structure, imagery, and context through a process of research, invention, discovery, and discussion. There will be a required evening lab. (Ms. Zemlin)

Spring Term - 3-D Structures and Hand Papermaking. Paper generally functions as a two-dimensional matrix for book pages, text, and other printed matter, but it is also a versatile material for creating three-dimensional structures. This class will introduce students to paper casting, armature construction, and hand papermaking. Technical demonstrations, assignments, and exposure to a wide range of historical and contemporary artwork will help students develop imagery of their own design. For the casting project, students will create a clay relief, which will be used to generate a plaster mold, and ultimately a series of paper casts. In the armature project, students will work with wire, reed, and other materials to create a threedimensional structure, which will then involve the application of a "skin" of handmade paper, Students will learn to make paper by hand, starting with kozo, the bark of the Japanese mulberry tree. There will be a required evening lab. (Ms. Zemlin)

ART-309 Video I

(F-W-S)

This course introduces principles and techniques of time-based media. Students learn to identify stories, shoot and edit their own productions, and view and discuss both professional and student work. Examples are chosen to show how one conveys ideas by means of images and sound, including experimental work, as well as fiction and nonfiction film. For this course, students use mini-DV cameras and non-linear editors in the Polk-Lillard Electronic Imaging Center. (Ms. Veenema)

Art-310 Introduction to Digital Photography

From image acquisition to pigmented print processing, this introductory photography course investigates the evolution of current photographic practice from traditional film to digital photographic processes. Technical demonstrations and discussions include the topics of file management, color calibration, color theory of reproduction, digital workflow, color management, image adjustment, digital black and white printing, and compositing tech-

niques. Software packages such as Adobe Photoshop and Lightroom will be available for student use in the school's Polk-Lillard Electronic Imaging Center. Students will be guided in the production of a print portfolio that rivals, in image quality and content, that of traditional color or black and white film photography. Contemporary and historical bodies of work will be examined, and there will be an ongoing appraisal of individual portfolios developed in class. Student portfolios may be thematic in content or represent a carefully considered sequence of experimental work. Students will need to provide their own point-and-shoot or DSLR camera. Students in need of a camera should see the department chair to arrange a loan. (Ms. Harrigan and department)

ART-314 Woven Structures and Fabric

(s)

The class will explore the technical and conceptual potential of fabrics, surface design, and woven structures in terms of function, cultural significance, pattern, abstraction and representation. Students will learn fiber techniques, such as weaving, pieced fabric collage and quilting, stenciling, digital printing on fabric, block printing, and tie-dye. In the process of learning a range of techniques, students will develop ideas and imagery based on personal interests, contemporary fine art, crafts, and the textile collections at the Peabody Museum. (Ms. Zemlin)

Prerequisite: ART-225, 250, or permission of the department chair.

ART-365 ___ Art, Artifacts, and Culture

(s)

This course involving the art department, the Addison Gallery, and the Peabody Museum will focus on the study of art and artifacts as they reflect diverse cultures, their similarities and differences, in the past and present. Using the collections and resources of the two museums, the class will examine questions such as the following: What do images and artifacts tell us about ourselves and our cultures? How do art forms define other cultures and differ from ours? What drives people to create? Where do our ideas of beauty come from? Who are we and what makes us unique? The class will include readings, discussion, research, and writing, and frequent visits to each museum. (Ms. Crivelli)

Prerequisite: Completion of ART-200, 225, or 250.

ADVANCED CONCENTRATION COURSES

ART-400/1 History of Art

(F-W-S)

Five class periods. This three-term study of the history of Western and non-Western art serves two primary purposes: 1) students explore works of art as primary-source documents to unveil the values and ideas of the culture in which they were created, and 2) students foster the liter-

acy to read works of art well—long after they depart the course. While the content and methodology differs each rerm, these dual goals remain paramount throughout the year. Students use the Addison Gallery, the Peabody Museum, and local collections and exhibitions for the study of original works of art. Although students may take the course any term, only those who complete all three terms are prepared for the AP examination in Art History.

Fall term Focuses on the architecture, painting, and sculpture of both Western and non-Western cultures from pre-history through the Middle Ages. In addition to uncovering the concerns of diverse societies, students formulate standards for understanding and comparing the products of different cultures. (Mr. Fox)

Winter term—Focuses on the architecture, painting, and sculpture of Europe and the Americas from the early Renaissance through the f8th century. In studying the works of Giotto, Michelangelo, Vermeer, Rembrandt, and Wren, among many others, students pay particular attention to the effects of religion, technology, urbanism, gender, sexual orientation, social class, and national identity on visual culture. (Mr. Fox.)

Spring term—Locuses on the architecture, painting, photography, and sculpture of Europe and the Americas during the 19th and 20th centuries. Students explore some of the major movementy in ait, including Impressionism, Cubism. Surrealism. Abstract Expressionism, and Post Modernism. Although students consider the political and social context in which works of art were created as well as varied aesthetic theories, the primary approach is formal: examining the way the work was made and its visual aspects. [Mr. Fox.]

Prerequisite: Open to Uppers and Seniors; completion of ART-200, 225, or 250 is recommended, but not required

ART-401/2 ART-401/3 Architecture II

ART-401 is designed as a continuation of ART-301 for students who wish to develop and expand their ideas further and pursue individualized projects. In consultation with the instructor, students will develop a term project that includes research and analysis, as well as a developed design. In this course there also will be the possibility to develop a multidisciplinary project in coordination with work in another class. A student wishing to take architecture for a full year should begin with ART-301 in the fall and continue in ART-401 for the winter and spring terms. [Ms. Boyajian]

Prerequisite: ART-301 or permission of department chair.

ART-402/3 Ceramics II

This course is designed for students who have taken ART-302 and wish to continue their study of ceramics. Since ART-102 is an advanced course, students will be asked to expand on their existing knowledge of ceramics, to strengthen their technical skills, and to seek sophisticated conceptual and personal solutions to given assignments. Class projects will range in topic but will stress the con-

cept of developing ideas in series a series of bottle shapes, a series of vase shapes, etc. Students can expect to do some outside reading, to attend slide and video presentations, and to visit the Addison Gallery and Peabody Museum Students also will participate in all aspects of the making and finishing of their work. This course has a required evening lab. (Mr. Zaeder)

Prerequisite: ARI 302 or permission of department chair

ART-403 Computer Media II: Animation (not offered in 2010-2011)

This course is for the student with keen interest in the production of computer animations. Animation is a time-intensive computer art technique. Students will create short 3-D animations and construct a stop-motion animation with high end digital still cameras. Traditional animation techniques such as roto-scoping and using a blue screen also will be demonstrated. Students will have the opportunity to choose a final independent project.

Prerequisite: ART-303 or permission of department chair

ART-405/3 Painting fl

In advanced painting, students build on already-acquired technical experience from Painting I while developing their own image ideas. Through a variety of technical processes and conceptual approaches, students explore different ways of working with water-mixable oils or acrylics. We will investigate different approaches that generate ideas for paintings. Painting in series, mixing media, innovating paint application, and utilizing collage and assemblage further extend the possibilities for thinking about what a painting can be. Emphasis is placed on cultivating solid technical skills as well as inventive and challenging approaches to subjects that encourage individual artistic and personal growth. Critiques, Addison Gallery visits. and exploration of artists' work and art historical issues relevant to the student's paintings are important components of this course. Painting II has a required biweekly evening lab. (Ms. Trespas)

Prerequisite: ART-305 or permission of department chair

ART-406/3 Photography II

This advanced course in film photography is designed for students who wish to continue to explore the medium of photography by developing a more cohesive portfolio beyond the basics. The class emphasizes the practice of using the camera for personal research, and students will be encouraged to seek an authentic point of view. Some assignments are given, but the focus of course work depends on the student's ability to define and execute a well-crafted portfolio of self-motivated content. Students may choose to create thematic work, such as a personal visual narrative or a project in the social documentary tradition. Group critiques are designed to enhance perceptual skills and provide feedback and direction for work in progress. Presentations and discussions, photographic book reviews, and visits to the Addison Gallery are offered

to fully explore the power of photography from historical and contemporary perspectives. Class meets four hours a week, with five hours of preparation. An evening lab is offered for informal instruction and individual critique. Rental film cameras are available from the art department. (Ms. Harrigan)

Prerequisite: ART-306 or permission of department chair.

ART-408/2 ART-408/3 Sculpture II

This class is an opportunity for students who have taken ART-308 to continue their investigation of sculpture. Another set of technical skills will be taught, along with readings, slide talks, and visits to the Addison Gallery. In developing projects, students will be asked to focus on a particular concept, approach, or set of materials throughout the term. There will be a required evening lab. (Ms. Zemlin)

Prerequisite: ART-308 or permission of department chair.

ART-409/2 ART-409/3 Video II

This course gives students with some background in video or computer media an opportunity to deepen their knowledge. Students will be asked to develop, shoot, and complete projects of their own choosing. Class times will include viewing and discussing the work of others to inform one's own work. Students who enroll in this course should have some previous camera and editing experience. (For this course students use the mini-DV cameras and non-linear editors of the Polk-Lillard Electronic Imaging Center.) The course will include classes dedicated to review of the editing software. Advanced students who wish to continue may enroll in ART-409 for more than one term. (Ms. Veenema)

Prerequisite: ART-309 or permission of department chair.

ART-420 The Quest for Identity: (s) Explorations in Film and Mixed Media

Open to Uppers and Seniors. As a culture we have always been fascinated by identity, by quests to forge one, or by the machinations to invent one. American artists Edward Hopper, Robert Frank, and Beverly Buchanan, for example, reflect observations of self or describe the identity of others relative to the world around them. For most of us, the search for identity is an unending process in a constantly changing, more global America. This search will be brought into focus through the viewing of films, discussions, and the creation of mixed-media projects based on students' personal ideas about identity. Open to Uppers and Seniors. (Ms. Crivelli)

Prerequisite: Foundation Course (ART-200, 225, or 250) or permission of department chair.

ART-500/0 Advanced Studio Art

(a yearlong commitment)

ART-500 provides Uppers and Seniors with the opportunity to broaden their art experience at an advanced level and also study in depth areas of their choosing. Students can use this course to develop and enhance their art portfolios, document work for college admission portfolios, or prepare Advanced Placement (AP) portfolios. In the fall term, students study broadly at an advanced level using a range of media and techniques. In the winter term students audit a 300/400-level course to focus on a specific medium, while also meeting weekly with the ART-500 class for critiques, readings, discussions, and Addison Gallery events. In the spring term, students work on supervised independent projects that are either disciplinespecific or cross-disciplinary in nature. As a culmination of the course students organize, curate, and install an exhibition of their work in the Gelb Gallery. Guest speakers, field trips, and visits to the Addison Gallery will augment the course. Attendance at a weekly evening lab is required. (Ms. Zemlin)

Prerequisite: Diploma requirement in art and at least one elective art course beyond, or permission of department chair.

CLASSICAL STUDIES

The following courses in classical studies are designed to provide students with a broad introduction to classical civilization through history, literature, thythology, and etymology. All courses are electives, open to the various classes as noted, and require no knowledge of Greek or Latin. Courses in those languages, offered by the Department of Classics, are described under World Languages.

CLAS-310 Etymology

(1 W 1)

Four class periods. Open to all classes. English has an immense vocabulary (far larger than that of any other language), over half of which is based on Latin and Greek roots. The words of this Greco-Roman inheritance are best understood not simply as stones in the vast wall of English, but rather as living organisms with a head, body, and feet (prefix, main root, and suffix), creatures with grandparents, siblings, cousins, foreign relatives, life histories, and personalities of their own; some work for doctors and lawyers, others for columnists, crusaders, and captains of commerce. Systematic study of a few hundred roots opens the door to understanding the meanings and connotations of tens of thousands of words in English, the language now rapidly emerging as the most adaptable for international and intercultural communication.

CLAS-320 Greek Literature

(F-W-5)

Four class periods. Open to all classes. A systematic study of the masterpieces of early European civilization as seen in their proper literary, intellectual, and historical contexts. In what is essentially a history of ideas, the major genres of epic, tragedy, comedy, satire, history, crotic poetry, and philosophy are stressed as aspects of the wider evolution of European thought. The major problems that still confront human life are explored through the writings of Homer, Aeschylus, Sophocles, Euripides, Herodotus, Thucydides, Aristophanes, Plato, and others.

ENGLISH

The diploma requirements in English are intended to establish competence in writing and reading. All Juniors take FNG1-100 and may not take FNG1-200. For new Lowers, this requirement is fulfilled by successful completion of FNGI-200, FNGI-300, and FNGI-310 New Uppers fulfill their requirement by successful completion of ENGL-301, ENGL-310, and three terms of English electives. International students who are new Uppers usually begin the sequence with FNGI 301 One-year American students and some one-year international students will begin with ENGL-495 for one or two terms, followed by electives in the spring term; these international students must be placed by the chair of the department. The remainder of the one-year international students begin with ENGL-400/1, /2, followed by a course designated by the department chair in consultation with the students' teachers. Any course so designated will fulfill diploma requirements. Seniors who are returning international students continue the sequence or select in accordance with placement by the department. Related courses, whose prerequisites vary, are listed elsewhere in this booklet.

Students in yearlong senior electives may select the elective for the winter or spring term, as may any other Senior.

All English courses meet for four prepared classes a week unless the course description states otherwise. No failed course may be made up simply by passing a makeup examination.

REQUIRED COURSES

ENGL-100/0 An Introduction

(a yearlong commitment)

ENGL-100 provides an introduction to the study of language and literature at Andover. In this junior course, which cultivates the same skills and effects pursued throughout the English curriculum, students begin to understand the rich relationships among reading, thinking, and writing.

ENGL-100 assents to Helen Vendler's notion that "every good writer was a good reader first." Accordingly, ENGL-100 students work to develop their ability to read closely, actively, and imaginatively. They study not only what a text means but also how it produces meaning. They seek to make connections as they read—perhaps at first only connections between themselves and the text, but eventually connections within the text and between texts as well. All the while, however, ENGL-100 students revel in the beauty, humor, and wisdom of the literature.

Over the three trimesters, ENGL-100 students read literature of various genres and periods. Every class reads Homer's Odyssey and at least one play by William Shakespeare. For the rest of the syllabus, teachers turn to

a great many authors. Among those whose work is most regularly selected are Ernest Hemingway, Toni Morrison, J.D. Salinger, and August Wilson.

ENGL-100 students practice several types of writing, primarily in response to what they read. They write at times in narrative, expressive, and creative modes, but their efforts focus more and more on critical analysis. They learn to conceive of writing as a craft to be practiced and as a process to be followed. Through frequent assignments, both formal and informal, ENGL-100 students come to value writing as a means of making sense of what they read and think. Attending carefully to their writing at the levels of the sentence, paragraph, and full essay, they learn to appreciate the power of the written critical argument. Although their work is substantially assessed throughout the year, ENGL-100 students do not receive grades during the fall trimester. At the end of the term, their report cards will indicate "Pass" or "Failure."

Lively, purposeful class discussions reinforce the lessons of reading and writing and often leave students with especially fond memories of their *ENGL-100* experience. The course prepares our youngest students well for the further challenges of their education at Andover.

ENGL-200/0 Writing to Read, Reading to Write

(a yearlong commitment)

Fall term—During the fall term of *ENGL-200*, classes focus on the writing process. Students are exposed to a variety of rhetorical modes, such as narration, description, analysis, comparison/contrast, cause/effect, definition, example/illustration, process, and argument. By the end of the term, students should be able to organize, develop, and write cogent essays in six or seven of these modes. Teachers integrate a variety of reading assignments into their lessons on the writing process. During the fall term, classes also work deliberately on vocabulary development, clarity, grammar, mechanics, and punctuation.

Winter term—In the winter term, the focus shifts to reading and writing about poetry and short stories. While the course introduces literary terms and strategies for understanding poetry and fiction, the literature serves primarily as an opportunity for the students to work on writing skills, drawing on the lessons of the fall term and reinforcing argument and persuasion as patterns of thought that can guide the writer logically through a discussion of a poem or short story.

Spring term—In the spring term, the focus shifts again to reading and writing about longer literary works, such as the novel. Students continue to write in the modes introduced in the fall term and focus on organizing the essay. The spring term includes a project involving one of the texts and research to illuminate some element of the literature.

ENGLISH 300 AND 400

ENGL-300 and 400 emphasize writing about literature as a way to discover meaning; both encourage open discussion. Gradually, these courses stress longer and more sophisticated literary analyses. While emphasizing the analytical—both the close reading of texts and the focused writing that asserts a thesis and supports its points with extensive textual evidence—these courses also encourage other forms of expression, such as journals, narratives, role-plays, and parodies.

ENGL-300/4 The Story of Literature (T2)

(a two-term commitment)

All literature tells one story, the story of people's experiences—their dreams, their desires, their acts, their mistakes. ENGL-300 focuses on different genres of literature: tragedy and romance in the fall term and comedy and satire in the winter term. Inspired artists around the world and throughout time have created tragedies, comedies, satires, and romances, and in ENGL-300 students will explore these genres by reading short stories, poems, novels, and plays representing diverse historical periods, locations, and identities. In their writing, students will practice formal literary analysis in order to gain a greater appreciation for the artistic construction of a text and its cultural resonance.

ENGL-301/4 The Seasons of Literature for New Uppers (T2)

(a two-term commitment)

For new Uppers, *ENGL-301* conforms in spirit and essence to *ENGL-300*, but with more intensive attention to expository writing.

ENGL-310 Shakespeare

No writer has influenced the literature of the English-speaking world so much as William Shakespeare. He was both of his age and for all time. *ENGL-310* employs the perceptual and writing skills learned in the prior two terms and presents new, more complex problems and perspectives. Films and student performances of Shakespeare's plays complement the study of the plays as literary texts. A common text shared among all sections is *Hamlet, Prince of Denmark*.

ENGL-400/1 American Studies for ENGL-400/2 International Students

Primarily for, but not limited to, one-year students from abroad who are not yet ready for *ENGL-495*, this course provides intensive training in reading, literary fundamentals, and expository writing. The focus of this course is on American culture, values, and traditions as reflected in literature and other media. One or two terms of this course will provide students with the reading and writing skills required for success in other Senior electives. (Dr. Vidal)

SPECIALIZED COURSES

Specialized Courses, with the exception of ENGI 195, are open to students who have successfully completed ENGI 200 and 300-310 of 100 (A very few Uppers each year will be a lowed to take a senior elective in addition to the winter term of ENGI-300 and or ENGI-310. Permission for this special privilege must be granted by the English chair. Courses at the 500 level may require more than the standard four to five hours per week of honework. Each course has four class periods a week, unless specifically stated otherwise. While none of the department's electives requires yearlong participation, students may choose to remain in a vearlong elective. The courses below are offered in the academic year 2010-2011, unless otherwise indicated.

ENGL-495AA/1 ENGL-495AA/2 Strangers in a Strange Land

This course for one year students explores how strangers adapt to new places and new modes of being. Does one reinvent oneself, conquer the new or seamlessly assimilates Works to be considered might include Mary Shelley's Frankenstein. Shakespeares The Tempest Graham Greene's Our Man in Havana, and poetry by Yosef Komunyakaa, Elizabeth Bishop, and Carolyn Forche. In both terms, the emphasis will be on close reading and textual analysis. Ms. Curcil

WRITING COURSES

ENGL-501AB Writing Through the Universe of Discourse

This is a course for students interested in experimenting with many different genres of writing. Throughout the term, students create a portfolio of writing that includes essays, poetry, short fiction, literary criticism, autobiography, and letters. The course is designed to serve all kinds of students, but particularly those who would like to gain confidence in their writing skills. Once a week, students are invited not required) to join a Community Service writing workshop with Lawrence, Mass., elementary school students.

Readings include texts from a variety of cultures. Authors include Malcolm X. Martin Espada, Julia Alvarez, William Shakespeare, Sylvia Plath, Emily Dickinson, Piri Thomas, Raymond Carver, Franz Kafka, Leo Tolstoi, Stephen Biko, Louise Erdrich, Nikki Giovanni, Sandra Cisneros, Don DeLillo, William Blake, Amy Tan, Sherman A exie, Rita Dove, James Baldwin, Maxine Hong Kingston, Jimmy Santiago Baca, Gabriel Garcia Marquez, Anthony Morales, Bruce Smith, and Maya Angelou. (Mr. Bernieri)

ENGL-505AA Creative Writing: Poetry

F W 5)

This course is for students committed to reading and writing poetry. Students will be asked to write about poetry in addition to composing their own poetry. Although students are not expected to submit portfolios or samples of their work to qualify for this class, they must be serious about writing poetry. Previous experience helps, but it is not necessary. Mr. Robinson)

ENGL-505AB Creative Writing: Fiction (F.W.s)

This course is for students committed to reading and writing short fiction. Students will be asked to write about short fiction in addition to composing their own short fiction. Although students are not expected to submit portfolios or samples of their work to qualify for this class, they must be serious about writing fiction. Previous expe-

ENGL-506AA/3 Fresh Fiction: Advanced Writing Workshop in Contemporary Storytelling

rience helps, but it is not necessary. (Mr. Robinson)

This course is open to students who have completed a creative writing course successfully or who have an abiding enthusiasm for composing fiction.

Inspired by the freshest voices in fiction and screen writing today, this workshop allows writers to explore the artistic and thematic frontiers of contemporary storytelling. Over the course of the term students will work to create their own collections of stories or a novella. Gutsy stories, original characters, and vigorous editing/rewriting are our aims. Companion readings from writers like Zadie Smith, Chang Rae Lee, Sandra Cisneros, Khaled Hosseini. Nathan Singer, Bobbie Ann Mason, the Coen Brothers, and Jim Jamusch will offer inspiration. (Mr. Peffer)

ENGL-507AA/1 Play Writing

Each student is expected to write at least one one-act play in addition to certain exercises in monologue, dialogue, and scene-setting. The class reads aloud from students works in progress, while studying the formal elements in plays by important playwrights and reading selected liter ary criticism focused on drama. (Mr. Heelan)

GENRE COURSES

ENGL-510AA/1 Gothic Literature: Living in The Tomb

The course traces trends in Gothic forms, from its origins of the damp and dark castles of Europe to the aridity of the contemporary American landscape. Students will identify gothic conventions and themes such as the haunted house, family dynamics, apparitions, entrapment, secrecy, and the sublime. Students will read novels, short stories, and poetry spanning roughly 200 years in order to

explore questions about the supernatural, the psychology of horror and terror, the significance of fantasy and fear, the desire for moral closure, and the roles of gender, race, class, and sexuality. Probable selections include *The Castle of Otranto*, by Horace Walpole; *Faustus*, by Christopher Marlowe; *Rebecca*, by Daphne du Maurier; *Dracula*, by Bram Stoker; *The Turn of the Screw*, by Henry James; stories by Poe, Faulkner, Gaskell, Irving, Hawthorne, Gilman, Jackson, Cheever, DeLillo, Carver, and Oates; and poetry of Christina Rossetti, Thomas Gray, William Cowper, Louise Gluck, and Sylvia Plath. Possible films include *Affliction, The Royal Tenenbaums, A Simple Plan, Psycho*, and *The Cabinet of Dr. Caligari*. (Mr. Tortorella)

ENGL-510AB/2 Politics, Subversion, and the Heroic Tradition in Children's Literature

This course considers the role of the imagination in communicating and effecting cultural change. Students will be asked to apply a variety of critical theory for interpretation and discussion of the literature. Themes this course will explore include alternative realities, the nature of dreams, the function of the subconscious, and the use of allegory. Probable selections include The Adventures of Alice in Wonderland and Through the Looking Glass, by Lewis Carroll; Haroun and the Sea of Stories, by Salman Rushdie; The Wind in the Willows, by Kenneth Grahame; The Jungle Book, by Rudyard Kipling; The Wizard of Oz, by L. Frank Baum; The Pied Piper of Hamelin, by Robert Browning; The Secret Garden, by Frances Hodgson Burnett; A Child's Garden of Verses, by Robert Louis Stevenson; The Lion, the Witch and the Wardrobe and The Last Battle, by C.S. Lewis; and Grimm's Fairy Tales, Mother Goose, writings of Carlos Castaneda, and essays by Bettelheim and Zipes. Possible films include The Red Balloon and The Point. (Mr. Tortorella)

ENGL-511AA/3 Cinema Symbiosis: The Wire

This spring, Cinema Symbiosis will focus exclusively on David Simon's 60-hour Dickensian visual novel, The Wire. "The grand theme here is nothing less than a national existentialism," Simon wrote in proposing the series to HBO. "It is a police story set amid the dysfunction and indifference of an urban department—one that has failed to come to terms with the permanent nature of urban drug culture, one in which thinking cops, and thinking street players, must make their way independent of simple explanations." Simon later wrote of the series: "The Wire is dissent; it argues that our systems are no longer viable for the greater good of the most, that America is no longer operating as a utilitarian and democratic experiment. If you are not comfortable with that notion, you won't agree with some of the tonalities of the show. I would argue that people comfortable with the economic and political trends in the United States right now-and thinking that the nation and its institutions are equipped to respond meaningfully to the problems depicted with some care and accuracy on The Wire-well, perhaps

they're playing with the tuning knobs when the back of the appliance is in flames."

Building upon Simon's own descriptions, students in this course will not only examine *The Wire* as visual storytelling, but will also explore its acknowledgement of the complex interconnectedness of race, class, social policy, and ethics in modern-day America. In each of its five seasons, *The Wire* addresses different core topics, and students will engage with all: drugs and housing, the post-industrial economy, governance and politics, public education, and contemporary journalism. Throughout, students will recognize the ancient literary and philosophical tension between reality and perception, between seeing the truth and "juking the numbers."

To inhale *The Wire* in its entirety, students must devote three hours to attending class, at least seven hours to screening episodes, and at least four hours to reading each week throughout the term. Readings may include Mark Abramson and Ian Littman's *Innovation*, Steve Goldsmith's *The Twenty-First Century City: Resurrecting Urban America*, Lisbeth Schort's *Common Purpose: Strengthening Families and Neighborhoods to Rebuild America*, Sudhir Venkatesh's *Gang Leader for a Day: A Rogue Sociologist Takes to the Streets*, and William Julius Wilson's *When Work Disappears: The World of the New Urban Poor.* (Mr. Fox)

ENGL-511AB/2 ENGL-511AB/3 Media Studies

What does it mean to be fully literate in the information age? Working from the premise that all messages are constructed, we will examine the forces (explicit and hidden) that determine those constructions, as well as the ways in which our daily and multiple interactions with various media determine our sense of self, identity, truth, and desire. Students will read a range of media studies theory and then put those theories into practice by examining the language, images, narratives, and truth we encounter in traditional or alternative news sources, advertising, television, politics, sports, and other cultural institutions. This is a writing-intensive course, and students will be expected to write several pages every week.

The winter term will focus on the production and consumption of media, asking questions about the interests that own, produce, control, and sell the news, the blurry line between news and entertainment, the conventions of advertising, the rise of media conglomerates in the 1990s, and the emergence of convergence culture in the last decade.

The spring term will focus on questions of narrative, character, and identity as they shape and are shaped by conventions and transgressions of gender; by the literary modes of tragedy, comedy, and romance; by fads and trends; by technology and history; by heroism and nostalgia. (Ms. Tousignant)

ENGL-512AA/1 ENGL-512AA/2 Great Traditions in Literature: ENGL-512AA/3 The Epic Poem

This course studies the development of the epic poem through Classical, Medieval, and Early Modern contexts. Fexis include *The Iliad, The Odyssey, The Aeneid, Metamorpho es,* and *Moby Dick* (even years); *Paradise Lost* and *The Interno* (odd years). (Mr. McGraw)

ENGL-513AA/1 The Short Novel: Risk and Romance

This course uses a mix of seminar classes, films, and regular, indistidual student-leacher conferences to examine experimental short novels from around the world. Students learn to draw conclusions about the artistic and social forces that gave rise to these novels. Each term draws comparisons among works by Vonnegut, Mann, Jovee, Walker, Puig, Rulfo, Enchi, Duras, Achebe, Hemingway, McCullers, Camus, Salinger, Garcia, and others. (Mr. Peffer)

ENGL-514AA/1 Journalism

This course on print journalism recognizes the challenges all journalists face in their efforts to be fair and also accurate as they struggle 10 gather information and churn out lively copy under deadline pressure. The course is designed to teach essential journalistic judgment, skills for gathering and verifying news, and interviewing and writing techniques. Students will receive weekly assignments on deadline for news articles, feature stories, and opinion pieces, and will supplement this skills work with readings on the First Amendment, media ethics, and the law. We also will discuss the current radical transformation of newspapers in the digital age. Texts for the course are Journali m 101. by Nina Scott, and excerpts from The Elements of Journalism, by Bill Kovach and Tom Rosenstiel, as well as daily newspapers. Films will include Absence of Malice, All the President's Men, The Year of Living Dangerously, and Welcome to Sarajevo. (Ms. Scott)

ENGL-516AA/3 Contemporary American Poetry

This course will introduce students to poets and movements that have shaped the direction and contours of American poetry since World War II. Students first study the Beat Movement and then explore the so-called schools" of poetry—Black Mountain, New York, Contessional, et al. The course finishes with an exposure to poetry that is happening right now, which includes bicultural and multicultural poets. Most class time will be spent deriving themes through discussions of poets, poems, poetic movements, criticism, and theory. Poets include Ginsberg, Corso, Kerouac, Dylan, Waldman, Bukowski, Creeley, Olson, Levertov, Ashbury, O'Hara, Lowell, Plath, Berryman, Bishop, Rich, Dove, Hass, Kinnell, Hogan, Nye, Springsteen, and Colvin. (Mr. Tortorella)

ENGL-518AA/2 The Literature of Travel Writing

The British scholar Paul Fussell writes, Successful travel writing mediates between two poles the individual thing it describes, on the one hand, and the larger theme that it is 'about,' on the other. A travel book will make the reader aware of a lot of things—ships, planes, trains, donkeys, sore feet, hotels, bizarre customs and odd people, unfamiliar weather, curious architecture, and risky food. At the same time, a travel book will reach in the opposite direction and deal with these things so as to suggest that they are not wholly inert and discrete but are elements of a much larger meaning, a meaning metaphysical, political, psychological, artistic, or religious—but always, somehow, ethical."

In the course, students will read excerpts from travel literature over time and write three travel essays of their own. Writers may include Marco Polo, Christopher Columbus, Lady Mary Wortley Montague, Apsley Cherry-Garrard, Charley Darwin, Freya Stark, D.H Lawrence, Jack Kerouac, V.S. Naipaul, Paul Theroux, Margaret Atwood, Annie Dillard, and David Foster Wallace. (Ms. Scott)

ENGL-519AA/1 ENGL-519AA/2 ENGL-519AA/3 Twentieth Century Drama

This course will be devoted to the major dramatists and theatrical movements of the 20th century. Each term students will read plays from specific regions of the world in an attempt to locate the playwriting from that region within the world of dramatic literature, as well as come to grips with the issues with which the playwrights are dealing and the cultures from which their work is erupting. Approaching the plays through historical, cultural and political contexts, students will analyze how the best playwrights pose and dramatize important questions of the time, while revolutionizing conventional dramatic practice through the developments in Naturalism, Realism, and Symbolism (and various combinations of these).

Fall term—European Drama. Playwrights studied may include Ibsen, Chekhov, Strindberg, Brecht, Pinter, Stoppard, Pirandello, Beckett, and Shaw.

Winter term—American Drama. Playwrights studied may include O'Neill, Miller, Wilson, Albee, Norman, Wasserstein, Shepard, Kushner, Parks, Hwang, and Mamet.

Spring term—World Drama, Playwrights studied may include Fugard, Soyinka, Wolcott, Valdez, Garro, Wolff, Panikkar, Dattani, Xiaoli, and Hirata. (Ms. Chase)

SPECIAL TOPICS COURSES

ENGL-520AA/2 Gender Roles in Contemporary World Fiction

Love, family, and passion have always been popular literary themes in a variety of cultures. However, there are different ways in which each culture approaches these subjects, especially as they relate to gender roles and the

relationships between men and women (as well as men and men and women and women).

In this course, we will go on a "trip around the world," examining gender in a variety of contemporary cultural settings and comparing the fictional works that we will study to what we experience on a daily basis in American society. From traditional romantic obsession and rigid sex roles to challenges of these traditional roles and expectations, our texts will provide a variety of issues and perspectives to frame our discussions.

Readings include Machado de Assis, Dom Casmurro (Brazil); Rifaat, A Distant View of a Minaret (Egypt); Puig, Kiss of the Spider Woman (Argentina); Dangarembga, Nervous Conditions (Zimbabwe); Ensler, Necessary Targets (Bosnia). Films include The Crying Game, Thelma & Louise, The Adventures of Priscilla: Queen of the Desert, Strangers in Good Company, Angels in America, and excerpts from episodes of Sex and the City. (Dr. Vidal)

ENGL-520AB/1 Children in Literature: Growing Up in a Changing World

What does it mean to be a child? What defines a "good" or "bad" kid? Is there a certain age or type of behavior that separates children from adults? When and how do we "grow up?" Are our expectations for boys and girls different? Should they be? This course will explore how our conceptualization of childhood has changed over time by looking at a variety of sources: philosophical and psychological texts about children and representations of children in literature and film for adults, as well as some works aimed at young readers.

We will focus on the emergence of self within contexts of family and community, exploring the processes of identity formation in both Western and non-Western narratives. We will pay particular attention to an analysis of gender roles and of education within these stories, pondering the ways in which different societies and their values become perpetuated through their fictional children.

Readings include Alcott, Little Women; Twain, The Adventures of Tom Sawyer; Barrie, Peter Pan; Yezierska, Bread Givers; Golding, Lord of the Flies; Amado, Captains of the Sands; and poetry by Blake, Wordsworth, and Dr. Seuss. Excerpted material includes Locke, Some Thoughts Concerning Education; Bunyan, Pilgrim's Progress; Rousseau, Emile; and a variety of fairy tales. Theory by Freud, Bettelheim, and Ariès is featured, as are the films Central Station, Black Shack Alley, and Finding Nemo. (Dr. Vidal)

ENGL-521AA/1 Being, Thinking, Doing

Through reading and discussing the expression of human values in selected works, students in this philosophy and literature course explore two broad questions: "How do people live their lives?" and "How should people live their lives?" Within this framework, students think reflectively about the beliefs they and their society have developed, and they look at the emergence of different epistemological, ethical, and political ideals and responses to life.

Readings may include The Autobiography of Malcolm X; Ellison's Invisible Man; Percy's The Moviegoer, Shakespeare's King Lear; Turgenev's Fathers and Sons; Vonnegut's Slaughterhouse-Five; excerpts from Agee and Evans' Let Us Now Praise Famous Men; Arendt's Eichmann in Jerusalem; Bonhoeffer's Letters and Papers from Prison; and brief selections from Aristotle, Descartes, Epictetus, Kant, Kierkegaard, Nietzsche, Plato, Schopenhauer, and Spinoza. (Mr. Fox)

ENGL-523AA/2 Modern American Literature— Rosebud: The Restless Search for an American Identity

Many of our enduring American works of literature and film, such as *The Great Gatsby, The Catcher in the Rye,* and *Citizen Kane,* center on the search for self. Through discussions on class, race, and gender, this course will present a series of American portraits while examining our changing society. Students will write personal narratives, as well as critical essays. Possible texts: *Continental Drift, Banks; The Awakening, Chopin; Fences, Wilson; Six Degrees of Separation, Guare. Possible films: <i>Citizen Kane; Far From Heaven; Tully; Transamerica; Hustle & Flow.* (Mr. Bardo)

ENGL-523AB/1 Welcome to the Apocalypse

Confronted with the complexity of the world's problems, one easily can feel like Wile E. Coyote, well beyond the cliff's edge, staring at the abyss below. Presented as a senior seminar, this course will explore critical issues facing us, such as refugees and immigration, wealth and resource disparities, terrorism and individual rights.

Central to our collective endeavor will be the examination through fiction and weekly films of the contemporary conditions that create conflict. In particular, the course will concentrate on the factors that promote the idea of an enemy based on cultural constructions that marginalize others as different. The term will culminate with class projects.

Possible texts: Waiting for the Barbarians, Blindness, The Road, and The White Tiger. Films may include Tsotsi, Children of Men, Babel, Slumdog Millionaire, and Dirty Pretty Things. (Mr. Bardo)

ENGL-525AA/1 ENGL-525AA/2 ENGL-525AA/3 Feasts and Fools: Revelers and Puritans in Literature and Life

This course explores what Jean Toomer called "the good-time spirit" and its opposite, as manifest in major literature, including drama and film. We examine and make use of the literary critical distinction between ingenuousness, innocence, aureation, and richness on the one hand and sophistication, irony, exposure, and disillusionment on the other (in the words of C.S. Lewis, "golden" vs. "drab"). Correlations proliferate from this basic one: cavalier/puritan, rhapsodic/satirical, innocent/experienced, carpe diem/dulce et decorum est, hedonist/stoic, romantic/neo-classical, Dionysian/Apollonian. Along with critical writing on literature, the students occupy themselves

will place and testivities in their own lives as well as in other critities with the impulse to trust ones appetites, and with the meeting place of that impulse and the critical plactices that define sumptuary limits. Personal critish has lead to anthropological architectural, performancy and semiological testifich projects creative with the angle of the ports. Texts vary but have included Mrs. District Street Peaving the Overn Knight, Love in the Lie of Charal Mean in Proteone. The Deht to Pleasure The Gardon Flatt Day. Satinday, The Short Striet of In Cites of Cannery Real House of Sand and Fog. The Cultivity fore Country, and Dancing in the Streets, Films are included Babette. Feat Sense and Senibility and Chocat. Dr. Wilkin)

ENGL-526AA/1 Literature of Resistance, ENGL-526AA/2 Resilience, and Triumph: ENGL-526AA/3 Narratives of the Natives

This course will use texts and films from a variety of cultural find represented in the American curriculum-his laded will be material from the following groups. South Africans. Chinese. Native Americans, and latin Americans. Lach selected novel film will tell a story of others cultural experiences from the perspective of the natives of that culture lach term the course will include an exploration and understanding of the values, cultural norms, and traditions of other cultural groups to bear witness to these groups, as well as to dispel some myths about the said cultures. The course also will study the countless ways in which humans dominate other humans, and how the oppressed organize themselves in resistance and use their voices through literature and film to share their stories.

Course participants will engage in literary and visual experiences of other worlds. Class discussions and frequent writing assignments will abound, and students will be encouraged to develop their own voices as they study the power of language in these narratives and undertake a topic of interest to research. There will be student-led seminars and end of term projects or papers, which will give students an epportunity to explore in depth a topic of their choice, culminating in class presentations. The chosen readings are as follows:

Fall term — Mother to Mother by Sindiwe Magona, Snow For er and the Secret Fan by Lisa See: Love Medicine by Louise Erdrich. In the Time of the Butterflies by Julia Marer, and the film Long Nighti Journey into Day, a document in that takes us into post-apartheid's South Africa.

Winter term — Lucky Child by Luong Ung; Indian Killer by Sherman Alexic So Long a Letter by Mariama Ba: and the film L. Vorte, the story of a Guatemalan brother and six er who flee persecution at home and journey north with a dream of finding a new home in the United States.

Spring term — Filling Leave. The Memoir of an Iri irited Chinge Daughter by Adeline Yen Mah. A Long Wil Give Mimorr of a Box Soldier by Ishmael Beah; and Irik b. Louise Erdrich. Mrs. Maqube a

ENGL-527AA/3 The Novel After Modernism

In the middle of the 20th century, writers began to move past both the period and the styles that we stil call modern "What does it mean for a novel to be past modern? Postmodern! Past postmodern! Can a contemporary novel still be a modern novel. In this course we will study the recent progress of the novel genre. We will read aggressively, studying four or five novels. Our authors may include Russell Banks, J.M. Coetzee, Robert Coover, Don Del illo, Joan Didion, Ralph Ellison, Gabriel Garcia Matquez, Cormac McCarthy, Toni Morrison, Haruki Murakami, Vladimir Nabokoy, Joyce Carol. Oates, Thomas Pynchon, Philip Roth, Jose Saramago, and Zadie Smith. Mr. Domina)

INTERDISCIPLINARY COURSES

ENGL-530AB/3 HIST-SS578

Brazilian Cultural Studies

not offered in 2010 2011)

Four class periods. See also 1/15T-55578. One of the largest countries in the world and with a diverse population, geography, and economic base. Brazil is poised to become one of the "giants" of 21st-century global development. This course will look into important moments in the political economic, literary, and artistic histories of the country in the 19th and 20th centuries, attempting to understand how Brazil came to be what it is today and what it could become in the future. We will pay specific attention to the nation's formative years after independ ence from Portugal in 1822, the coffee boom of the early 20th century, the Vargas and Kubitschek regimes, the military dictatorship of the 1960s and 1970s, and the new democratic period of recent years. These historical moments will be studied through the lens of the literature. film, art, and music being produced at the time. Of special interest will be the work of Machado de Assis. Gilberto Freyre, Clarice Lispector, Jorge Amado, rhe participants in the 1922 Week of Modern Art movement, and the protest songs and films depicting life under the military regime. A student in this course is eligible for credit in either English or history. A student who wishes to receive English credit should sign up for ENGI -530AB. a student who wishes to receive history credit should sign up for HIST-555"8. (Dr. Vidal)

SINGLE AUTHOR COURSES

ENGL-535AA/2
ENGL-535AA/3 James Joyce

Five class periods. The first term is devoted to *Dubliners* and *A Portrait of the Arti t*; the second term to *Ulysse*. The purposes of the course are to develop the skill to read important and difficult works without the aid of study guides or other secondary material, and to follow the

development of Joyce as an artist. Although the course may be taken in either term, the student gains a better sense of Joyce's genius by enrolling for two terms. (Mr. O'Connor)

ENGL-536AA/3 The Play's the Thing: Advanced Shakespeare

While most of us meet Shakespeare in a book, his true home is on the stage. The course will cover three plays in depth, and close reading and textual analysis will be our primary focus. Emphasis also will be placed on learning to direct, stage, and speak Shakespeare "trippingly on the tongue," so that we can appreciate and learn from the Bard the way he intended.

ENGL-537AA/1 ENGL-537AA/2 ENGL-537AA/3 Writers in Depth

This course will be devoted to one British novelist each term. Each writer is both a representative of a particular time and an innovator who significantly influenced the history of the novel.

Fall term — Jane Austen. Once taken at her word that her work was very limited, Austen was one of the vital links between the 18th- and 19th-century novelists. As a class, we will read *Northanger Abbey, Emma,* and *Persuasion.* Students who have not read *Pride and Prejudice* will do so, while those who have will read *Sense and Sensibility.* We will also watch Ang Lee's *Sense and Sensibility,* as well as selections from adaptations of other Austen novels.

Winter term—Charles Dickens. We will read *Bleak House*, which many consider Dickens's masterpiece, an extraordinary blend of comedy, gothic mystery, and social protest, told through an intersecting double narrative. We also will read poetry by Blake and others, as well as study paintings and photographs from the time.

Spring term — Virginia Woolf. This term will be devoted to Woolf, who, if she had written no fiction, would still be well known for her brilliant essays. We will read her two greatest novels, *Mrs. Dalloway* and *To the Lighthouse*; several of her short stories and essays; and selections from her autobiographical writings. To put Woolf's work in context, we will view some of the work of the Post-Impressionist painters; read from the war poets (the First World War is central to her novels); and compare her style with that of her fellow Modernist novelists Joyce and Faulkner. (Ms. Fulton)

ENGL-538AA/3 Edith Wharton

One of America's most gifted literary figures, Edith Wharton created characters at the turn of the last century that we encounter with a shock of recognition today. Her fiction peels back the curtain on the Gilded Age to show us the power of money to seduce, delight, repress, obsess, and destroy men and women at all levels of society. Her elegant prose reverberates with humor, biting satire, and deep psychological insight. We will read the novels *The*

House of Mirth and Summer as well as short stories from the collection Roman Fever and Other Stories and The New York Stories, and we will watch the films The Age of Innocence and The House of Mirth. (Ms. Scott)

CULTURE STUDIES

ENGL-5401N/3

Post-Colonial India: Politics, Religion, and Literature through Salman Rushdie's Midnight's Children

Using Salman Rushdie's *Midnight's Children* as the core text, this course looks at 20th- and early 21st-century India's history and religion with a focus on literature. With Rushdie's novel as a chronological guide, the course will explore colonial India, the nationalist movement, Independence and Partition, and India's growing industrial and political power. We also will consider Rushdie's novel through the lens of post-colonial theory, its reception in India and abroad, and its considerable literary legacy throughout the formerly British colonial world. (Ms. Curci)

ENGL-541AA/1 Yeats and the Irish Tradition

Since the establishment of Ireland's independence in 1921, the unique contribution of this nation's literature and culture has gained increasing international recognition. W.B. Yeats, the first of four Irish Nobel laureates and one of the dominant poets of the 20th century, played a key role in the revival of Irish culture. The course will focus not only on Yeats' poetry and drama, but on the great artists who preceded and followed him. Poetry, fiction, and drama, as well as art, music, and film, will be considered as part of this course, including some of the following: Poetry: Selected Poems, W.B. Yeats; Opened Ground, Seamus Heaney; The Water Horse, Nuala Ni Dhomhnaill. Fiction: The Year of the French, Thomas Flanagan; Reading in the Dark, Seamus Deane; Castle Rackrent, Maria Edgeworth. Drama: Selected Plays, W.B. Yeats; The Playboy of the Western World and Riders to the Sea, J.M. Synge; Waiting for Godot, Samuel Beckett; Translations, Brian Friel. Film: Michael Collins (director, Neil Jordan), The Field (director, Jim Sheridan), Cal (director, Pat O'Connor). (Mr. O'Connor)

ENGL-541WS/2 Will the Harbinger

Through reading Shakespeare and studying the ideas of six philosophers, students in this course explore Terry Eagleton's intriguing statement: "Though conclusive evidence is hard to come by, it is difficult to read Shakespeare without feeling that he was almost certainly familiar with the writings of Hegel, Marx, Nietzsche, Freud, Wittgenstein, and Derrida." How might Shakespeare's plays of the late 16th and early 17th centuries anticipate some of the most significant ideas developed in the 19th and 20th centuries? Readings focus on Shakespeare's plays

read less frequently elsewhere in the curriculum, as well as on selections from each of the six philosophers. [Mr. Fox)

ENGL-542AA/1

ENGL-542AA/2 An Introductory Survey of ENGL-542AA/3 African American Literature

This seminar course offers an overview of African American literature through reading and writing assignments, discussions, student led seminars, and visiting lecturers on art, music, and history. Trips to museums and jazz or blues club performances enhance the students' appreciation of cultural contexts. The fall term focuses on the early writings, on the literature of slavery and freedom, and on the literature of Reconstruction. In the winter, students read the literature of the Harlem Renaissance and African American expressions of realism, naturalism, and modernism. In the spring, the Black Arts Movement and African American literatures, including film and drama, since the 1970s are the foci of the course. (Ms. Hawthorne)

ENGL-543AA/3 Contemporary Caribbean Literature: Better than Spring Break in Jamaica

Bearing a historical legacy of slavery and colonialism, the Caribbean today is viewed by many people as a tourist paradise, a place to relax and have "fun in the sun." Nevertheless, the fact that, in recent years, the Nobel Prize in laterature has been awarded twice to Caribbean authors St. Lucian Derek Walcott and Trinidadian V.S. Naipaul) is an important indicator of the quality of the cultural production in this archipelago. In this course, we will examine Caribbean literature from various islands, investigating their significance as representatives of a "common" (?) Caribbean experience. Through our responses to different literary texts (novels, plays, poems, essays), as well as to film and music from the region, we will ponder the issue of identity (both individual and collective), trying to articulate what it means to be "Caribbean" nowadays. Writers include Aimé Césaire, Derek Walcott, Jacques Roumain, Jamaica Kincaid, Julia Alvarez, Rosario Ferré, Esmeralda Santiago. Simone Schwarz-Bart, and V.S. Naipaul. Films include Sugar Cane Alley and Strawberry and Chocolate The course includes a service-learning component with the Dominican and Haitian immigrant communities in Lawrence, Mass. (Dr. Vidal)

ENGL-543AB/3 Haunted by Shadows: Viewing African Independence Through Lens and Literature

This course will offer a brief survey of literature written about sub-Saharan Africa in the latter part of the 20th century. Struggling with a myriad of issues, native African authors, as well as observers like V.S. Naipaul, consider in their works the impact of colonialism, corruption, globalization, poverty, tribalism, and other forces on nations as they emerge from European domination. Class discussions will focus on how these authors craft their fiction as political and social narratives. Films such as *Tiotsi*, *Darum's*

Nightmare and Hotel Ruanda will augment the texts, as will chapters from Mattin Meredith's The Late of Africa

Possible texts. Graceland, Albani, A Bend in the River, Naipaul; Master Harold, and the Boys, Fugard; Everything Good Will Come, Atta. The Madonna of Excelsior, Mda, July's People, Gordimet; Disgrace, Coetiec, Under African Skies Modern African Stories, Latson. (Mt. Bardo)

PERIOD STUDIES COURSES

ENGL-546AA/1 Modernism

In the waning hours of the Belle Époque, under the calamitous shadow of a devastating world war, the advent of the 1900s in Europe and America witnessed a profound change in the established social order. A breach of faith in the ability of traditional literary modes to represent the dissonance of modern life ensued. This course will examine stories of character in crisis: how does the modern hero struggle to find moral order and certainty in a world that no longer makes sense according to conventional structures of meaning? We will read Anglo-American masterpieces of high modernism, including *The Waste Land* by I.S. Eliot, *To the Lighthouse* by Virginia Woolf, and Absalom, Absalom! by William Faulkner. (Ms. Tousignant)

ENGL-547AA/1
ENGL-547AA/2 Self and "Other" in
ENGL-547AA/3 Renaissance Literature

Fall term-" 'I am not I': 16th-Century English Poetry"-"I love an other, and thus hate myself; / I feed me in sorrow, and laugh in all my pain," Sir Thomas Wyatt describes the paradox of love, translating the Italian poet Petrarch: "my delight is causer of this strife." In this course, we explore the tensions at play in English Renaissance love poetry, the ways in which the desired "other" of love poetry enables the poets of the 16th century to claim a unique "poetic self" even as the "other" imperils and destabilizes the integrity of this self. We consider the development of English meter and accentual-syllabic verse, the models for English poetry provided by Antiquity and the Continent, by Petrarchism (and its discontents), and the use of genres like the sonnet sequence and epyllion, or "miniature epic," genres which Georgia E. Brown describes as "marginal," exploring metamorphosis, "threshold states and points of coming into being." Among the poets we read are Wyatt, Henry Howard, Earl of Surrey, George Gascoigne, Queen Elizabeth I, Sir Philip Sidney, Sir Walter Raleigh, Samuel Daniel, Christopher Marlowe, and William Shakespeare, with whose early 17th-century sonner sequence we conclude

Winter term—"Masterless Men': English Renaissance Drama"—In 1576, when James Burbage constructed The Theatre in Shoreditch, just northeast of London's city wall and outside the jurisdiction of the city government, he was the first in England to provide actors with a perma-

nent venue for performance. Considered by the city authorities to be little more than vagabonds, "masterless men," actors, and playwrights helped create Elizabethan London's nascent literary subculture, a subculture that encompassed not only the theaters, impresarios like Burbage, and actors, but poets and pamphlet-writers, booksellers and printers, and the "wits," and urban sophisticates of the Inns of Court. In this course, we explore the dramas written by Shakespeare's contemporaries, tracing the development of English drama from Christopher Marlowe's revolutionary innovations in meter and rhythm, characterization, and plot in the late 16th century to the established conventions of the theater on the eve of the English Civil War.

Spring term—"'Metaphysical Wit': John Donne and 17th-Century English Poetry"-John Dryden famously remarked that John Donne "affects the metaphysics not only in his satires but in his amorous verses, where nature only should reign, and perplexes the minds of the fair sex with nice speculations of philosophy, when he should engage their hearts, and entertain them with the softnesses of love." Described in the 17th century as "witty" or "conceited" (from Italian, concetto, "concept"), the Metaphysical Poets (traditionally Donne, George Herbert, Henry Vaughn, Richard Crashaw, and Andrew Marvell) did not so much constitute a "school" of poetry, much less a movement, as developed an approach to poetry that drew upon both the intellectual ferment of the Renaissance and the changing rhythms of spoken English, experimenting with new ways in which to explore lyric sensibility during an era of tremendous change. Among the topics that we will consider in this course are Donne and the Metaphysical Poets' formal and metrical innovations, their use of irony and paradox, catachresis and hyperbole, and the so-called "Metaphysical conceit," the complex image (a book, a globe, the legs of a compass) with which the Metaphysical Poets draw startling analogies to the heightened experience of erotic or spiritual love, a process in which, as Dr. Johnson wrote, "the most heterogeneous ideas are yoked by violence together." (Mr. Bird)

ELECTIVE COURSES RECENTLY TAUGHT

BUT NOT OFFERED IN 2010-2011	
ENGL-501AA	Nonfiction Writing
ENGL-517AA	Last Acts: Remember Me?
ENGL-521AB	When I Paint My Masterpiece: Milton and Michelangelo
ENGL-522AA	Great Themes from America
ENGL-524AA	Rememories: Trauma and Survival in Twentieth-Century Literature
ENGL-528AA	Troubling Lit.: Contesting Authority In and Through Literature
ENGL-530AA	Florence in the Renaissance
ENGL-530AB/ HIST-SS578	Brazilian Cultural Studies
ENGL-540AA	Atomic America: American Literature 1945-Present/Service Learning

ENGL-544AA

ENGL-545AA

NOLA: "The Past as Prologue"

Literature of the Civil War

HISTORY AND SOCIAL SCIENCE

The study of history and the social sciences provides certain kinds of knowledge, skills, and understanding fundamental to a liberal education. An understanding of the American past continues to be a prerequisite for a participating citizen in a constitutional republic. Vital though such study as, an understanding of our nation alone is not enough. The examination of other cultures around the globe is crucial for broadening a student's understanding of an interdependent world. The Department of History and Social Science therefore integrates the study of international cultures throughout its program. Detailed information on the department, faculty courses, and other aspects of history and social science may be found at www.andover.edu history.

DIPLOMA REQUIREMENTS

Litering four year students must complete seven terms of departmental study successfully HIST-100 is required for virtually all ninth-graders. For these students, a trimester of 11157 200 taken in the 10th grade, and three terms of U.S. history HIST 300/4 or 300 5 and 310) complete the department's requirement. Students entering as 10thgraders must complete four terms of departmental study successfully a term of 11151-200 taken in 10th grade, and three terms of U.S. history as described above. Students entering as 11th graders must complete three terms of U.S. history successfully as described above or, if given credit by the department chair for a U.S. history course taken previously, three terms of other courses in the department. Students entering as 12th-graders and postgraduates are strongly encouraged to take courses in history and social science but are not required to do so unless If the department deems their previous preparation inadequate, in which case they will be required to complete a term of departmental study; or 2 they took U.S. history in ninth or 10th grade, for which the department ordinarily does not grant cred t.

For one-year international students, the diploma requirement is the completion of three trimesters of history, starting with HIST-320.

The Department of History and Social Science grants no credit for summer study, including work completed at Phillips Academy's Summer Session.

PLACEMENT

The department is dedicated to placing students in the appropriate level of history study. Such placement is ordinarily done by departmental review of a student's previous record.

On the basis of their previous academic record in history and social science and other subjects, some students may be advised to wait to begin the U.S. history sequence—a term begin in January or a year begin the to owing September.

Whether so advised by the department or not all students and their advisors should understand that there is no requirement that students begin U.S. history during the upper year. Indeed, many students with strong interests in other areas may find it to their advantage to postpone completion of the history and social science diploma requirement until senior year.

In all cases, final individual placement is determined by the department chair

Phillips Academy Archive

The Department of History and Social Science encourages the use of the Academy's extensive archival collection. For students who have completed *HIST-300* or *310* and are interested in pursuing work with the raw materials of history (including oral history), the Academy archivist offers a unique tutorial research opportunity on some aspect of the history of Phillips Academy or Abbot Academy Students undertaking archival study for credit should apply for an Independent Project through the Dean of Studies Office.

REQUIRED SEQUENCE IN WORLD HISTORY

Four-year students are ordinarily expected to complete IIIST-100 and IIIST-200 before enrolling in other courses in the department. Three-year students must complete IIIST-200 before enrolling in other courses in the department. Those Lowers seeking to postpone HIST-200 for academic reasons must consult with their advisors and petition the Dean of Studies Office.

World History 1000-1550: When Strangers Meet

a yearlong commitment

four class periods per week. For Juniors. When Strangers Meet explores and connects key episodes in world history that contributed to the emergence of a global network. The course begins with the rise and reach of Islam, then exammes the Mongol empire, and ends with the rise of European nation states and their subsequent competition overseas. By delving into specific stories, from Mansa Musa's pilgrimage to Mecca, to Marco Polos appointment to the court of Khubilai Khan, to the first interactions between European explorers and Native Americans, students examine the political, social, and cultural forces that shaped the development of society from 1000 to 1550. An equally important objective of the course is to hone the skills of historians and social scientists: the abilities to think objectively; to read and evaluate primary documents and secondary materials. to organize outline notes: to distinguish between more and less important evidence to employ in written and oral argument; to use library research tools; and to utilize a variety of textual, visual, statistical, and physical materials to understand and explain the past

HIST-200 The Early Modern World 1500–1800

Four class periods per week. For Lowers. Focusing on developments in the Atlantic Rim, this course offers an

interregional perspective on the period 1400–1750. The course examines the economic competition that drew the nations of Europe into the broader world. Through close scrutiny of the Atlantic Rim and the trade of goods and slaves, students probe the intertwining of social, political, and economic relations that developed during this time. As in *HIST-100*, a central aim of the course is to enhance student development of the central skills of historical analysis and exposition. Particular emphasis is placed on the skills of critical reading and historical writing.

REQUIRED SEQUENCE IN UNITED STATES HISTORY

HIST-300/4

The United States (T2)

(a two-term commitment)

Four class periods. For Uppers and Seniors. This course, along with *HIST-310*, completes the department's diploma requirements. The sequence emphasizes three goals: a survey knowledge of American history through World War II; the acquisition of skills by daily exercises in reading, note-taking, and writing; and in-depth study of organizing themes.

HIST-310 The United States

(F-S)

Four class periods. For Uppers and Seniors. Students must take *HIST-310* in the term immediately following their completion of *HIST-300*. The focus is on the United States after World War II.

Prerequisite: Successful completion of HIST-300/4 or 300/5.

Students completing this course who wish to take the College Board Advanced Placement examination should check with their teachers, since extensive review is required.

HIST-320/4 Topics in United States History for International Students (T2)

(a two-term commitment)

Four class periods. A course for entering Seniors for whom English is a second language. The intention of this course is to recognize the particular needs and strengths of students. The content is focused around key questions and issues in United States history. These include how a "democracy" emerged in America, the enduring dilemma of race and ethnicity, the rise of the American economy, and America's role in the world. The course emphasizes writing and language skills by gradually increasing the complexity of assignments and the amount of reading.

SURVEY OF MODERN EUROPEAN HISTORY

HIST-SS480/ Disease and Medicine in the
United States: Pox and Pestilence
(Term TBD)

Four class periods per week. Open to Uppers and Seniors. See also SCIE-480. In recent years, historians have begun

to understand the impact of disease on the human story and have incorporated it into the more traditional narratives. In common with other parts of the world, the history of the United States has been profoundly influenced by infectious disease. In this course we invite you to come along on a multi-disciplinary journey to explore the impact of disease on the American experience in the 19th and 20th centuries. After exploring the pre-contact situation in the Americas, we will focus on syphilis, smallpox, bacterial sepsis, cholera, yellow fever, malaria, tuberculosis, influenza, polio, HIV/AIDS, and bioterrorism agents such as anthrax. Students will research the role these diseases played in the social, military, and political history of the United States together with the science and medicine that developed in response to them. This is a research seminar and students will use a variety of sources to write a term paper. There is no final examination. A student in this course is elegible for credit in either history or science. A student who wishes to receive history credit should sign up for HIST-SS480; a student who wishes to receive science credit should sign up for SCIE-480. (Ms. Doheny and Dr. Hagler)

HIST-SS485/ Out of Tune: Music and the State in the Twentieth Century

(s)

Four class periods per week. Can governments control culture? What effect can political oppression have on an artist's work? What does it take to be accepted by a totalitarian state as a legitimate composer? Can you determine the real intentions of a composer working under a repressive regime? While some composers enjoyed approval and even served the purposes of the state, the 20th century is rife with examples of composers whose work was compromised, neglected, even forbidden. The rise of the technology of mass media also aided governments in their use of music. Hitler and Stalin, for example, were both masters of propaganda and were acutely aware of the power of music to influence people.

The course includes an exploration of the work of Richard Strauss, Dmitri Shostakovich, and Aaron Copland, amongst others, as well as the attitudes of the governments under which they worked. It ends with an examination of the artistic deprivations imposed by the Cultural Revolution in China. Students also will research a case study of their choice. A student who wishes to receive history credit should sign up for *HIST-SS485*; a student who wishes to receive music credit should sign up for *MUSC-485*. (Ms. Doheny and Mr. Walter)

ADVANCED COURSES

Advanced courses are open to students who have successfully completed at least one term of *HIST-300* or, in rare cases, with the permission of the department chair. Each course has four class periods a week, unless noted otherwise. These courses may be taken for a term only, but students may choose to remain in two-term or yearlong elective sequences.

HIST-SS500/2 American Popular Culture

In this course, students will examine the history of popular culture in the United States. The course will ask students to engage with a variety of popular culture forms (material culture, visual and aural culture, popular literature, etc.) and will introduce them to methodologies from different historical fields and perspectives. Students will investigate popular culture as evidence of the attitudes, assumptions, values, and anxieties of a society. Students will be encouraged to explore the contested meanings of culture, community, and membership in the United States as they cultivate an awareness of the ways popular culture has shaped—and been shaped by race, class, and gender. Students will study both commercial and noncommercial aspects of popular culture, as well as consider how new forms of technology have altered the ways popular culture is produced and consumed. The course will examine the important role that American popular culture plays—and has played—in globalization. By looking at the products of popular culture historically, students will sharpen their abilities to read critically the popular culture of their own time. (Ms. Ainsworth)

HtST-SS520 Economics I: Macroeconomics (F. W. s) and the Global Consumer

lour class periods per week. The course introduces students to the basic principles of macro- and microeconomics and their application and relevance to national and international public policy. Students examine the development of the contemporary global economy and use basic theoretical tools to analyze current issues. Classes consist primarily of discussions, although the course also employs role-playing, debates, guest speakers, films, and student reports on their term projects. Students completing this course are eligible to enroll in HIST-SS521 and/or HIST-SS522.

Fall term—Limited to Seniors. Coupled with HIST-SS521 in the winter, the fall course will prepare students to take both the macroeconomics and microeconomics AP exams.

Winter term — Preference to Seniors. Students enrolling in *HIST-SS520* in the winter will be prepared to take the macroeconomics AP exam.

Spring term — Preference to Seniors. Students seeking opportunities to develop a basic understanding of the discipline prtor to attending college are encouraged to enroll, although those enrolling in the spring will not be prepared for an AP examination.

$\begin{array}{ll} \text{HIST-SS521} & \text{Economics II: Microeconomics} \\ \hline (w) & \text{and the Developing World} \end{array}$

HIST-SS521 continues the introduction to economics begun in HIST-SS520 Students utilize the basic principles learned in HIST-SS520 and study microeconomics, theory of the firm, the organization of markets, and the role of governments in all areas of the global economy. Special attention is given to development economics, resource markets, questions concerning racial and gender

wage discrimination, and public sector issues such as health care and the economics of the environment. Students also study a range of economic development models and complete an applied research project using such models in relation to a contemporary developing country. Classes consist primarily of discussions, simulations, problem sets, and guest fectures.

Prerequisite: Successful completion of HIST-55520

HIST-SS522 Economics Research Colloquium

This research colloquium investigates public policy issues in the field of economics. Iopics include the debates over sustainable growth, tax reform, supply-side economics, labor organization, national industrial policy, pollution, population growth and welfare policy, and the ethical responsibilities of business. Classes center around discussion of individual students' works in progress: a term paper and presentation on an issue of choice are required. There is no final examination.

Prerequisite: Successful completion of HIST-SS520.

HtST-SS530 International Relations

This course will introduce the student to international relations by investigating the major schools of thought in international relations. The class also will examine the historical setting in order to understand emerging developments in various areas of the world. Events in Asia, Africa, the Middle East, Europe, and the Americas will be addressed as the current international situation unfolds. Class discussion is a major component of this course. (Mr. Gurry)

HIST-SS531 Comparative Government

(F-W-5)

This course introduces students to the world's diverse political structures and practices. A comparative study of six nations—Britain, Russia, China, Nigeria, Mexico, and Iran—serves as a core for the course. By examining the political implications of different types of social and economic development, students become familiar both with general political concepts and with a broad array of specific issues, and they are able to use their knowledge as a template for examining how other countries respond to global challenges. Students may choose to write an in-depth paper in lieu of a final exam. The course prepares students to take the AP examination in Comparative Government and Politics, though this is not its primary goal.

HIST-SS532/1 HIST-SS532/2 East Asia

Each of these courses can be taken separately. If taken as a sequence, they offer students a comprehensive introduction to three of the world's most important countries, the region they share, and their relations with the rest of the world. When practical, these classes engage in collaboration with Chinese and Japanese language classes, respec-

tively. There are term-long film series, and students use extensive intranet sites as resources and in daily assignments. (Mr. Drench)

Fall term (Modern China)—Four class periods per week. Following a rapid survey of Chinese history, the class concentrates on modern China since the early 19th century. Required reading includes selections from The Search for Modern China by Jonathan D. Spence and its accompanying documents anthology. Students write a research or other major paper or a series of short essays. There is no final exam.

Winter term (Modern Japan and Korea)—Four class periods per week. This course briefly explores the Tokugawa era before focusing on Japan and Korea since 1868. Students are offered an introduction to Japanese culture and to an intensive examination of modern Japanese and Korean issues. Students read two required texts, A Modern History of Japan (2nd edition), by Andrew Gordon, and The Two Koreas, by Don Oberdorfer, as well as other occasional readings and a series of films. Students write a research or other major paper or a series of short essays, and engage in three role-plays. There is no final exam.

HIST-SS533/1 HIST-SS533/2 The Middle East

Each of these courses can be taken separately. If taken as a sequence, they offer students a comprehensive introduction to a broad swath of the world in which Islam is the most widely practiced faith and with which the United States is intimately involved. Stretching from Morocco to Kashmir, from the Balkans to Sudan to the former Soviet Central Asian republics, this vast area includes the world's oldest crossroads in the heart of the Middle East and a contemporary cauldron of issues competing for our attention. The class will feature guest speakers, a film series, and opportunities for corresponding via e-mail with students in the region. Andover's intranet and off-campus Internet sites are used extensively as resources and in daily assignments. (Mr. Drench)

Fall term (*The Middle East Heartland*)—Four class periods. The fall term concentrates on the interior Middle East and North Africa. We survey history from the dawn of Islam to the present day, and then examine selected issues in depth. These issues have included the Israeli-Palestinian conflict, the Gulf War, statelessness, political Islam, terrorism, women and minorities, water and oil, the Iraq War, and the post-9/11 world. During the term, students are assigned several books to read. Other readings have included journal articles and primary documents. Students write a research or other major paper or a series of short essays, and engage in role-plays or contribute weekly reports from online media sites they follow regularly throughout the term. There is no final exam.

Winter term (*The Greater Middle East*)—Four class periods. The winter term concentrates on the area between the Persian Gulf and the borders of Russia and China. There is a historical survey highlighting major themes, followed by an in-depth investigation of modern and contemporary

issues. These have included political Islam, Afghanistan's instability, Iran's revolutions and nuclear program, the partition of India and the Indian-Pakistani rivalry in its Kashmiri and nuclear dimensions, regional energy-related issues, and the emergence of Muslim-majority states in Central Asia following the breakup of the Soviet Union. Students are assigned one or two books to read and/or choose another title from a varied booklist. Students write a research or other major paper or a series of short essays, and engage in role-plays or contribute weekly reports from online media sites that they follow regularly throughout the term. There is no final exam.

HIST-SS534/2 (w) Africa, Ecology, and the Global Economy

Africa ranks among the most resource-rich and least densely populated regions of the world. Why, then, are so many countries racked by poverty, disease, and war? Using resource endowments and global trade as our point of departure, we will examine the modern history of sub-Saharan Africa. In addition to discussion of common readings in fiction and nonfiction, each student will choose a nation, develop its current economic and environmental profile, and trace the roots of that nation's experience back through the 20th century to the colonial period. The course will include mastery of some basic concepts in ecology, economics, and international political economy, and require regular readings assigned and delivered online. The term's work will culminate in a mock roundtable of formal country briefs to the United Nations Environment Programme in Nairobi. Open to Uppers and Seniors. (Dr. Shaw)

HIST-SS535/3 Introduction to Latin America

This one-term course will introduce the student to many of the basic issues and themes that contribute to an understanding of Latin America. The class will deal briefly with the region's common history, the pre-colonial and colonial experiences. Rather than attempt a full survey, the course will review in some depth historical and contemporary issues in Brazil and Mexico, by far the largest countries of the region. Regionally, the class will look at a number of common themes: the New Left in Latin America; issues of U.S. foreign policy; common economic problems and prospects; regional integration, etc. Each student will be asked to look at a given Latin American country, invoking this thematic material as appropriate. The goal is to understand this important and neglected region, in its diversity and commonality, as its many links with the United States become ever more pressing. (Mr. Perry)

HIST-540/1 HIST-541/2 HIST-542/3 Mo

Modern European History

Each of these courses can be taken separately. One term does not serve as a prerequisite for another. If taken as a sequence, these courses offer students an overview of the economic, social, political, and intellectual history of modern Entope from the late Middle Ages to the formation of the European Union Readings will include Merrin ans A History of Modern Europe, primary solitices, iterature, and a variety of secondary teadings.

fall term 11350/1789 Four class periods Topics include The Renaissance, the wars of religion, the rise of absolute states the new philosophy of science, dynastic tivalties 18th century industrialization, and the Inhightenment Ms Doheny)

Winter term— 1789-1914 Four class periods—fopics include. The French Revolution and Napoleon, the hidustrial Revolution, the revolutions of 1848, national ism and national unification, liberalism political and cultural responses to a changing world, and European imperialism. IMs. Mulligan.

Spring term (1914-1992) Four class periods—Topics include The Great War, the Russian Revolution, the post war. Great Depression—fascist movements, the Second World War, the rebuilding of Europe, decolonization. Lastern Europe during the Cold War, the collapse of communism, and the European Union—Ms. Mulligan)

HIST-SS571 Gender Studies

(12-5)

How does your moment in history shape your sexuality and your identity as a man or a woman? How does your culture shape those same aspects of your self? How do differences of gender create cross cultural misunderstanding? Who decides what is feminine or masculine? How have mass media shaped our beliefs about gender? This course will include reading, discussions, films, guest speakers, short papers, and a final research project. There is no prerequisite and there is no final examination. (Dr. Rotundo

HIST-SS572 Nuclear Power and Weapons: Proliferation and Response

mot offered in 2010-2011

This seminar follows the evolution of and reaction to atomic energy and The Bomb, from the discovery of fission in 1938 on Otto Hahn's table in Nazi Germany, to Hiroshima, the Cuban missile crisis of 1962, the START talks, SDI and Chernobyl in the 1980s, and the increased danger of proliferation and nuclear terrorism after the Cold War into the 21st century. Historians, chemists, physicists, political scientists, and journalists are among those who tell the story in lectures, documents, and secondary accounts. Readings include Joseph Cirrincione, Bomb Scare, Richard Smoke. National Security and the Nuclear Dilemma, and Bulletin of Atomic Scientists articles. The course entails class seminars, field trips, films, readings, a research project, a period test, and a final examination.

HIST-SS574 Expansion and Indian Policy in 19th-Century America: "Kill the Indian, Save the Man"

not offered in 2010-2011

In this course students will explore the dramatic and often tragic events that accompanied the rapid expansion

of white America in the 19th century. With the Louisiana Putchase in 1803. Thomas Jefferson hoped to realize his dream of expanding the United States. The journeys of Lewis and Clark and other explorers helped open up the continent and make the dream a reality. The tematkib's rapid expansion of white America permanently a tered the way of life for native peoples as they faced intrusion into their traditional homelands. Throughout the 19th century the white government developed policies to deal with the Indian problem from assimilation to removal, from reservations to allotment. In this course, students will examine these policies and the race theories that under pinned them. How influential, for example, was the measurement of human skulls by Samuel Morton for his Crania Americana? What did it mean to kill the Indian and save the man?" And how, then, could white officials justify the destruction of the buffalo in the name of progress. Students will use the collections at the Peabody Museum, together with traditional written source materials, to uncover white and Indian perspectives as the continent came under the control of the U.S. government (Mrs Doheny)

HIST-SS575 Abolitionism in Black and White (w,s)

Offered in winter and spring terms, this IP seminar explores the American anti-slavery movement through the lives and work of abolitionists, both black and white Among the questions we will address are:

- How did black and white abolitionists differ in motivation and approach?
- · How did enslaved people themselves resist slavery?
- White abolitionists believed that the slaves should be freed, but did they believe that former slaves should enjoy rights equal to those of whites?
- How was the threat of violence (armed uprising) used in anti-slavery arguments?

Both secondary and extensive primary sources will be used. After completing the introductory reading, each student will pick a topic to research and write about. Members of the seminar will meet regularly to discuss their research with one another and will also have regular individual meetings with the instructor. The major research paper or project will be due at the end of the term.

Students interested in taking this IP seminar should apply to be an Abbot Independent Scholar (application available in the Dean of Studies Office. I neel ment is limited to five students. (Mrs. Chase)

SEMINARS IN HISTORY & SOCIAL SCIENCE

These seminars are designed for Seniors, though Uppers may enroll with permission of the instructor. Pending adequate staffing and sufficient enrollment, the department will offer the following seminars in 2010–2011.

HIST-SS577C The Founders and Their World

Those who founded the American republic confronted challenges that seem strikingly familiar: nation-building; terrorism; a ballooning national debt; use and misuse of the American military force; losing the respect of Europe; government suspension of civil liberties; and nasty presidential campaigns and disputed elections. This seminar invites a deeper understanding of the group of Americans "present at the creation." Although they joined in making a revolution, they ultimately disagreed violently on the meaning of that revolution and its results. Making extensive use of primary documents and of recent appraisals of Washington, Jefferson, Adams, Franklin, Hamilton, Madison, and others, students will develop their own understanding of these individuals and how they met the challenges of their time. Investigating those who "invented" the nation will raise questions such as the following: Why are there so many founding fathers and, apparently, so few founding mothers? Have historians overlooked figures that should be considered part of this group? Why did few of these "apostles of freedom" oppose slavery? Why did former colleagues and friends turn into bitter enemies? Why did so many of the founders die profoundly disillusioned with their new America? Students are expected to participate actively in seminar discussion and to write a research essay. There is no final examination. (Mr. Henningsen)

(s) The U.S. from Roosevelt to Roosevelt: America in the First Four Decades of the 20th Century

Four class periods per week. This course focuses on U.S. history starting with the Progressive Era, the 1920s, and the New Deal. As we examine the major reform movements of the Progressive Era, we will see how they were transformed by war and the nation's postwar reaction. We will look at the continuities between the Red Scare of 1919-1920 and the social conflict of the "Roaring Twenties." As we study Franklin Roosevelt's administration in depth and its response to the Great Depression, we also will look at the WPA and other government attempts to reshape American culture. We also will study the response of the press, politicians, and others to the disturbing news of Hitler's repression of the Jews, as well as Eleanor Roosevelt's efforts to help refugees escape Europe. We will explore selected topics in politics, social history, and the culture of the first four decades of the 20th century. (Ms. Dalton)

HIST-SS578/3

ENGL-530AB/3 Brazilian Cultural Studies (s) (not offered in 2010–2011)

Four class periods. See also *ENGL-530AB*. One of the largest countries in the world and with a diverse population, geography, and economic base, Brazil is poised to

become one of the "giants" of 21st-century global development. This course will look into important moments in the political, economic, literary, and artistic histories of the country in the 19th and 20th centuries, in an effort to understand how Brazil came to be what it is today and what it could become in the future. We will pay specific attention to the nation's formative years after independence from Portugal in 1822, the coffee boom of the early 20th century, the Vargas and Kubitschek regimes, the military dictatorship of the 1960s and 1970s, and the new democratic period of recent years. These historical eras will be studied through the lens of the literature, film, art, and music being produced at the time. Of special interest will be the work of Machado de Assis, Gilberto Freyre, Clarice Lispector, Jorge Amado, and participants in the 1922 Week of Modern Art movement, as well as the protest songs and films depicting life under the military regime. A student in this course is elegible for credit in either English or History. A student who wishes to receive English credit should sign up for ENGL-530AB; a student who wishes to receive History credit should sign up for HIST-SS578. (Mr. Perry and Dr. Vidal)

$\begin{array}{c} \textbf{HIST-SS579} \\ \hline (\text{F}) \end{array} \quad \textbf{Europe 1914-1945: War and Peace}$

Four class periods per week. Why did Europe become the battleground for two world wars fought within 25 years of each other? This seminar will examine the political, social, and economic conditions in Europe that set the stage for the bloodletting of the first half of the 20th century. The First World War caused the collapse of empires, the death of millions, and a fissure dividing an idealized old Europe and a disconcertingly modern new one. In the 1920s and 1930s the redrawn map of Europe, socialism, fascism, and Nazism all set the stage for the next great conflagration, while the art and literature of those years expressed key cultural shifts. The Second World War brought horrors that resonate to this day: Auschwitz, the siege of Leningrad, Stalin's purges, and the firebombing of Dresden to name just a few. When the war finally ended it would take a remarkable shift in thinking to reconstruct a war-torn continent. Readings will include historical narrative, literature, and memoirs. Independent reading, research, and writing will be the basis for assessment. There is no final examination. (Ms. Mulligan)

ADVANCED INDEPENDENT RESEARCH IN HISTORY AND SOCIAL SCIENCE

The Department of History and Social Science encourages highly qualified and motivated Seniors to research and write on topics of their own choosing, working on a tutorial basis with individual instructors. Such tutorials, which will require permission of both the supervising instructor and the department chair, may be undertaken as department-sponsored independent projects for one term, two terms, or the entire year.

MATHEMATICS

The mathematics curriculum is built around a core sequence of eight trimester courses three of elementary algebra, two of geometry, one of intermediate algebra, and two of precalculus topics. The completion of these eight trimesters will satisfy diploma requirements, but two additional trimesters are required before a student may enter calculus. Placement of new students in the appropriate first course is made by the department, which considers the record in previous schools, the results of a self-administered placement test in elementary algebra that is sent to newly admitted students in the spring, and the course program chosen by the entering student.

Is pically students entering with no prior study of algebra start with MAIII-100, those with a partial year of algebra enter MAIII 150. If the results of placement testing indicate a need for algebra review, then students who have not taken geometry start with MAIII 190 and continue to MAIII-210 in the winter.

New students who have taken one year of elementary algebra and one year of geometry will satisfy diploma requirements by taking MATH-320, 330, and 340. On the basis of our placement test, MATH-300/4 may be required for some students before MATH-330 and 340.

Students who plan to take a College Board SAT H Subject Test in mathematics should schedule the exam at the test date as close to the end of the appropriate math course as possible. Students who plan to take the SAT H Math Level HC should do so after finishing MATH-360; those who plan to take the Level IC exam should do so after finishing MATH-340.

The majority of students take courses beyond the required level. MATII-350 and MATH-360 complete the precalculus sequence. The department offers many electives beyond precalculus, some of which lead up to and beyond Advanced Placement examinations of the College Board in calculus, statistics, and computer science.

Every student enrolled in a mathematics course must have a TI-84 graphing calculator. No other models will be used or supported by the department. No calculator that has CAS (Computer Algebra System) capabilities, including, but not limited to, the TI-89. TI-92, and TI-Voyager, may be used for departmental exams.

COURSES LEADING TO SATISFACTION OF THE DIPLOMA REQUIREMENT

MATH-100/0 Elementary Algebra

a yearlong commitment

Five class periods. A yearlong course for students who have had little or no algebra. Stress is placed on an understanding of the elementary structure and language of the real number system on the man pulative skills of simpli-

tying expressions and solving first- and second-degree equations, and on the study and graphing of polynomial functions. Work is done with word problems, inequalities, triational numbers, and right triangle trigonometry.

Prerequisite: None

MATH-150/4 Elementary Algebra (T2)

(a two term commitment)

Eve class periods. A two term course for students who have had some algebra. Stress is placed on the manipulative skills of simplifying expressions and solving first- and second-degree equations, and on the study and graphing of polynomial functions. Work is done with word problems, inequalities, irrational numbers, and right triangle trigonometry.

Prerequisite: A half to a full year of algebra

MATH-190 Elementary Algebra

(1-

Five class periods. A course for students who enter with a full year of algebra and who would benefit from a brief review of algebra. Stress is placed on the manipulative skills of simplifying expressions and solving first- and second-degree equations, and on the study and graphing of polynomial functions. Work is done with word problems, inequalities, irrational numbers, and right triangle trigonometry.

Prerequisite: A full year of algebra

MATH-210 Geometry

(1-W-5)

Five class periods. A course for students who have had a strong ninth-grade algebra course but little or no geometry. This course is a thorough and systematic presentation of standard synthetic Euclidean geometry. Emphasis is placed on the need for precision and clarity in the writing of formal proofs.

Prerequisites: A complete course in elementary algebra and good algebraic skills.

MATH-220 Geometry

(F W-5)

Five class periods. This course continues the work of MATH-210, with increased emphasis on the algebraic and numerical aspects of geometry

Prerequisite: MATH-210

MATH-280/0 Geometry and Precalculus

(a vearlong commitment)

Five class periods. A yearlong course for extremely able entering students who have completed with distinction an intermediate algebra course but have not completed a yearlong geometry course. The course covers Euclidean geometry (both synthetic and coordinate) and elementary functions. This course completes the diploma require-

ment and prepares students to enroll in MATH-350 or MATH-380/4.

Prerequisite: Credit for one year of elementary algebra and one year of intermediate algebra.

MATH-300/4 Algebra Consolidation (T2)

(a two-term commitment)

Five class periods. A two-term course for students who have completed a yearlong geometry course and would benefit from algebra review prior to entering the precalculus sequence. The course begins with a comprehensive review of elementary algebra and concludes with topics in intermediate algebra (as listed in the course description of *MATH-320*). Students with a (T2) grade of 4 or higher in this course enter *MATH-330* in the spring. Students with a (T2) grade of 3 or below in *MATH-300/4* enter *MATH-320* in the spring.

MATH-320 Precalculus

(F-W-S)

Five class periods. For returning students, this course is taken after *MATH-220* (*Geometry*). Topics include properties of real numbers; factoring; fractional and negative exponents; radicals; absolute value; solutions of linear, quadratic, and radical equations; systems of equations and inequalities; and word problems. In addition, students are introduced to the more advanced features of the TI-84 Plus graphing calculator.

Prerequisite: MATH-220 or its equivalent.

MATH-330 Precalculus

(F-W-S)

Five class periods. An introduction and exploration of functions with abstraction. Multiple representations of a function—as a table of values, as a graph, and as an algebraic rule—are a central theme. Elementary functions (polynomial functions and inverse functions, in particular) and their transformations, compositions, and applications are emphasized.

Prerequisite: MATH-320 or its equivalent.

MATH-340 Precalculus

(F-W-S)

Five class periods. This course focuses on rational, exponential, and logarithmic functions. The TI-84 Plus is used for continued study of non-linear data sets with special attention to sets that grow exponentially and logarithmically. Elementary work with arithmetic and geometric sequences is included. Note that entering Seniors whose prior work has not satisfied the diploma requirement must complete *MATH-340* or *MATH-400*.

Prerequisite: MATH-330 or its equivalent.

MATH-350 Precalculus Trigonometry

(F-W-S)

Five class periods. An exploration of the circular functions: sine, cosine, and tangent. Topics include right triangle trigonometry, simple harmonic motion, applications, and proofs of trigonometric identities.

Prerequisite: MATH-340 or permission of the department.

MATH-360 Precalculus Parametric and Polar Curves

Five class periods. Students will learn how to represent points, sketch curves, and describe motion in two-dimensional space using parametric equations, polar coordinates, and vectors. In addition, students will study the graphs of the conic sections—parabolas, ellipses, and hyperbolas. *MATH-360* is the final course in the precalculus sequence.

Prerequisite: MATH-350 or its equivalent.

MATH-400 Elementary Functions II

(F)

Five class periods. A course primarily for entering Seniors who need to satisfy the diploma requirements in mathematics. The course focuses on functions and their applications, including polynomial, exponential, logarithmic, circular, and trigonometric functions. Strong emphasis is placed on graphing and the use of graphs as an aid in problem solving.

Prerequisite: Credit for three years of high school mathematics or permission of the department.

ELECTIVE COURSES

Only courses with sufficient enrollment will be given.

MATH-380/4 Accelerated Precalculus (T2)

(a two-term commitment)

This two-term course begins with a review of polynomial

and rational functions and proceeds to cover logarithmic, exponential, and trigonometric functions, inverse functions, parametric equations, polar coordinates, vectors, complex numbers, and sequences and series. Upon successful completion of *MATH-380/4*, students will be ready to study *MATH-580*.

Prerequisite: Successful completion of MATH-280/0 with a grade of 4 or higher or placement by the department.

MATH-410 Probability

(w)

Four class periods. Includes sample spaces, counting problems, sampling, conditional probability, random variables, expected value, variance, standard deviation, binomial and normal distributions. The computer is used on applications that are too time-consuming to perform by hand and to simulate experiments for which there are no models.

Prerequisite: MATH-350 or its equivalent.

MATH-470 Introduction to Discrete Mathematics and Programming

Live class periods. This course blends a study of programning using the Python programming language, with mall ematics relevant to computer science. Students learn how to design simple algorithms and write and test short programs in Python. The course covers Python symax and sixle, as well as data types, conditional statements, iterations loops, and recursion. Selected mathematical topics include sets, number systems, Boolean algebra, counting, and probability. A grade of 4 or higher in this course qualities a student for COMP-500, AP Computer Science I.

Prerequisite. MAIH 350 or higher or permission of the department

MATH-480 Analytic Geometry

12

Lour class periods. This course is an extension of earlier work on lines and curves in the plane. It includes extended locus problems and further study of the conic sections: parabolas, ellipses, and hyperbolas, and their simple rotations. The course includes an introduction to the algebraic description of three space: vectors, curves, planes, simple surfaces, and their intersections.

Prerequisite: MA711-360 or its equivalent.

MATH-500/5 Advanced Mathematics [T2]

a two-term commitment

Four class periods. Primarily for Seniors, but open to other students who want to continue the study of functions and get an introduction to calculus. The calculus topics will include limits, problems of optimization, rates of change, areas under curves, and lengths of curves.

Prerequisite: MATH-350, 400, or an equivalent course in trigonometry and elementary functions.

MATH-510 Calculus

F

Five class periods. Primarily for Seniors. Topics covered include a review of functions and graphing, limits, continuity, determination of derivatives and integrals from graphs of functions (not from their formal definitions).

Prerequisite: MATH-360 or its equivalent.

MATH-520/5 Calculus [T2]

(a two-term commitment)

Five class periods. This is a continuation of MATH-510. Topics covered include the definite integral, the Fundamental Theorem of Calculus, further differentiation of functions, techniques and applications of integration. The most successful students will be in a position to do the AB Advanced Placement examination in calculus.

Prerequisite: A grade of 3 or higher in MATH-510 or permission of the department

MATH-530 AP Statistics I

111

Five class periods. The first term of a yearlorg sequence that prepares for the Advanced Placement examination in Statistics. This term primarily covers the exploratory analysis of data, making use of graphical and numerical techniques to study patterns, and developing plans for data collection of valid information.

Prerequisite: MAIII 360 or permi ion of the department

MATH-530/5 AP Statistics II (T2)

la two-term commitment

Five class periods. A continuation of MATIL 530, finishing the syllabus for the Advanced Placement examination in May Topics include probability as the tool for producing models, random variables, independence, normal distribution, simulation, sampling, statistical inference, confidence intervals, and tests of significance.

Prerequisite: A grade of 3 or higher in MATH-530.

MATH-560 AP AB Calculus I

(5)

Five class periods. This is the beginning of the four-term calculus sequence that, together with MATH-570, covers the syllabus of the AB Advanced Placement examination. This term focuses primarily on differential calculus: limits, continuity, derivatives, and applications of derivatives. Some integral calculus may be covered if time permits. Graphical, numerical, and analytic methods will be used throughout the course.

Prerequisite: MATH-360 or its equivalent, with no grade lower than a 3 in MATH-340, 350, and 360.

MATH-570 AP AB Calculus II

(F)

Five class periods. This course continues the work of MATH-560 in preparation for the AB Advanced Placement examination. Topics include integration and applications of integral calculus.

Prerequisite: MATH-560 completed with at least a 3 or MATH-580.

MATH-570/5 AP AB Calculus II [T2]

(a two-term commitment)

Five class periods. A continuation of MATH-570, finishing the syllabus for the AB Advanced Placement examination.

Prerequisite: MATH-570 completed with at least a 3 or MATH-590

MATH-575/0 AP Accelerated AB Calculus

(a vearlong commitment)

Five class periods. A yearlong course in calculus that begins only in the fall. Satisfactory completion of this course prepares students for the College Board AB Advanced Placement examination. This course does not

prepare students for *MATH-650*. This course may require more than the standard four to five hours of homework per week.

Prerequisite: MATH-360 or its equivalent, with no grade lower than a 4 in MATH-340, 350, and 360. Those students who do not meet this requirement should take either MATH-510 or MATH-560.

MATH-580 AP BC Calculus I

(s)

Five class periods. This is the beginning of a four-term calculus sequence recommended for students who are well prepared in precalculus. With *MATH-590* it covers the syllabus of the BC Calculus Advanced Placement examination. Topics covered include primarily differential calculus: limits, continuity, derivatives, the Chain Rule, related rates, and the Mean Value Theorem. Some integral calculus is also covered. Graphical, numerical, and analytic methods are used throughout the course.

Prerequisite: MATH-360 or its equivalent, with no grade lower than a 4 in MATH-340, 350, and 360. Those students who do not meet this requirement should take either MATH-510 or 560.

MATH-590 AP BC Calculus II

(F)

Five class periods. This course continues the work of *MATH-580* in preparation for the BC Advanced Placement examination. Topics include integration and applications of integral calculus.

Prerequisite: MATH-580 completed with a grade of at least a 4 or departmental permission.

MATH-590/5 AP BC Calculus II (T2)

(a two-term commitment)

Five class periods. A continuation of *MATH-590*, finishing the syllabus for the BC Advanced Placement examination.

Prerequisite: MATH-590 completed with a grade of 3 or better.

MATH-595/0 AP Accelerated BC Calculus

(a yearlong commitment)

Five class periods. A yearlong course in calculus that begins only in the fall. Enrollment is limited to the most able mathematics students. Satisfactory completion of this course prepares students for the College Board BC Advanced Placement examination. This course may require more than the standard four to five hours per week of homework. In order to qualify for this course, returning students must perform satisfactorily on a special precalculus qualifying examination given the previous spring term.

Prerequisite: MATH-360 or its equivalent, with no grade lower than a 5 in MATH-340, 350, and 360, plus departmental permission and demonstrated excellence on entrance tests.

MATH-630/1 MATH-630/2

MATH-630/3 Honors Mathematics Seminar

Four class periods. Each term's seminar will be devoted to one topic, which will be developed in depth. The term's topic will be announced the previous term and might be Topics in the History of Mathematics; Numerical Methods and Approximations; Non-Linear Dynamical Systems—Instability, Chaos, and Fractals; Complex Analysis; Abstract Algebra—Groups, Rings, and Fields; Mathematical Models in the World Around Us; Topics in Discrete Mathematics; or Number Theory. Participants need to be prepared to work on one topic in great detail and, in some seminars, to work as part of a team on the solution of problems.

Prerequisite: Three terms of calculus or departmental permission.

MATH-651/5 Linear Algebra (T2)

(a two-term commitment)

Four class periods. For students of demonstrated ability and interest. Topics include vectors, lines and planes in space, and an introduction to linear algebra, including solving systems of linear equations using row reduction, Gaussian elimination, LU decomposition, matrices, vector spaces, and applications. There will be an emphasis on proofs throughout.

Prerequisite: MATH-590/5 or 595/0 and permission of the department.

MATH-661 Calculus of Vector Functions

(F)

Four class periods. This course covers functions of many variables, partial differentiation, gradients, vectors, vector valued function, multiple integration and its applications, line integrals, Green's Theorem, and Stoke's Theorem.

Prerequisite: MATH-590/5 or 595/0 and departmental permission.

COMPUTER COURSES

The mathematics department teaches introductory and advanced computer science courses and supports some more advanced independent study.

$\frac{\text{CoMP-310}}{(\text{F-W-S})} \qquad \begin{array}{c} \text{Computer Applications and} \\ \text{Web Page Design} \end{array}$

Five class periods. This one-term course exposes students to using a personal computer with business productivity applications such as Microsoft Excel and PowerPoint, as well as to the design of simple Web pages. The first half of the course covers the design of spreadsheets (data entry, formulas and functions, graphing, databases) and the creation of presentations (templates, inclusion of graphics and data, animation). After an overview of the hardware and software architecture of a PC and the Web, which starts the second half of the class, students learn the

HTMI language, which allows them to design their own Web pages. This course does not qualify a student for COMP-500.

Prerequisite: None

COMP-350 Introduction to Discrete | 1-x-x-y| Mathematics and Programming

Five class periods. This course blends a study of programming (using the Python programming language) with mathen aries relevant to computer science. Students learn how to design simple algorithms and write and test short programs in Python. The course covers Python syntax and style, as well as data types, conditional statements, iterations (loops), and recursion. Selected mathematical topics include sets, number systems, Boolean algebra, counting, and probability. A grade of 4 or higher in this course qualifies a student for COMP-500 IAP Computer Science II.

Prerequisite: MAIII 350 or higher, or permission of the department

COMP-500 AP Computer Science I

16

Live class periods. The first term of a yearlong course in algorithms, object-oriented programming, and data structures, guided by the College Board's AP Computer Science course description. The course covery Java language syntax and style, classes and interfaces, conditional and iterative statements, strings and arrays.

Prerequisite: A grade of at least 1 in COMP-350/MATH-170, or permission of the department

COMP-500/5 AP Computer Science II

(a two-term commitment)

Five class periods. This course is the continuation of COMP 500. The emphasis is on Object-Oriented Programming (OOP), searching and sorting algorithms, recursion, data structures, and the design and implementation of larger programs, including the College Board's required case study and team projects. This course completes the preparation for the Advanced Placement examination in computer science.

Prerequisite: COMP-500

COMP-630 Advanced Topics in Computer Science

Four class periods. This class offers students with experience and advanced knowledge of computer science the opportunity to explore specific topics beyond the College Board's AP curriculum. Topics will vary from year to year and may include Graphical. User Interface design, introduction to computer graphles, or introduction to database design. This course may require more than the standard four or five hours per week of homework.

Prerequisite: A grade of at least 5 in COMP-500 or permi ion of the department

MUSIC

DIPLOMA REQUIREMENTS IN MUSIC FOR STUDENTS MATRICULATING IN 2008 AND BEYOND

To fulfill the diploma requirement in the performing and visual arts, entering Juntors must earn no fewer than a total of four credits in art, music, and theatre and dance with at least one credit each in art and music. Entering I owers must earn no fewer than three credits in art music, and theatre and dance, with at least one credit each in art and music. Entering Juniors should have completed one credit in music and one credit in art by the end of the lower year. All entering students must take a music place ment test to determine at what level they should enter into the music curriculum.

Entering Juniors and Lowers without much previous experience in music will enter the curriculum by taking MUSC-225. Students who read music and who have played an instrument for several years, but who have not had much formal classroom study, generally enter the curriculum by taking MUSC-235. Students who read music, who are experienced on an instrument, and who demonstrate proficiency in music theory will be strongly advised to enter the curriculum by taking MUSC-400. (Note: Entering Juniors planning to take the yearlong AP Music Theory sequence during their upper or senior year who have placed into MUSC-400 may petition for permission to waive the requirement to complete at least one credit in music by the end of the lower year). Successful completion of MUSC-225 or MUSC-235 qualifies students for any 300-level Intermediate Elective (please note prerequisite for MUSC-320) and MUSC-485. Successful completion of MUSC-400 qualifies students for any 300-level and most 400-level electives.

Entering Uppers must take a term in either music or art. Entering Seniors should take one term of music, art, or theatre.

Students may take any 900-level performance-based course at any time and, if they desire, repeatedly. Please note, however, that ensembles for credit (MUSC-900 through MUSC-906) may be counted toward the diploma requirement in the arts only with prior permission from the Music Department. If permission is granted, students will be allowed to count ensembles for credit toward the diploma requirement only once, and may do so only after taking their first course in music. Instrument and Voice Lessons for credit (MUSC-910) cannot count toward fulfilling the diploma requirement in the arts.

The course in which a student is placed as a result of their performance on the music placement test is a prerequisite for all electives.

DIPLOMA REQUIREMENTS IN MUSIC FOR STUDENTS MATRICULATED PRIOR TO 2008

Upon matriculation at Andover, all entering students took a required music placement test to determine their level of entry into the curriculum. All four-year students who took MUSC-210 or MUSC-220 during their junior year completed their music diploma requirement. Many of the students who did not take MUSC-210 or MUSC-220 will take MUSC-225 in their lower year or MUSC-200 in their upper or senior year, followed by either an ensemble for credit (MUSC-900–906), any 300-level Intermediate Elective, or MUSC-485. Students who bypassed MUSC-200 as a result of their performance on the music placement test will satisfy their diploma requirements by taking two electives at the 300 level or beyond. The most advanced students will be strongly encouraged to take MUSC-400, the first term of the AP Theory Sequence.

APPLIED MUSIC

Courses in this section may be taken any time.

MUSC-900 Chorus

(F-W-S)

Two class periods. Open to all qualified students. The chorus is the Academy's major singing group composed of mixed voices, and it performs a variety of choral works, both sacred and secular. Those wishing to take the course on a non-credit basis need no previous choral participation, just a desire to work hard and attend all the rehearsals. Students taking the course for credit must be taking either voice lessons or a weekly seminar in music theory. If they have not sung in the chorus before, they may take the course for credit only with the permission of the instructor. This course, if failed, cannot be made up by examination. (Mr. Walter)

MUSC-901H Fidelio Society

(F-W-S)

Two class periods. Open to all classes. This small group of mixed voices is selected from the chorus (MUSC-900). It performs on numerous occasions throughout the year both on chorus programs and on its own. Its repertoire includes music of all types, early and modern, sacred and secular. Membership is by audition and is conditional upon continued good standing in the chorus. A student may take MUSC-901/H and MUSC-900 simultaneously, but only one will be for credit. This course, if failed, cannot be made up by examination. (Mr. Walter)

MUSC-902 Band

(F-W-S)

Two class periods. Open to all qualified students. Tryouts are held any time before the beginning of a term to test the student's ability and to arrange for seating. There are some school-owned instruments available for student use. All types of music for wind ensemble are rehearsed,

including marches, as well as classical, popular, and show music. Some sight-reading is done, and at least one public concert per term is given. Students taking this course for credit must be taking either instrumental lessons or a weekly seminar in music theory. This course, if failed, cannot be made up by examination. (Mr. Monaco)

MUSC-903H Jazz Band

(F-W-S)

One class period. Open to all qualified students. Auditions are held at the beginning of the term, as usually only one player per part is accepted. This ensemble is in a typical big band format and performs the repertoire of the groups of Count Basie, Duke Ellington, Thad Jones, and Woody Herman, as well as contemporary Latin jazz and jazz/rock fusion compositions. Membership is conditional on continued good standing in the band. Students taking this course for credit must either be taking instrumental lessons or a weekly seminar in music theory. This course, if failed, cannot be made up by examination. (Mr. Cirelli)

MUSC-904 Corelli Chamber Ensemble

(F-W-S)

Two class periods. Open to all classes, but membership consists primarily of Juniors and Lowers. Students taking *Corelli Chamber Ensemble* for credit attend Symphony Orchestra and Corelli Chamber Orchestra rehearsals each week. The Corelli Chamber Ensemble performs string orchestral literature and performs once each term. Students electing to take *Corelli Chamber Ensemble* for credit must either be taking instrumental lessons or a weekly seminar in music theory. This course, if failed, cannot be made up by examination. (Ms. Aureden and Ms. Barnes)

MUSC-905 Amadeus Chamber Ensemble

(F-W-S)

Two class periods. Open to all classes. Students taking Amadeus Chamber Ensemble for credit attend Symphony Orchestra and Amadeus Chamber Orchestra rehearsals each week. The Amadeus Chamber Ensemble performs string orchestral literature and performs once each term. Students electing to take Amadeus Chamber Ensemble for credit must either be taking instrumental lessons or a weekly seminar in music theory. This course, if failed, cannot be made up by examination. (Ms. Landolt)

MUSC-906H Chamber Orchestra

(F-W-S)

Two class periods. Open to all classes. Most of the music played is for string orchestra; the best winds in the school are invited to join for larger works. While Chamber Orchestra may be elected as a credit-bearing course, it is also an activity in which all are invited to participate. Students taking this course for credit must either be taking instrumental lessons or a weekly seminar in music theory. This course, if failed, cannot be made up by examination. (Mr. Orent)

MUSC-909 Private Instrument and Voice Lessons

non-credit!

On class period. Weekly non-credit lessons are available on all band and orchestral instruments and, in addition, on the prano-classical and azzi, organ, harpsichord harp, ruitar classical folk rock and jazzi, baggippes and voice.

Here is an additional fee for private lessons, information regarding this fee is available through the Department of Music Keyboard players are assessed a charge of \$30 per term for their use of practice pianos and or ans. The Academy owns many other instruments that may be recited for \$30 per term. I maneral assistance for essory and or instrument rental is available for students who major scholarship.

MUSC-910 Private Instrument and Voice Lessons

Iwo class periods per week, plus required attendance at three on-can puy concerts per term. Open to Lowers, Upper, and Seniors Juniors may circult in the course only with the permission of the department chair. One class meeting each week is a 30 - 45-, or 60 minute instrumental or voice lesson. The other weekly class meeting is a theory seminar that reinforces notational and aural skilly Lessons are available on all band and orchestral instruments and in addition, on the piano (classical and 1277) organ harpsichord, harp, guitar (classical, folk, rock, and 1277), bagpipes, and voice.

MUSC 910 as a credit course—instrumental lessons may be taken for credit or non-credit—is designed for students of all levels of ability who wish to study an instrument seriously. Instrumental study should not be entered into lightly. This work requires great commitment, self-motivation independence, and discipline In order that maximal progress is accomplished in minimal time, MUSC 910 credit students are expected to practice one hour every day. They must also prepare for a performance of their work at the end of the term MUSC 910 does not count toward fulfilling a credit of the arts requirement.

There is an additional fee for private lessons, information regarding these fees is available through the Department of Music. Keyboard players are assessed a charge of \$30 per term for their use of practice pianos and organs. The Academy owns many other instruments that may be rented for \$30 per term. Financial assistance for lessons and or instrument rental is available for students who are on scholarship. A MUSC-910 credit student who is classified by the Department of Music as a beginner MUST take MUSC-910 for two consecutive trimesters. MUSC-910, if failed, cannot be made up by examination

DIPLOMA REQUIREMENT COURSES

The following three courses contribute toward satisfying the diploma requirement in music. Performance on the music placement test determines with which course a student should enter the music curriculum.

MUSC-200 The Nature of Music

(1 11 1)

Lise class periods. Open to Uppers and Seniors on J. His course offers a basic introduction to music literature, thous, performance, and composition. Music from many cultures and historical periods is examined in an attempt to increase student awareness of the patterns of syntax and vocabulars, that comprise all musical language. Students compose several original compositions, and they also receive instruction on musical instruments. No previous experience in music is required.

MUSC-225 The Nature of Music A

1 W 5

Live class periods. Open to Juniors and Lowers only. This course offers a basic introduction to music literature, the ory, performance, and composition. Music from many cultures and historical periods is examined in an attempt to increase student awareness of the patterns of syntax and vocabulary that comprise all musical language. Students compose several original compositions, and they also receive instruction on musical instruments. No previous experience in music is required.

MUSC-235 The Nature of Music B

F-W 5

Five class periods. Open to Juniors and Lowers only. This course is designed for students who have had some experience reading music and playing an instrument. As a more advanced version of MUSC-225, it will include more extensive experiences in composition. Study of some core works of music literature from a variety of cultures will help develop listening skills, and there will be opportunities for live music-making in class.

INTERMEDIATE ELECTIVES

Each of the following upper-level courses requires a course taken previously at the 200 level or placement determined by performance on the music placement test.

MUSC-310 Jazz History

(12,-5)

Four class periods. This course begins by examining Jazz's mixture of African and European traditions and the subsequent pre-jazz styles of spiritual, blues, and ragtime. It then proceeds with a study of 20th-century jazz styles, beginning with New Orleans and culminating with the multifaceted creations of todays artists. Along the way the course pays tribute to the work of some of Jazz's most influential innovators, including Louis Armstrong. Duke Ellington. Count Basie. Billie Holiday, Charlie Parker, and Miles Davis. Original recordings, photographs, and videos are used extensively throughout the term. [Mr. Cirelli)

MUSC-320 Improvisation

(-)

Four class periods (two singles, one double). The art of improvisation has appeared in the musical styles of many different cultures, though it is best known for its central role in jazz performance. Students will begin by employing and refining their aural skills while improvising in the styles of early blues and jazz musicians. We will then explore more advanced harmonic concepts and begin improvising in increasingly complex styles, including those of contemporary popular music and modern jazz. Assessments will include quizzes, tests, transcriptions, and performance. (Mr. Cirelli)

Prerequisite: Open to intermediate and advanced instrumentalists and vocalists from all musical backgrounds who are familiar with music notation.

MUSC-330/1 MUSC-330/2 Topics in Western Music History

Five class periods.

Fall term—A one-term survey of Western music history focusing on 18th-century Classicism and 19th-century Romanticism. Music is viewed as a mirror of its time. Selected readings and repertoire from these musical time periods are studied through melody, harmony, rhythm, form, and style, as well as literature, religion, mythology, politics, and biographies.

Winter term—A one-term survey of Western music history focusing on music from the Medieval, Renaissance, Baroque, and Contemporary time periods. Included is the study of American music, including jazz and rock genres. Repertoire from these musical time periods is studied through melody, harmony, rhythm, form, and style, as well as literature, religion, mythology, politics, and biographies. (Mr. Lorenço)

MUSC-330A/3 Survey of Music History

Five class periods. A one term survey of Western music history. The course progresses chronologically from classical antiquity to the music of today, exploring along the way the religious, social, historical, and human issues surrounding music and its composition. Students who took MUSC-330/1 and/or MUSC-330/2 are not eligible for this course. (Mr. Lorenço)

MUSC-340 African Music and Culture

(w-s)

Honors/Pass/Fail. Four class periods. This course introduces the role of music in indigenous Africa with an emphasis on Yoruba Orisha Music and its linguistic dimension. It teaches both improvisational and ensemble skills, and cites Santeria, Candomble, Lucumi, Vodum, Shungo, and Bembe as examples of Yoruba-derived cultural and musical practices in the Americas. The school owns 20 African drums; as many as 20 students can be enrolled in the course. If failed, this course cannot be made up by

examination. In addition, this course cannot be taken as part of a four-course program. A \$30 fee is charged for the use of the school's African drums. (Mr. Alade)

MUSC-350 Film Scoring: Influencing
(s) Audiences through Sound
and Silence

Five class periods. In this course, students will study film music through extensive compositional exercises, analysis of film music from various genres and time periods, and readings regarding the historical uses and practices of film music composition. The course will begin with an introduction to a wide variety of compositional styles and techniques employed throughout the history of film, including changes resulting from increased technological resources throughout the century. Students will then engage in several composition projects in which they will compose music for film scenes from different genres, such as drama, horror, romance, and action/adventure. Though this course will primarily focus on music from the 20th century, students will also learn about how certain composers connected music to visual images in classical concert music prior to 1900. (Ms. Landolt)

Prerequisite: Successful completion of a 200-level music course.

MUSC-360 Electronic Music

(F-W-S)

Four class periods. This composition course is designed to enable students with modest notational skills to use electronic equipment in order to compose music. Equipment used includes mixing board, analog and fourtrack tape recorders, digital stereo and eight-track recorders, analog and digitally controlled synthesizers, drum machine, Macintosh computer, and sequencing software (Professional Performer). Projects include compositions in the style of musique concrète and other sound collages using synthesizers. Space limitations in the electronic music studio require that the course be limited to nine students per term. Students must reserve three twohour private work sessions in the studio per week. A lab fee of \$30 is charged for the use of the equipment. This course does not focus on popular music. MUSC-360, if failed, cannot be made up by examination. (Mr. Monaco)

ADVANCED ELECTIVES

Each of the following courses may require more than the standard four to five hours per week of homework.

 $\frac{\text{MUSC-400}}{(\text{F-w})} \quad \begin{array}{c} \text{Introduction to Theory} \\ \text{and Composition} \end{array}$

Five class periods. Entering students are expected to have at least a rudimentary familiarity with musical notation. A quick review of notation is followed by the study of scales, intervals, tonality, harmony, melodic organization, voice leading, four-part choral writing, harmonic progression, and style period analysis. Ear training skills are developed

through dictation and sight singing, and keyboard skills are introduced. Students acquire some skill and experience working with computer programs for ear training and music processing. During the term, students compose several original compositions. Students taking this course in the fall may combine it with MUSC 540 and MUSC 550 to form a yearlong AP theory sequence.

MUSC-540 Intermediate Theory and Composition

Live class periods. Continuing from where MUSC-1000 caves off, this course examines dominant seventh chords, eading tone sevenths, and nondominant seventh chords. In an attempt to bring theoretical knowledge into practice, score analysis is emphasized both in and out of class. Regular homework devoted to ear training, sight singing, and dictation begins to prepare students for the AP exam in the spring. During the term, students compose two major original works.

Prerequisite. MISC 100 or permi sion of in tructor

MUSC-550 Advanced Theory and Composition

Live class periods. Completing the theory sequence, the focus for this term is on preparation for the AP exam in May. This exam, it successfully passed, will ensure that students receive college credit for their year of music theory study. Material covered includes modulation, secondary dominants, serialism, and other 20th century compositional techniques, American popular song, blues, and jazze.

Prerequisite: MUS(-540) or permission of instructor.

MUSC-460 Advanced Electronic Music

Four class periods. This course continues to develop the skills and techniques introduced in MUSC-360. A \$30 lab fee is charged for the use of the equipment. MUSC-460, if failed, cannot be made up by examination.

Prerequisite: MUSC-360.

MUSC-485/ Out of Tune: Music and the State HIST-SS485 in the Twentieth Century

S

Four class periods (two singles, one double.) Open to Uppers and Seniors. See also HIST-SS485. Can governments control culture? What effect can political oppression have on an artist's work? What does it take to be accepted by a totalitarian state as a legitimate composer? Can you determine the real intentions of a composer working under a repressive regime? While some composers enjoyed approval and even served the purposes of the state, the 20th century is rife with examples of composers whose work was compromised, neglected, even forbidden. The rise of the technology of mass med a also aided governments in their use of music. Hitler and Stalin, for example, were both masters of propaganda and were

acutely aware of the power of music to influence people

The course includes an exploration of the work of Richard Strauss. Dmitri Shostakovich, and Aaron Copland, amongst other case stiidies, together with the attitudes of the governments under which they worked It ends with an examination of the artistic deprivations imposed by the Cultural Revolution in China Stiidenis will also research a case study of their choice. A student in this course is eligible for credit in either history or music. A student who wishes to receive history credit should sign up for IIIST-S5485, a student who wishes to receive music credit should sign up for MUSC-485. (Mr. Walter and Ms. Doheny)

Prerequisite: Successful completion of a 200-level music course

MUSC-500C Chamber Music (s) Performance Seminar

hour class periods. This summary course affords students an opportunity to apply their theoretical knowledge to practical music making through the analysis and performance of chamber music. The process of performance and its attending anxieties also will be studied through readings and exercises. Class work consists of sight reading, performing, coaching, and discussing chamber works and performance issues. Homework consists of individual practice, group rehearsal, and readings from books about performance. Students are expected to be advanced instrumentalists and they generally will have taken at least MUSC-400 Because different literature is studied each term, this course may be taken more than once.

Prerequisite: Permission of the department. If failed, this course cannot be made up by examination.

MUSC 500J Jazz Performance Seminar

Four class periods. This course affords students an opportunity to apply their knowledge to practical music-making through the analysis and performance of jazz. The process of performance and its attending anxieties also will be studied through readings and exercises. Class work consists of theory exercises, analysis of recordings, study of performance practices in each style period, and in-class performance. Homework consists of individual practice, group rehearsals, and reading assignments. Students are expected to be advanced instrumentalists and will have taken a 300-level music course. Because different literature is studied each term, this course may be taken more than once. (Mr. Cirelli)

Prerequisite: Permission of the instructor. If failed, this course cannot be made up by examination.

NATURAL SCIENCES

To participate fully in society, citizens require knowledge of scientific issues and an understanding of how those issues relate to their lives. People who are broadly educated and who also have special expertise in the sciences are vital to the well-being of our planet and its inhabitants. The science program is focused around four major goals.

In fulfilling the science requirement, Phillips Academy students should demonstrate:

- 1. They can do science. A student should pose testable questions and formulate hypotheses; design and conduct experiments; organize, analyze, and interpret results and information; conceptualize and reason through problems, both qualitatively and quantitatively; and articulate and present clearly and accurately ideas, results, and analysis in an appropriately selected format.
- 2. They are scientifically literate. A student should think clearly and critically about major issues relating to science; gain appreciation of and experience with the natural world; perceive the relevance of science to everyday life, including global environmental issues; and recognize the connections and interdependence among the traditional branches of science and between science and other fields.
- 3. They participate comfortably and fully in an inclusive community of learners. Students and teachers should work effectively with persons of varied backgrounds, interests, and abilities in scientific collaboration, perceive the needs of the individual, team, or community, and work to meet those needs.
- 4. They accept responsibility for the process of personal education. A student should play an active role in discussions, experiments, and decisions; ask questions, question answers, and maintain an independence of thought while engaged in learning; recognize that school is a piece of the continuum of lifelong learning, for science is a rapidly evolving field; and, hence, acquire skills that will allow one to learn beyond the halls of academia.

The diploma requirement in science is two yearlong science courses. A strong program will include some experience in biology, chemistry, and physics. Most four-year students take biology in ninth grade, followed by chemistry in 10th grade; however, individual interests, backgrounds, and abilities may indicate other appropriate sequences.

The division of natural sciences offers a variety of introductory and advanced courses, yearlong and term-contained in biology, chemistry, physics, and interdisciplinary fields. Staffing of yearlong courses is the first priority and students who wish to take a full year of science can be so guaranteed only by taking a yearlong course. Enrollment in term-contained courses is limited and determined by seniority.

BIOLOGY

Most Juniors will take *BIOL-100* as their introductory science course. Uppers and Seniors are placed in *BIOL-540* or 560, 570, and 580 by the department chair. In general, students who have had a year of biology and honors in chemistry, or have had AP Chemistry and AP Physics, will be in the 560, 570, 580 sequence.

Lowers may take biology only by special permission from the department chair.

BIOL-100/0 Introduction to Biology

(a yearlong commitment)

BIOL-100 is a five-hour course that includes significant time in the laboratory. This course is for Juniors. BIOL-100 is theme-based and focused on major biological topics. Studying a core text will be supplemented with other readings, writing assignments, and data analysis and interpretation. Students will learn a variety of study skills and will have an introduction to library research tools. Laboratory experiments and fieldwork are designed to acquaint students with fundamental biological principles and to build skills in the methods and techniques used to elucidate those principles.

BIOL-410 Topics in Ecology (Term TBD)

BIOL-410 is a five-hour course with time each week spent either in the laboratory or in the field. Open to Uppers and Seniors who have completed a yearlong science course; not open to students who have taken SCIE-500 (Environmental Science) or a 500-level biology course.

BIOL-410 will explore the scientific principles and concepts required to understand the interrelationships of the natural world. This course introduces basic concepts in the ecology of individual organisms, their populations, and the biological communities in which they live. Emphasis is on terrestrial plant and animal ecology. The historical, evolutionary, and ecological processes determining the distribution of ecosystems, habitats, and species are introduced. Students will learn to identify and analyze environmental problems, both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them.

BIOL-420 Animal Behavior

(F)

BIOL-420 is a five-hour course including time each week either in the laboratory or in the field. Open to Uppers and Seniors who have had one year of laboratory science, the course is designed to familiarize the student with the basic principles of animal behavior. The topics that receive the greatest emphasis are territoriality, aggression, mating strategies, courtship, parental behavior, migration, dominance, and the evolution of behavior patterns. Throughout the course, an effort is made to relate the behavior of animals to the behavior of humans. A project or a research paper will be required.

BIOL-421 Ornithology

151

BIOI 421 is a five hour course including time each week either in the laboratory of in the field. Open to Uppers and Seniors who have completed a yearlong science course.

No other group of chordares has captured the human imagination like birds. In the United States alone, approximately 30 million homes have installed birdfeeders, and the sale of feeders, seed, binoculars, and bird guides has become a milribillion-dol ar business. The goal of this course is to provide an in depth look into the world of birds by studying the behavior, anatomy, physiology, and natural history of these feathered vertebrates. The Andover area is rich in habitat diversity and corresponding bird species. A portion of the course will be dedicated to learning the identity, both visually and acoustically of a segment of this local population. Labs will include numerous field trips and the study of the natural history of birds, using bird mounts, nesting boxes, feathers, and films.

BIOL-450 Microbiology

tour class periods. Open to Uppers and Seniors who have had one year of laboratory science. From AIDS, tuberculosis, and malaria to strep throat and the common cold. bacteria, parasites, and viriises affect our quality of life and are major obstacles to world development. This course will examine public health threats posed by selected microorganisms. We will study the biology and epidemiology of these microorganisms, learn how to keep ourselves healthy, and develop an awareness of personal and global public health issues.

BIOL-540/0 Topics in Advanced Biology

(a yearlong commitment)

BIOL 540 is a six-hour course. This college-level course treats the topics covered in an introductory biology course in greater depth and places greater emphasis on biochemistry and molecular biology. Laboratory work is an integral part of the course. Time is also set aside in the fall to learn about Andover ecology, in the winter to study the major diseases of the world, and in the spring to discuss important global issues.

The syllabus for this course is appropriate preparation for the College Board Subject Test and although the course is not specific preparation for the AP exam in biology, students who do well in this course are prepared for that exam. This course is open to Uppers and Seniors. Students who received a final grade of 5 or 6 in CHEM-300 or a grade of 4 or higher in CHEM-550 or 580 should take BIOL-560, 570, and 580 instead. This course may require more than the standard four to five hours of homework per week.

Prerequisite: One yearlong course in chemi try. Lowers who received a final grade of 3 or helow in chemistry hould enroll in a physics course upper year, and BIOL-540 enror year

BIOL-560 Cellular Biology

(F)

BIOL 560 is a six hour course including time each week in the laboratory. Tollowing a brief review of chemical principles, the course examines the major classes of bio molecules and how they are synthesized and degraded in the cell with emphasis on reactions associated with energy conversion pathways such as respiration and photosynthe six Enzyme function is considered both in terms of mechanisms of action and with regard to kinetics. The relationship between structure and function at the molecular level is emphasized in studies of molecular genetics and the control of genetic expression. Biotechnology is introduced through the laboratory. Not open to those who have had BIOI 540. This course may require more than the standard four to five hours of homework per week.

Prerequisite: Honors in a yearlong course in chemitry

BIOL-570 Human Anatomy and Physiology (w)

This six hour course includes an in-depth consideration of some of the major systems of the human body. Emphasis is placed on the relationship between structure and function at the cellular, tissue, organ, and organ system levels. Not open to those who have had *BIOI* -540. This course may require more than the standard four to five hours of homework per week.

Prerequisite: BIOI -560 or permission of the instructor and the department chair,

BIOL-580 Evolution and Ecology

BIO1-580 is a six-hour course with time each week spent in the field or laboratory. Sustainability and change are the central themes through which we will consider evolution and ecology. Evolution is a major unifying theme in biology, and the mechanism of natural selection serves as a foundation for examining ecosystems and relationships between populations, including humans. Lab and field work are based on a study of the sanctuary forest. A short library research paper will be required. Not open to those who have had BIOL-540. This course may require more than the standard four to five hours of homework per week.

Prerequisite: BIOI-560 and/or 570 or permission of the instructor and the department chair.

BIOL-600 Molecular Biology (F-W-5) Laboratory Research

This is a course in laboratory research in molecular biology. Open to Uppers and Seniors. Permission of the instructor is required. Meets eight class periods (four double-periods) a week. Students in this course will learn laboratory techniques for working with DNA and bacteria. Experiments will center on the molecular genetics of microorganisms, including the isolation, cutting, and splicing of DNA by recombinant DNA biotechnologies and the polymerase chain reaction. After learning a core

of methodologies that are used in professional labs, students will apply them to short, focused research projects in biotechnology.

Uppers may use this course as a springboard for a science competition project, which would be accomplished at a professional lab during the following summer. Reading articles in scientific journals, as appropriate, is part of a student's research. Students also will be asked to keep a lab journal and to write and present a scientific paper. This course, if failed, may not be made up by examination.

Prerequisite: One year of biology and one year of chemistry with grades of 4 or above.

BIOL-610 Molecular Biology Independent Research

(Term TBD)

Students wishing to continue work from *BIOL-600* may apply directly to the instructor for permission to enroll in *BIOL-610*. Enrollment is strictly limited and is at the discretion of the instructor and the chair of the Department of Biology. Laboratory schedules will be determined on a case-by-case basis; however, a student must be able to be in the lab for a minimum of eight hours per week at times when the instructor is available for supervision. This course is an advanced course that may require more than the standard nine hours of work per week. Requirements for successful completion_of the term are similar to those for *BIOL-600*. This course, if failed, cannot be made up by examination.

CHEMISTRY

The chemistry department offers two yearlong introductory courses in chemistry, each of which fulfills part of the diploma requirement for a laboratory science. Placement in *CHEM-250* and *CHEM-300* is generally based on concurrent mathematics placement. Students who wish to take the Chemistry AP exam may prepare for it by taking either *CHEM-550* (a yearlong course) or *CHEM-580* (an advanced, second-year course).

CHEM-250/0 Introduction to Chemistry

(a yearlong commitment)

Five class periods per week. An introduction to the chemical view of the material world, including atomic theory, atomic structure, chemical reactions, the nature of solids, liquids, gases, and solutions, general equilibria, acid-base theories, electrochemistry, and aspects of nuclear chemistry. Emphasis is placed on developing problem-solving skills as well as on making connections between chemical principles and everyday life. A college-level text is used, but the pace of this course is adjusted to ensure that students have ample opportunity to ask questions. Laboratory work is an integral part of the course. The syllabus is appropriate preparation for the College Board Subject Test. High honors work adequately prepares a student for *CHEM-580*.

Co-requisite: Registration in MATH-210 or above.

CHEM-300/0 College Chemistry

(a yearlong commitment)

Five class periods per week. This course is an introduction to the theoretical framework of modern chemistry, including atomic structure, chemical bonding, phase changes, solutions, chemical reactions, thermodynamics, kinetics, general equilibria, acid-base equilibria, electrochemistry, and aspects of inorganic and nuclear chemistry. Emphasis is placed on developing problem-solving skills and understanding the experimental basis of theories. A college-level text is used. Laboratory work is an integral part of the course. The syllabus of this course is appropriate preparation for the College Board Subject Test.

Corequisite: Registration in at least MATH-320 or above.

Prerequisite: Grade of 4 or above in the previous mathematics course.

CHEM-460 Chemistry of the Environment

(w)

Four class periods per week. Open to Uppers and Seniors only. This course is concerned with the effect of chemistry on the earth and the implications of human action on the environment. Current issues—such as global warming, ozone depletion, air and water pollution, chemical waste, and alternative sources of energy—are discussed. Chemical theories and principles are introduced as needed.

Prerequisite: One year of biology, chemistry, or physics.

CHEM-550/0 Advanced Placement Chemistry

(a yearlong commitment)

Six class periods per week, two of which are in the laboratory. This course is not open to students who have taken CHEM-300 or its equivalent, or to Juniors, with the exception of those Juniors enrolled in MATH-650. This is a rigorous course that treats the topics addressed in College Chemistry in greater depth and prepares students for the Advanced Placement examination in chemistry. Laboratory work is an integral part of the course. This course may require more than the standard four to five hours per week of homework. The syllabus of this course is appropriate preparation for the College Board Subject Test. A short research paper or advanced laboratory work may be undertaken in lieu of a final exam at the end of the spring term. Prerequisite: Grade of 5 or above in CHEM-250. Students who earn a 4 in CHEM-250 may take CHEM-550 after taking PHYS-400 or PHYS-550. Students with no previous chemistry who are in MATH-360 or above may enroll in this course. Students with no previous chemistry who are in MATH-350 or below may enroll in this course only with permission from the department chair.

CHEM-580/0 Advanced Chemistry

(a yearlong commitment)

Six class periods per week. Open to students with a 6 in *CHEM-250* or a 5 or above in *CHEM-300*. Students with a 4 in *CHEM-300* may take *CHEM-580* after taking *PHYS-400* or *PHYS-550*. This rigorous second-year course

builds on principles learned previously, prepares students for the Advanced Placement examination, and includes topics beyond the AP syllabus. This course may require more than the standard four to five hours per week of homework. Laboratory work is an integral part of the course. Students will have an opportunity to review current literature on selected topics or select a lab research topic in preparation for a class seminar they will present in lieu of a final exam at the end of the spring term.

CHEM-610 Organic Chemistry

Four class periods per week. This course introduces many of the basic reactions and concepts students will encounter in their future studies of chemistry, biology, or medicine. Rather than covering a large number of reactions, as might happen in a second year (full year) college organic chemistry course, this course emphasizes an understanding of general principles of reactivity and mechanism. The class-room work is supplemented by demonstrations through which students learn some of the fundamental tools of this highly empirical science. In addition, each student gains detailed knowledge of an area of active research related to organic chemistry. After selecting a topic of interest, each student prepares a paper and a class seminar, using current scientific literature. This course may require more than the standard four to five hours per week of homework.

Prerequisite: Completion of either CHEM-550 or 580.

INTERDISCIPLINARY SCIENCE

SCIE-410

Environmental Science I: Global Climate Change

Five class periods. Open to Seniors, and to Uppers who have completed one year of laboratory science. This course prepares students to grasp the science behind the politics. The course begins with an overview of climate science, including atmospheric composition, major biogeochemical cycles, principles of energy conservation and flow, the greenhouse effect, atmospheric and oceanic circulation, and natural climate variability. We then investigate recent anthropogenic climate change, examining both causes and consequences. We will primarily consider impacts on ecological systems, but also assess impacts on public health. economics, and global justice. The second half of the course will address the response to global climate change by investigating mitigation strategies. Students will analyze current and potential future sources of energy, both nonrenewable and renewable. Readings will include origina scientific literature, nonfiction books and essays, text excerpts, and news coverage

SCIE-420 Environmental Science II: Food, (w.) Agriculture, and the Future

Live class periods. Open to Seniors, and to Uppers who have completed one year of laboratory science. This course may be taken in addition to or independently of SCII 410. This course examines agriculture as a major driver of global environmental change and public health trends. We will explore the demands placed on food production by population growth and a dietary transition, the chemical origins and ecological impacts of fertilizer, and the implications of limited resources of water, land, and oil. The course will integrate fundamental environmental principles of nutrient cycling and energy flow, provide an introduction to environmental economics and policy, and examine how agriculture affects land use, climate change, and biodiversity. We will explore public health impacts of agriculture including food vafety, antibiotic resistance, and the rise of obesity and diabetes. Finally, we will consider the future of agriculture and food. Readings will include original scientific literature, nonfiction books and essays, text excerpts, and news coverage. Students should be prepared to undertake a term project

SCIE-430 Environmental Science III: (s) Water Resources

Five class periods. Open to Seniors, and to Uppers who have completed one year of laboratory science. This course may be taken in addition to or independently of SCIF-410 and/or SCIE-420. As complex as natural resource issues are, many still revolve around a simple molecule: water. From desertification to pollution to discussion of "peak water," water shapes the world. This course takes an interdisciplinary and topical look at water, with a focus on freshwater. We will start with an examination of hydrology basics, using Andover as a case study to understand the relationships of groundwater, surface water, aquifers, drinking water, water use, and stormwater management. We will then examine through various lenses, including ecology, hydrology, toxicology, economics, and environmental law and policy three major issues related to freshwater: desertification, water quality and pollution, and allocation of global freshwater. Readings will include original scientific literature, nonfiction books and essays, text excerpts, and news coverage. Students should be prepared to undertake a term project.

SCIE-440 Humanity in the Post-Genomic Era

Five class periods per week. Open to Uppers and Seniors. This course examines current biological topics that challenge our understanding of humanity. We live in a modern age in which major scientific advances are the norm. Bombarded with stories in the news regarding ethical dilemmas pertaining to biomedical advances or interventions, it is often difficult for us to make sense of competing arguments without having a basic command of the biological and philosophical issues involved. Questions to be addressed include: What is a stem cell? When does a

developing human being first experience sensation? Show evidence of cognitive abilities? Acquire moral status? How does our modern, post-genomic understanding of human biology influence our definition of humanity? Historical and current readings will be assigned and lively discussions encouraged. Students will be graded through a variety of assessments, including papers, projects, and class participation.

Prerequisite: One yearlong course in biology and one yearlong course in chemistry.

SCIE-450 Forensic Science

Five class periods per week. Open to Uppers and Seniors only. This course will introduce students to the science of forensics. Students will learn to observe a crime scene and analyze different types of evidence found there. Designed as an interdisciplinary course, aspects of biology (DNA), chemistry (toxicology and chemical analysis) and physics (ballistics) will be discussed. The course will have a significant lab component, which will include developing fingerprints, identification of physical evidence and unknown chemicals, and DNA analysis.

Prerequisite: One year of chemistry and either one year of biology or a concurrent enrollment in a year-long biology course.

SCIE-470 Human Origins (Term TBD)

Five class periods, including weekly field or laboratory work. Open to Uppers and Seniors. Take a look around. Regardless of where you are, the consequence of three million years of human evolution is evident. This interdisciplinary science course uses insights drawn from history, art, archaeology, and other disciplines to chart the human journey from hominid to the first civilizations that forecast the modern world. Hands-on laboratory exercises emphasize use of Peabody Museum of Archaeology collections and challenge students to apply ancient techniques to solve daily problems of survival.

SCIE-480/ Disease and Medicine in the United States: Pox and Pestilence (Term TBD)

Five class periods per week. Open to Uppers and Seniors. See also HIST-SS480. In recent years, historians have begun to understand the impact of disease on the human story and have incorporated it into the more traditional narratives. In common with other parts of the world, the history of the United States has been profoundly influenced by infectious disease. In this course we invite you to come along on a multi-disciplinary journey to explore the impact of disease on the American experience in the 19th and 20th centuries. After exploring the pre-contact situation in the Americas, we will focus on syphilis, small-pox, bacterial sepsis, cholera, yellow fever, malaria, tuberculosis, influenza, polio, HIV/AIDS, and bioterrorism agents such as anthrax. Students will research the role these diseases played in the social, military, and political

history of the United States together with the science and medicine that developed in response to them. This is a research seminar and students will use a variety of sources to write a term paper. There is no final examination. A student in this course is eligible for credit in *either* history or science. A student who wishes to receive history credit should sign up for *HIST-SS480*; a student who wishes to receive science credit should sign up for *SCIE-480*.

SCIE-490 PSYC-490 The Brain and You—A User's Guide

Five class periods per week. Open to Uppers and Seniors. The human brain is the most sophisticated biological organ ever evolved on Earth and is the source of all human cognitive functions. Have you ever wondered how yours works? How do you use it to enjoy music, for social relationships or experience strong emotions? Have you ever asked yourself whether there are differences between the male and female brains or if the capabilities of the human brain are really unique in the animal kingdom? Join us in this interdisciplinary course as we search for answers to these questions (and more) by examining the evolution and function of the brain and how this applies to understanding the role of the brain in complex human psychology, including the perception, creation and performance of music, personality, memory and other higher intellectual activities. A student in this course is eligible for credit in either science or psychology. A student who wishes to receive science credit should sign up for SCIE-490; a student who wishes to receive psychology credit should sign up for PSYC-490. (Dr. Israel)

PHYSICS

PHYS-270/0 Introduction to Physics

(a yearlong commitment))

Five class periods. An introductory course in the basic concepts of physics that emphasizes student participation. After completion of *PHYS-270*, students are allowed to take *PHYS-400* or *PHYS-550* if they meet the math prerequisite. Students who have completed *CHEM-250* with a 4 or higher or have completed *CHEM-300* should enroll in *PHYS-400*. Students new to the school should consult the Physics Department Chair for permission to enroll in this course.

Corequisite: Registration in MATH-210 or higher.

PHYS-395 Classical Mechanics

(F)

This is the fall term of *PHYS-400*, for students who do not wish to make a yearlong commitment. Students take the same final exam as the *PHYS-400* students. A student who finishes *PHYS-395* has the option of continuing in the winter and spring terms of *PHYS-400*.

Prerequisite: Previous completion of or concurrent enrollment in MATH-280 or 330.

PHYS-400/0 College Physics

(a yearlong commitment)

Five class periods. A non-calculus physics course, including a study of classical mechanics, electricity, magnetism, wave motion light, relativity, and atomic and niclear physics. Laboratory work is an integral part of the course. The syllabus of this course is appropriate preparation for the College Board Subject. Test in physics. This course is for students who have carned a 4 or higher in CHEM 250 or who have completed CHEM 300 or PHYS 270.

Corequisite: Registration in at lea 1 MAIII 280 0 or MAIII-330 or permittion of the department chair if in MAIII 320 in the fall term

PHYS-440 Astronomy

(+ 11 4)

Four class periods, Astronomy is the scientific study of the origin, structure, and evolution of the universe and the objects in it. Topics may include patterns and motions in the sky, gravity and orbits, telescopes and light, planetary systems, the birth and death of stars, galaxies, the Big Bang, the search for extraterrestrial life, and the fate of the universe. One class period each week will be replaced by a luesday evening session in the observatory.

Prerequisite: Completion of or concurrent eurollment in one chemistry or physics course, and registration in at least MATH 340

PHYS-450 Physical Geology

5

Four class periods. A general introduction to physical geology, to include minerals, rocks, measurement of geologic time by radioactivity and fossils, volcanoes, seismology and earth structure, deformation of strata, faults, and plate tectonics. Some of the periods will be used for laboratory work.

Prerequisite: Previous completion of one year of physics or chemistry, and registration in at least MATH-340

PHYS-520 Electronics

15)

Five class periods. A course in modern solid state electronics that considers passive circuit elements and their combinations, diodes, transistors, and integrated circuits. There will be considerable laboratory work.

Prerequisite: Previous completion of or concurrent enrollment in PHYS-400/0 and completion of MATH-360

ADVANCED COURSES

PHYS-550/0 Calculus-Based Physics

(a yearlong commitment)

Five class periods. PHYS-550 prepares students for both Mechanics and Electricity and Magnetism of the C level Advanced Placement examination, and entrance to honorsevel programs in physics at the university level. Calculus

will be used as required. Open to students who (a) will be enrolled in at least MATH 590 or who have completed MATH 575, (b) do not quality for PHYS 580, and (c) have earned a 4 or higher in their two most recent terms of math. PHYS—100 is also an option for these students. This is a rigorous course that may require more than the standard four to five hours of bomework per week.

PHYS-580/4 Calculus-Based Physics (T2)

a two-term commitment

Five class periods. This is a rigorous course in mechanics (fall term), and electricity and magnetism winter term). Calculus will be used as required. This course prepares students for both Mechanics and Electricity and Magnetism of the Clevel Advanced Placement examination, and entrance to honors level programs in physics at the university level. This course may require more than the standard four to five hours of homework per week.

Prerequisite: A grade of 6 for the year in PHYS-400 or its equivalent, and enrollment in at least MATH-590 or its equivalent.

PHYS-600 Relativity and Quantum Mechanics

(5)

Four class periods. Relativity and quantum mechanics are two theories that completely revolutionized our thinking about the universe. The course is a survey of the basic ideas underlying these theories. Special mathematical techniques needed for a better understanding of the material are developed in the course. This course may require more than the standard four to five hours of homework per week.

Prerequisites: Concurrent enrollment in PHYS-550 or completion of PHYS-580, and enrollment in at least MATH-590.

PHYS-630 Fluid Mechanics

(F)

Four class periods. Students taking this course will learn about fluid statics and dynamics. Dimensional analysis and derivation of Bernoulli and Navier-Stokes equations will provide the methods necessary for solving problems. This course may require more than the standard four to five hours of homework per week.

Prerequisite: Completion of MATH-590/5 and 595/0, and PHYS-550 or 580

PHYS-650 Physics Seminar

(w)

Four class periods. The focus of this course is intermediate mechanics. Topics will vary according to the interests of the instructor and the students. This course may require more than the standard four to five hours of homework per week.

Prerequisite: Completion of MATH-590 and of the fall trimester of PHYS-550 or 580.

PHILOSOPHY AND RELIGIOUS STUDIES

The department seeks to initiate students into three distinctive human quests: the search for meaning, the search for justice, and the search for the foundations of knowledge. The process of initiation is intended not only to provide an introduction to outstanding literature in the field but also to assist the student in effecting a personal appropriation of the search and in developing the necessary skills for its pursuit. Active class participation is an essential part of this process; hence, failed courses cannot be made up by examination alone.

The department diploma requirement is successful completion of any one-trimester course; this requirement applies only to those who attend Phillips Academy for three or four years. Four-year students fulfill their requirement in the lower year. Courses are offered at a variety of levels. All courses involve four class periods.

PHRE-300 Asian Religions: An Introduction

(F-W-S)

Four class periods. Not open to Juniors. An introduction to religious studies through examining some of the traditions that originated and flourished in Asia and are practiced by people throughout the world today. Using an approach that is both critical and empathetic, students will explore the fundamental structures of belief, meaning, and practice that constitute the traditions of Hinduism, Buddhism, and Chinese religion, the diversity within each of these traditions, and their multiple manifestations throughout the world. In doing so, students also will explore their own essential questions of meaning in dialogue with these traditions. Texts may include *The Bhagavad-Gita, The Dhammapada*, and the *Tao Te Ching*.

PHRE-310 Religions of the Book: Judaism, (F-w-s) Christianity, and Islam

Four class periods. Not open to Juniors. This course introduces students to the religious traditions that originated in the Middle East, flourished in and formed the West, and are practiced by people throughout the world today. Using an approach that is both critical and empathetic, students will be introduced to the origins and history of each tradition. They will become acquainted with the fundamental structures of belief and meaning that shaped adherents' lives, the rituals that formed and renewed them, and the social teachings that moved them to action. In doing so, students will learn something about the character of each religious path and about the questions to which we all seek answers.

$\frac{\text{PHRE-320}}{(\text{F-W-S})} \qquad \text{The Word: Perspectives} \\ \text{on Scripture}$

Four class periods. Not open to Juniors. This course will examine scriptural texts from Judaism, Christianity, and

Islam, specifically the Hebrew Bible, the New Testament, and the Quran. Each term will focus on one of these texts. Students will consider the text's literary qualities, religious significance, and historical setting. Attention also will be paid to methods of interpretation and ways in which religious communities make use of scriptural traditions.

PHRE-330 The New Testament Perspective

(w-s) (not offered in 2010–2011)

Four class periods. Not open to Juniors. The course will consider, in their cultural and historical context, the person and teaching of Jesus of Nazareth, the development of the early Christian community, and the religious claims of that community concerning the Christ.

PHRE-340 Introduction to Ethics

(F-W-S)

Four class periods. Not open to Juniors. Students in this discussion course will be introduced to a variety of approaches to ethical reflection. Through the use of classical texts and personal and literary stories, students will develop a common vocabulary with which to understand and critically evaluate their moral experience.

PHRE-360 Proof and Persuasion

(F-W)

Four class periods. Not open to Juniors. A practical introduction to informal logic and to the philosophical study of language. Some of the questions raised are the following: What is the difference between a good argument and a poor one? What are the common fallacies of thought? What are the limitations of logic? What are the meaning of "meaning" and the truth about "truth?" The course stresses the development of individual skill in argument and includes a critical examination of the patterns of thought one encounters every day in magazines, in newspapers, and on television.

PHRE-370 Views of Human Nature

(F-W-S)

Four class periods. Not open to Juniors. A critical examination of selected traditional and contemporary views of human nature with the following questions in mind: Do we have a characteristic nature? What are our basic needs, purposes, rights, obligations, and values? To what extent are our actions determined by heredity and instinct? Are we free? Are we responsible for our actions? Do the answers to any of these questions differ for males and females? Given an understanding of human nature, how should we structure society to satisfy our needs and take advantage of our potential? Class discussions and written exercises are designed to encourage participants to develop views of their own against a background of a basic understanding of the readings.

PHRE-410 Religion in America: One Nation, Under God(s)?

Four class periods, Open to Uppers and Seniors. In conremporary American public life, religion is everywhere, and the United States is considered one of the most religious countries in the world. This course will examine the role of religion in American history and politics, from colonial times to the present day. Questions to be addressed include. Is America a Christian country? What role did religion play in the founding of America? Did the founding documents seek to create a separation of church and state. How were religious arguments used to justify or challenge slavery? What are the causes of the rise of fundamentalism in the 20th century? What, looking forward, is America's religious identity in an increasingly diverse and pluralistic society?

lexts will include Eck. A New Religious America; Lambert, Religion in American Politics; and a variety of primary source documents and other readings

PHRE-420 Responses to the Holocaust

Four class periods. Open to Seniors and Uppers with permission of the instructor. An exploration of the Holocaust through diaries, memoirs, films, works of fiction, and later nonfiction reflections on the phenomenon. Questions to be engaged will include the following: What was it like for the victims? What was it like for the perpetrators? Who were the bystanders? How could it have happened? What elements from Jewish, Christian, and secular tradition contributed to its possibility? What inspired and motivated resistance, and how were resistance efforts sustained? How have various Jewish, Christian, and secular thinkers responded to the challenge of this event? What have been some of its effects on our own feelings about life and human beings? Texts may include Night. Between Dignity and Despair, The Sunflower, Tales of the Master Race, Ordinary Men, and The White Rose Films may include Night and Fog. One Survivor Remembers, Weapons of the Spirit, and America and the Holocaust

PHRE-430 Law and Morality

(F-10-5)

Four class periods. Open to Uppers and Seniors, and to Lowers with permission of the instructor. A critical examination of issues that arise out of the relationship between lass and morality. Questions of concern include the following: For what reasons, if any, should an individual obey or disobey the laws of society? Which kinds of governments imparately, aristocracy, democracy, etc.), if any, are legitimate? To what degree should society restrict the freedom of individuals through laws on matters like abortion, pornography, race, and sexual relations? Class discussions and written exercises are designed to encourage participants to develop views of their own against a background of basic understanding of the readings.

PHRE-435 Philosophy as a Way of Life: Buddhism and Stoicism

(not offered in 2010-2011)

Four class periods. Open to Uppers and Seniors. In the ancient world, philosophy was taught not as an academic discipline, but as a matter of daily and even momentto-moment—attention and investigation. This seminar will examine two such philosophies, one from the Eastern world and one from the Western one We will study Buddhism and Stoicism, with special focus on a set of questions. What is the connection between philosophy and a good life? What is the relationship between reason and the emotions in a good life? What methods of selfcultivation are available to students of philosophy? Special attention will be paid to methods of personal transformation and meditation in these two philosophical schools. By studying these traditions comparatively, this course hopes to shed light on fundamental questions about what it means to be a human being.

PHRE-440 Nonviolence and (w) Moral Leadership

four class periods. Open to Uppers and Seniors. This course will examine major figures within nonviolent movements for social change, with a focus on the capacities of moral leadership possessed by these individuals. What characterizes an effective moral leader? How do these leaders motivate others in the face of injustice and oppression? Must moral leadership necessarily be nonviolent? Through a study of autobiography, letters, speeches, and case studies, students will come to a more complete understanding of nonviolent movements and the decisions made by individuals who led them. In addition to Gandhi and King, individuals studied may include Nelson Mandela, Desmond Tutu, the Dalai Lama, Aung San Suu Kvi, Thich Nhat Hanh, Paul Farmer, Greg Mortenson, and Bill Drayton PA '61. Critics of nonviolence will also be studied. The course will culminate in a substantial independent research project.

PHRE-460 Bioethics: Medicine (not offered in 2010–2011)

Four class periods. Open to Uppers and Seniors, and to Lowers with permission of the instructor. Modern medical research and practice present society with new opportunities and huge challenges, and doctors are guided by both ethics and science in the search for new remedies, the treatment of patients, and the struggle for just social and health care policies on a national and global scale.

This course provides a brief introduction to ethics, its application to issues in medicine and medical research, and its role in setting public policy. Topics may include the physician/patient relationship, professional codes, international standards in drug development, stem cell therapies, and the provision of health care to those in need.

PHRE-470 Bioethics: The Environment

(not offered in 2010-2011)

Four class periods. Open to Uppers and Seniors, and to Lowers with permission of the instructor. We are facing unprecedented environmental challenges to climate, life forms, human health and population, and essential resources. We tend to treat such issues simply as scientific or political problems. In reality, ecological controversies raise fundamental questions about what we human beings value, the kind of beings we are, the kinds of lives we should lead, and our place in nature. Sustainability is not possible without a deep change of values and commitment. In short, environmental problems raise fundamental questions of ethics and philosophy. This course seeks to provide a systematic introduction to those questions.

Each of the following courses may require more than the standard four to five hours per week of homework.

PHRE-500 Existentialism

(F)

Four class periods. Open to Uppers and Seniors. The term existentialism covers a broad range of attitudes and values joined together by an emphasis on human existence. The authors brought together in its name share a characteristic concern for the problems of meaning, identity, and choice that confront men and women in everyday life. The lectures, discussions, and readings are designed to help us locate and express these problems as they confront each of us in our own lives, and to assist in understanding and resolving them by drawing on the experiences and insights of the major existentialist thinkers. Readings include Nikos Kazantzakis, Zorba the Greek; Friedrich Nietzsche, Thus Spake Zarathustra; Jean-Paul Sartre, No Exit and Being and Nothingness; and Sören Kierkegaard, The Sickness unto Death.

PHRE-510 Justice and Globalization

(w)

Four class periods. Open to Uppers and Seniors. What is justice? What is the meaning and worth of calls to fight injustice and to strive to make the world more just? What does the search to understand and promote justice entail in our increasingly interconnected world? What principles, practices, and institutions hold the most promise for securing a desirable future? Through reading, writing, research, presentations, and discussion, participants will work together to develop a deeper understanding of a variety of ways these questions can be thoughtfully and effectively addressed.

PHRE-520 Great Philosophers

(s)

Four class periods. Open to Uppers and Seniors. Participants in this upper level course in philosophy will explore a single idea and the questions that arise in its elucidation and application. Topics will change from year to year and may include love, leadership, knowledge, and athletic competition. Important thinkers from a variety of points of view will be consulted.

PHRE-530 Advanced Topics in the Study of Religion

Four class periods. Open to Uppers and Seniors. Students in this course will examine selected topics and themes in the study of religion. Potential areas of investigation within a course may include religion and society, scriptural perspectives, religious rituals, devotional practices, historical influences in religious doctrine, and religious art, music, literature, and poetry.

PHYSICAL EDUCATION

All three and four year students are required to complete IHED 200 by the end of the lower year

PHED-200 Physical Education

Honois Pass Fail Limit of 15 students per section. Meets five hours per week. The course is designed to promote lifetime wellness and to raise students' awareness of the concepts and choices involved. Through the use of the pool, topes course, fitness center, and other areas of the athletic complex, the course aims to foster individual development along with group success. Weekly discussions are based on readings from the class text and from written assignments. If the course is failed, the student svill repeat it, in full or in part, during a subsequent term.

PSYCHOLOGY

The psychology department offers three elective courses that examine fundamental concepts in the field. Particular emphasis is placed on helping the student explore the interface between psychological knowledge and personal growth. This is accomplished by utilizing teaching strategies that integrate formal academic work with frequent opportunities for student participation and self-exploration.

PSYC-420 Introductory Psychology

Four class periods, for Uppers and Seniors. A survey course designed to introduce the student to the complexity and diversity of psychological inquiry. Emphasis is placed on the application of basic psychological principles to individual experience in order to expand awareness of both self and others. In addition, the broader implications of psychological findings for an integrated understanding of human development and behavior are considered. Topics to be covered may include psychoanalytic, behavioral, and humanistic theories of the person; psychosocial, cognitive, moral, and early childhood development: human motivation and personality; social behavior; abnormal behavior; and research techniques in psychology A combination of objective examinations and individualized writing assignments are utilized to evaluate the student's learning. (Dr. Jackson)

PSYC-430 Developmental Psychology

Four class periods, for Uppers and Seniors. An examination of human growth and development from infancy through adolescence. The role of early experiences and biological factors in later formation of personality and intellectual and motivational behaviors will be considered. Different theoretical perspectives, psychodynamic, social learning, and biological) of psychological development will be examined as they relate to developmental mile stones. Among the theorists to be studied are Piaget, Frikson, Freud, Rogers, and Bandura. The format of the course includes readings, films, quizzes, written assignments, and both group and individual projects (Dr. Alovisetti).

PSYC-490

SCIE-490 The Brain and You—A User's Guide

Tive class periods per week. Open to Uppers and Seniors. The human brain is the most sophisticated biological organ ever evolved on Farth and is the source of all human cognitive functions. Have you ever wondered how yours works? How do you use it to enjoy music, for social relationships or experience strong emotions? Have you ever asked yourself whether there are differences between the male and female brains or if the capabilities of the human brain are really unique in the animal kingdom? Join us in this interdisciplinary course as we search for answers to these questions (and more) by examining the evolution and function of the brain and how this applies to understanding the role of the brain in complex human psychology, including the perception, creation and performance of music, personality, memory and other higher intellectual activities. A student in this course is eligible for credit in either science or psychology. A student who wishes to receive science credit should sign up for SCIE-490; a student who wishes to receive psychology credit should sign up for PSYC-490. (Dr. Israel)

THEATRE AND DANCE

The Department of Theatre and Dance offers students diverse opportunities to develop skills in all aspects of performance and production. Although the department houses two distinct disciplines, theatre and dance, they share a mutual goal: to guide students toward an understanding of performance as a form of communication and expression.

The theatre program is designed to educate students in the theory, design, and practice of dramatic expression. Our curriculum is grounded in the study of drama through experiential learning. We produce three faculty-directed productions a year (one per term) through our *THDA-520* course. In addition to our academic courses, the theatre program boasts dynamic cocurricular opportunities through DramaLabs, a series of student-directed one-act plays produced every Friday night in our theatre classroom. Additionally, there is a student-run improv group as well as occasional community service projects. With more than 25 productions a year, there are ample opportunities for everyone to be involved.

Our dance program is comprised of academic, athletic, and extracurricular offerings. Three levels of ballet and modern technique are offered through the athletic program, while choreography and performance opportunities are both curricular and cocurricular. The Andover Dance Group is our primary performing ensemble, consisting of the most dedicated and gifted dancers. Other student-run groups include jazz, hip-hop, and tap groups. To broaden the students' exposure to the dance world, the department hires guest artists each year ranging from local choreographers to residencies with internationally known choreographers and dancers.

Students matriculating in fall 2008 or later are subject to the following visual and performing arts graduation requirement:

- Entering Juniors must earn no fewer than four credits in art, music, and theatre and dance. Students may fulfill two of these four credits by completing any academic theatre and dance course.
- Entering Lowers must earn no fewer than three credits in art, music, and theatre and dance. Students may fulfill one of these three credits by completing any academic theatre and dance course.
- Students who matriculated prior to 2008 are subject to the following visual and performing arts graduation requirement:
- Entering Juniors must earn two credits in art and two in music and take one term of theatre and dance. Students may fulfill the theatre and dance requirement by taking any *THDA* academic course.

THDA-210 Introduction to Acting

(F-W-S)

Four class periods. Open to all classes, this course is designed for students with little or no acting experience. By doing exercises in movement and voice production, reading, improvisation, and scenes, a student who is curious about the theatre may determine whether he or she has ability or interest in acting while learning something of the process of characterization, the major responsibility of the actor. The emphasis is on the variety of acting experiences rather than on a polished final product.

THDA-320 Lighting

(w-s)

Four class periods. The course will introduce the student to the art of lighting design while also providing an opportunity to observe light in nature, art, stage, screen, and created environments. The course will allow the individual to gain applied practical understanding regarding the color theory of light, the psychology of color and light, and controllable qualities of light. The design process will be utilized as a method of dramatic interpretation. Artistic expression will be achieved through practical use of lighting instruments, laboratory projects, experiments, and school productions when applicable. (Mr. Murray)

THDA-321 Costuming

(F)

Four class periods. An introductory exploration into the areas of costume design and costume construction, this course will highlight primary design elements utilized in costume design for the stage and screen (i.e., line, color, tone, texture, movement, mood composition, balance, and focus). The course will examine historical period silhouette and the art and craft of the stage costume. Practical experience will be given in areas including construction, flat patterning, draping, and fabric manipulation. (Mr. Murray)

THDA-325 Scene Design

(F-W)

Four class periods. This course will introduce the student to the elements that inform the scenic designer's choices (the theme and mood of a script, lines of action, focus, constraints, whimsy) and discuss methods of formulating cohesive, functional, and effective design for a show. The student will be introduced to many materials and techniques available to a designer for realizing his or her ideas as a physical product. Special attention will be spent on the process of the design concept: collaboration, formulation, presentation, discussion, evaluation, and reworking. Students will be graded on both design projects and classroom participation. This is a seminar class that relies upon the open and frank exchange of ideas to stimulate creativity. (Mr. Bacon)

THDA-326 Sound in the Theatre

(5

This course is an introduction to the art of sound design for the stage. Major topics covered include sound system. design and implementation, effects creation, recording techniques, and live reinforcement of actors, singers, and musicians. Students will study audio theory through reading and practical demonstrations, and will develop a working understanding of the often confusing terminol ogy of system components. What's the difference between a balanced and unbalanced cable, and why does it matter? Should I use a condenser or dynamic microphone (and should it be omni, cardioids, or figure 8)? What's phantom power, and when do I need it? Is a feedback destroyer the best way to destroy feedback? (No). Both analog and digital components will be studied. Completion of the course prepares students to design and engineer sound for school theatre productions. (Mr. Bacon)

THDA-330 Theatre Theory and History

(4)

Four class periods. Open to Seniors and Uppers. Lowers may enroll with permission of the department chair. We will trace the role of theatre in Western culture from the Greeks to the present American stage, focusing on how important artists broke through theatrical plateaus, creating new forms to communicate with their audiences. The vehicles for our lecture, discussion-based journey might include plays and writings by Aeschylus, Shakespeare, Moliere. Strindberg, and Miller; designs from the Romans, the Hizabethans, Reinhardt, Craig, Appia, and Mielziner; and theorists such as Aristotle. Stanislavsky, Brecht, Beck, and the Bread and Puppet Theatre. A major term project will wrap up the course with students' thoughts on how to push beyond present plateaus to reestablish the vitality of theatre for our culture today.

THDA-360 Introduction to Directing

(20.

Four class periods. Since directing plays is the most complex of theatrical tasks, this course will focus on methods to unlock the life of a script in the realization of production. Studies will include historic styles and productions, emphasizing their staging. Students will learn the dynamics of floor plans and their effect on blocking, the potentials for lighting and its effect on mood, the importance of rhythm and spectacle, and strategies to harness them. While no class on directing can function without including discussion of the actor's craft, this class will only touch on this area, which will be further developed in THDA-510. (Mr. Efinger)

Prerequisite: THDA-210 or permission of department chair

THDA-365 Choreographic Elements

20)

This course examines the aesthetic elements of movement through various dance styles. Students will be led through exploiations and formal exercises to learn how to generate and manipulate movement in clear and innovative fashions. Course work will culminate in a final presentation of original compositions. This class will provide an in-depth study of dance elements and choreographic tools, drawing upon models set forth by Laban. Balanchine, Doris Humphrey, Judson Church, Mark Morris, and Rennie Harris, among others. Ultimately, students will deepen their understanding of movement as a form of communication and expression. This course will require students to rehearse on their own outside of class, as part of the standard four to five hours of homework per week. (Ms. Strong)

THDA-370 Performance Art: (F-S) The Creative Self

Students will create a multimedia performance piece using improvisation techniques. Students will learn a variety of different techniques integrating movement, text, sound, visual components, and personal stories. The class will study the development of performance art through this century starting with the Dada movement, the Bauhaus theater, the beginnings of modern dance, the post-modern movement, happenings, and Butoh, ending with the contemporary performance art scene. No prerequisite required. The class will be geared toward Uppers and Seniors; Lowers may enroll with permission of the instructor. This class is open to Lowers, Uppers, and Seniors. The term will culminate with an informal performance. (Ms. Wombwell)

THDA-380 Technical Production

(15:-5)

Five class periods. This is a practicum course in which students work on the technical elements for faculty-directed dance and theatre productions being produced by the department in that term. Skills learned will depend on the requirements of the particular show. Some lab hours to be arranged outside of class time.

THDA-381 Scenic Construction

(F)

Five class periods. Students learn and practice fundamental theatrical scenic construction techniques. Specific topics covered are shop, stage, and power tool safety; how to read and build from technical drawings; platform and flat construction; doors and windows; safe legging and support techniques; rigging systems; and scene painting. In-class instruction is supplemented by readings from *The Stagecraft Handbook*, by Daniel Ionazzi.

THDA-420 Public Speaking

(F-W-S)

Four class periods. The course has a dual objective: to learn how to speak easily in front of others, and to learn how to construct a speech and perform the speech in English. Students give prepared speeches on a variety of topics.

ENGL-507AA/1 Play Writing

See description under ENGL-507AA/1. Note that Play Writing is an English department offering and does not fulfill the Theatre and Dance requirement. (Mr. Heelan)

THDA-510 Acting and Directing Workshop (s)

Four class periods. Enrollment by permission of the instructor. This course, for both the actor and the director, investigates tools to create a character on stage. We will learn to analyze a character and to unlock the toolbox of an actor. Students will take turns between acting and directing scenes after thorough analysis of the material. Course projects will include showing one's work as both actor and director to an actual audience. The total time requirement for this course (class time plus homework) may exceed the standard nine hours per week.

THDA-520/1
THDA-520/2
THDA-520/3 Play Production

By audition only. This course is composed of the performance of a faculty-directed play or musical. Recent choices include *Urinetown*, *A Midsummer Night's Dream*, *Odd Couple*, and *One Flew Over the Cuckoo's Nest*. The 2010–2011 production schedule will most likely include a classical play such as Shakespeare or Molière, a contemporary drama, and a touring show. The total time required for this course (class time plus homework) may exceed the standard nine hours per week.

THDA-900H Andover Dance Group for Credit (s)

The Andover Dance Group (ADG) is an auditioned performance group consisting of the most highly trained and dedicated dancers at Phillips Academy. Students in ADG make a commitment to dance for at least two terms a year, rehearsing for faculty-directed shows as an extra-curricular. Students dance five to six days a week. Serious dancers may be in the ADG each of their years at the Academy. After one year of performing with the ADG, students may choose to take a year for credit. In addition to rehearsals, students taking ADG for credit will be required to take a weekly dance history seminar that relates the current ADG project to a specific time period, movement, choreographer, or style in dance history. This seminar is a oneterm commitment. Students may only take this option once, and it will serve to fulfill a term of their arts requirement. The total time commitment for this group (classes, rehearsals, and seminar) may exceed the standard nine hours per week.

Co-requisite: Students in Andover Dance Group are required to take dance as a sport.

WORLD LANGUAGES

Andover's requirement of at least three high school years of an ancient or modern language rests on the firm belief that direct acquaintance, through language, with the culture and people of other lands is a psychological and intellectual resource of inestimable value for each individual, for every country, and for our common world.

The diploma requirement is normally satisfied by successful completion, in one language, of three trimesters at the 300 level reached through the regular or intensive sequences (100, 200, 300, or 100, 150, 250, 300), or of one trimester of 400 level reached through the accelerated sequence (120, 220, 4XX).

In order to encourage students to consider studying a language that may not have been available to them prior to coming to Andover, the World Language Division also will allow students, by petition, to fulfill the requirement by successfully completing a total of three levels in two different languages. This alternative, the two-language path, must be done by successfully completing the first or second level of a language offered by relatively few schools (Arabic, Chinese, German, Greek, Japanese, or Russian), with the balance done in another language (typically French, Latin, or Spanish).

In addition to the eight languages that can be taken to satisfy the diploma requirement in full, we also offer two years of Arabic. This course may be used by qualified students to satisfy two years of the language requirement.

Placement of new students in all languages is based on their previous school record, on the placement test, on the questionnaire sent to them and their current language teachers in the spring, and, when appropriate, on a personal interview with the language chair at Andover. Details regarding various options and the diploma requirement as it is applicable to incoming Uppers and Seniors who begin a new language at Andover are available from the Registrar's Office. Further information may be found in the pamphlet titled World Languages at Andover.

Each of our languages, ancient and modern, with the exception of Arabic, may be started appropriately by students of any grade, Juniors through Seniors. Most Andover students continue their language study beyond the third year. Some study a second language in addition.

Small classes, flexible placement, and opportunities for acceleration assure that each student is in the optimal learning situation. In the case of modern languages, the world language is the language of the classroom. In conversation, in reading, and in writing, the goal is direct communication in the world language rather than communication through translation. The classroom experience is expanded by the Language Learning Center, media resources (e.g., periodicals, radio broadcasts, videotapes, movies, computers), the staging of plays, club activities, language events, service learning pro-

grains, and programs at Andover or nearby schools. At all levels of instruction, attention is focused both on basic language skills and, increasingly, on the literature, history, and various art forms that reveal the people whose languages are being studied.

Students are advised to take the College Board SALII Subject lest in a world language as late as possible in their course of study, and in no case earlier than the second trimester of the third level.

For information on School Year Abroad, students should consult the SYA program coordinator.

ARABIC

Traditionally severely underrepresented on the American educational scene, the study of Arabic is now widely under stood to be an important undertaking. The Arabic program at Phillips Academy is a young but dynamic one, focused on the teaching of Modern Standard Arabic. We offer two year-long sequences of intensive and non-intensive language courses and two single-term courses on language and on culture. Arabic courses are open only to Uppers and Seniors. Students interested in Arabic are encouraged also to consider 1/1/57-55533/1 and 1/1/57-533/2.

Because of the limited availability of Arabic in colleges and universities, enrollment in the year-long courses requires conversation with and permission of the head of the Division of World Languages. The one-term courses are appropriate for anyone who wishes just an overview, or who is interested in learning what the study of Arabic entails before taking it up more seriously subsequently (whether at Andover or in college). There are many good reasons to take Arabic, but we want to make sure that students understand the consequences of their choices.

ARAB-100/1 First-Level Arabic

Five class periods. Beginning with the textbook, Ahf-Baa, and other resources, students will first acquire knowledge of the writing system of Arabic. Students will then work more systematically on Modern Standard Arabic using all four skills Ispeaking, listening, reading, writing) with the first book of the al-Kitab series. Language learning will be augmented by attention to various cultural topics throughout the term. Open only to Uppers and Seniors who have demonstrated success as language learners. Requires permission of division head.

ARAB-110/5 First-Level Arabic (T2)

a two-term commitment)

Five class periods. This course is open only to those who successfully complete ARAB-100 in the fall term, and for whom it is appropriate to continue at a non-accelerated pace. The course will continue to have as its focal text the first book of the al-Kitab series, with additional attention to various cultural topics throughout the year.

ARAB-120/5 Accelerated First-Level Arabic [T2]

(a two term commitment)

Five class periods. This course is open only to those who successfully complete ARAB-100 in the fall term, but for whom it is appropriate to continue at an accelerated pace. The goal of the course is to cover approximately one year of college level. Modern Standard Arabic using the first book of the al-Kitab series. Language learning will be augmented by attention to various cultural topics throughout the year. This course may require more than the standard four to five hours of homework per week.

ARAB-130 A Short Course in Beginning Arabic

Five class periods. This one-term course is intended as a means for students to acquire some familiarity with the Arabic language. Students will be presented with authentic written and spoken language, and will acquire basic functional skills, including the ability to read and swrite the alphabet. Using the textbook, *Alif-Baa*, and other resources, students will acquire some useful knowledge of the language, but an important purpose of the course is to help students decide if they wish to pursue Arabic more seriously in the future. Open only to Uppers and Seniors.

ARAB-131 The Cultures of Arabic-Speaking Peoples

Five class periods. Although there are no prerequisites, this course is designed to dovetail with HIST-SS5331 (The Middle East Heartland) and ARAB-130. The course focuses on various facets of the cultures of diverse Arabic-speaking peoples. Through films, art, music, and readings in literature, religion, and history, students will consider a wide range of significant cultural issues. Open only to Uppers and Seniors.

ARAB-200/0 Second-Level Arabic

(a yearlong commitment) (offered beginning in 2011–2012)

Five class periods. Building on the work of ARAB-100, this course will complete work on al-Kitab, Part 1. Language learning will be augmented by attention to various cultural topics throughout the year. Open only to Seniors who have successfully completed ARAB-110 or its equivalent.

ARAB-220/0 Accelerated Second-Level Arabic

la yearlong commitment

Five class periods. Using al-Kitab, Part 2, this course builds on the foundation of ARAB-120. The course continues the four-skills approach to Modern Standard Arabic begun in ARAB-120, with more focused attention to listening and reading comprehension now possible. Language learning will be augmented by attention to various cultural topics throughout the year. Open only to Seniors who have successfully completed ARAB-120 or its equivalent. This course may require more than the standard four to five hours of homework per week.

CHINESE

Standard Chinese (a.k.a. Mandarin) boasts the largest number of native speakers of any language in the world and is learned in school by all Chinese people regardless of local dialect. In addition to its burgeoning economy, China is also known for its rich history and culture, and the knowledge of Chinese can open doors to a wide variety of opportunities. Because Chinese words are tonal (varied in pitch) and uninflected (unmodified due to person, tense, number, gender, etc.), and because the script consists of characters rather than an alphabet, the study of Chinese offers a unique learning experience.

All Chinese courses develop listening, speaking, reading, and writing skills (using the simplified script). Intermediate and advanced levels introduce and develop the reading and writing of Chinese using computers. Opportunities are available for students to participate in the five-week study/travel program in China and an academic year program, both run by School Year Abroad (SYA) in Beijing, China.

First-Level Chinese CHIN-100/0

(a yearlong commitment)

Five class periods. This course provides an introduction to spoken and written Chinese, with an emphasis on pronunciation, the pinyin Romanization system, and the building blocks (radicals) of Chinese characters.

Accelerated First-Level CHIN-120/5 Chinese (T2)

(a two-term commitment)

Five class periods. Distinguished students will be recommended by the department for this accelerated course at the conclusion of the first trimester of CHIN-100. Upon successful completion of this course, students move on to CHIN-220/0.

Second-Level Chinese CHIN-200/0

(a yearlong commitment)

Five class periods. This course continues to emphasize proficiency in everyday situations. Students enlarge their inventory of words and phrases while also developing a deeper understanding of the essential features of Chinese grammar.

Prerequisite: Successful completion of CHIN-100.

CHIN-220/0 Accelerated Second-Level Chinese

(a yearlong commitment)

Five class periods. Upon successful completion of this course, students move directly to CHIN-400 by permission of the department.

Prerequisite: Successful completion of CHIN-120.

CHIN-230/0 Honors Accelerated Second-Level Chinese

(a yearlong commitment)

Five class periods. Students in CHIN-120 who have demonstrated a particularly strong mastery of both spoken Chinese and Chinese characters will be recommended by the department for this honors accelerated course at the conclusion of spring term of the previous year. Upon successful completion of this course, students move on to CHIN-520.

Prerequisite: Successful completion of CHIN-120.

CHIN-300/0 Third-Level Chinese

(a yearlong commitment)

Four class periods. This course provides more emphasis on reading and writing. Students are introduced to longer texts, covering such topics as family life, social issues, and aspects of Chinese culture.

Prerequisite: Successful completion of CHIN-200.

Fourth-Level Chinese CHIN-400/0

(a yearlong commitment)

Four class periods. Increased use of authentic materials is employed as more sophisticated aspects of language and culture are explored. In particular, students are exposed to the more formal written style of Chinese, which is prevalent in newspapers, on street signs, etc.

Prerequisite: Successful completion of CHIN-300 or 220.

Advanced Placement Chinese CHIN-520/0

(a yearlong commitment)

Five class periods. This intensive course is designed in accordance with the College Board guidelines to prepare students for the AP exam in Chinese. Students refine their communicative abilities in the interpersonal, interpretive, and presentational modes while deepening their understanding of Chinese history and contemporary society.

Prerequisite: Successful completion of CHIN-230 or 400.

CHIN-620/1 CHIN-620/2

Advanced Topics in Chinese CHIN-620/3

Four class periods. This advanced course explores a wide range of modern issues in China within a historical, political, and cultural framework. In addition to assigned readings and class discussions, students also are expected to conduct independent research (using a variety of media), present oral reports, and submit papers on a regular basis.

Prerequisite: Successful completion of CHIN-230, 400, or 520.

COURSES FOR ADVANCED HERITAGE LEARNERS

The following courses, offered on a rotating basis, are intended for students with near-native fluency in Chinese and extensive familiarity with Chinese culture. Course structure and content are designed to emulate the challenge of an actual high school-level course taught in China. A student may enter the Advanced Heritage level only with permission of the department, once accepted, however successful completion of a course at this level would qualify him her for the next course in the sequence

CHIN-640 Modern Chinese Literature for Advanced Heritage Learners

not offered in 2010-2011)

Four class periods. This course is intended for students with near native fluency in Chinese and extensive familiarity with Chinese culture. A variety of literary genres and works are studied, and the course structure and content are designed to emulate the challenge of an actual high school-level course taught in China.

Prerequisite: Successful completion of CHIN-641 or 642, or permission of the department

CHIN-641 Topics in 20th-Century China for Advanced Heritage Learners (not offered in 2010–2011)

Four class periods. This course is intended for students with near-native fluency in Chinese and extensive familiarity with Chinese culture. A variety of recent cultural and historical topics are studied, and the course structure and content are designed to emulate the challenge of an actual high school-level course taught in China.

Prerequisite: Successful completion of CHIN-640 or 642, or permission of the department

CHIN-642/1 CHIN-642/2 CHIN-642/3 CHIN-642/3 Advanced Heritage Learners

Four class periods. This course is intended for students with near-native fluency in Chinese and extensive familiarity with Chinese culture. A variety of contemporary topics are studied, and the course structure and content are designed to emulate the challenge of an actual high school-level course taught in China.

Prerequisite: Successful completion of CHIN-640 or 641, or permission of the department

FRENCH

The Department of French offers courses at six different levels, from beginning through Advanced Placement and beyond to courses for fluent speakers. At all levels, classes are conducted entirely in French, and in all courses French is taught in cultural contexts. The first two years emphasize basic language structures; the third serves as a transition to advanced courses that offer in-depth study of the literature and civilization of France and other French-speaking areas, especially those in Africa and North America. Each year, the Academy enrolls French-speaking students from abroad who provide important firsthand contact with Francophone cultures. Students may spend a full academic year in Rennes

through the School Year Abroad program. Information on this and other off campus opportunities can be obtained from the Department of World Languages.

FREN-100/1 First-Level French

Five class periods. This course is designed for those students who have had little or no previous world language experience. The course emphasizes the skills of listening, speaking, reading, and writing in the cultural context of the Francophone world. Assignments are regularly required in the Language Learning Center. (Text. Motifs. Jansma/Kassen)

FREN-110/1 First-Level French

Five class periods. This course is designed for those students who have had previous experience in French, but who are not sufficiently prepared for the second-level course. The course emphasizes listening comprehension and the use of basic conversational patterns of French speech. It includes elementary grammatical and idiomatic structures, as well as appropriate reading material Assignments are regularly required in the Language Learning Center. (Text: Motifs, Jansma/Kassen)

FREN-110/5 First-Level French (T2)

(a two-term commitment)

Five class periods. This course is a continuation of the First-Level French course for students from both FREN-100 and FREN-110 in preparation for FREN-200 the following year.

FREN-120/5 Accelerated First-Level French (T2)

(a two-term commitment)

Five class periods. Students will be recommended by the teacher for this accelerated course at the conclusion of the first trimester of FREN-100 or FREN-110. Successful completion of FREN-120 allows students to advance to FREN-220. The FREN-100/110-120-220 sequence covers three years of French in two years.

FREN-200/0 Second-Level French

(a yearlong commitment)

Five class periods. For students who have completed FREN-110, or for new students who qualify through a placement test. Students practice the idiomatic expressions that are most useful in everyday situations. While continuing to develop aural-oral skills, this course involves reading nontechnical French prose and writing simple compositions. (Texts: A votre tour, Valette and Valette; Grammaire progressive du français CLE.)

FREN-220/0 Accelerated Second-Level French

(a yearlong commitment)

Five class periods. Upon successful completion of this course, students continue their study in fourth-year courses. Because of the rapid pace, each student's progress will be evaluated closely in November to determine

whether it is in his or her best interest to move to FREN- 200. The course content consists of a complete grammar review and acquisition of contemporary vocabulary, along with films and varied texts. (Texts: Cinéphile, Conditto; Le Petit Nicolas, Sempé and Goscinny; Le Comte de Monte Cristo, Dumas)

FREN-300/0 Third-Level French

(a yearlong commitment)

Four class periods. This yearlong course develops listening, speaking, reading, and writing skills through a review of grammar and the study of French films. Articles from magazines and newspapers, online resources, and poems and recitations complement this core program. (Text: Cinéphile, Conditto)

ADVANCED COURSES

FREN-400/1 French Civilization

(F)

Four class periods. Intended for students who understand, read, and write French well and who already speak at a competent level, but who desire to develop further conversational skills and acquire the vocabulary and idiomatic expression necessary to be able to discuss major cultural and social issues. The course is based on current articles taken directly from the French and Francophone press. The students also read a novel and write a weekly essay. Diction, elocution, and intonation also are stressed through debates and role-playing. (Text: Civilisation progressive du Française, CLE; Une Fois Pour Toutes, Sturges, Herbst, Nielsen; M.Ibrahim, Schmitt)

FREN-400/2 The Francophone World

(W)

Four class periods. Students continue the study of French through a focus on the French-speaking areas outside of France. The course studies the civilizations of North, West, and Sub-Saharan Africa and of the Antilles, and includes a study of the geographical, social, and historical aspects of these regions of the world. (Text: *Une Fois Pour Toutes*, Sturges, Herbst, Nielsen)

FREN-400/3 Francophone Literature

(0)

Four class periods. The central texts during spring term are Contes et Légendes des Antilles, Georgel, and Le Racisme Expliqué a Ma Fille, Ben Jelloun, in addition to Une Fois Pour Toutes, Sturges, Herbst, Nielsen.

Prerequisite: Enrollment in FREN-400 for the winter term.

FREN-420/0 Crossing Cultures

(a yearlong commitment)

This course includes conversation practice, vocabulary acquisition, grammar exercises, and essay writing in the context of cross-cultural themes in literature and movies. Students consider the question of cultural identity and

what it means to have more than one language and more than one culture.

Fall term—The class studies the complex relationship between France and Algeria in Albert Camus's novel L'Etranger and Gillo Pontecorvo's movie La Bataille d'Alger.

Winter term — The relationship between France and Germany provides the cultural background for *La Grande Illusion*, *Le Silence de la Mer*, and *Le Dernier Métro*.

Spring term — Texts include Marjane Satrapi's *Persepolis*, an autobiographical French graphic novel set in Iran and France, and *Hiroshima Mon Amour*, by Marguerite Duras. The course includes the movies *Persepolis*, directed by Marjane Satrapi and Victor Paronnaud, and *Hiroshima Mon Amour*, directed by Alain Resnais.

FREN-520/0 French Civilization, Literature, and Cinema

(a yearlong commitment)

Five class periods. Open to students who have completed three terms of fourth-level French and to qualified new students. Students explore works of literature, films, and current events to develop their critical-thinking skills and understand the cultural and social contexts of the French-speaking world. The course also includes instruction in language skills and in the methodology of expository writing in French. It meets the requirements of the Advanced Placement French Language exam.

The works studied include texts such as *Cyrano de Bergerac*, Rostand; *Candide*, Voltaire; *Béni ou le Paradis Privé*, Bégag; *Paul et Virginie*, Bernardin de Saint Pierre; and *Mercure*, Nothomb; and films such as *Le Grand Bleu*, Besson; *Les 400 Coups*, Truffaut; and *Le Goût des Autres*, Jaoui.

FREN-600 Modern Literature

Two two-hour class periods. A seminar course open to students who have completed 500-level French or the equivalent. The class studies modern novels, plays, poetry, and films.

GERMAN

German is spoken in four countries with diverse cultural, political, and economic traditions: Austria, the Federal Republic of Germany, Liechtenstein, and Switzerland. It is also the mother tongue of significant minorities in neighboring countries. Among Europeans, in fact, the approximately 98 million native speakers of German greatly outnumber those of English, French, Italian (58-60 million each), or Spanish (36 million). In business, diplomacy, and tourism, German stands second only to English in Western Europe, and in Eastern Europe it holds first place. It is the language of many of modern history's most notable writers, scientists, musicians, and philosophers, among them Nietzsche, Beethoven, Bach, Einstein, Freud, Goethe, and Mozart. As English is a Germanic language, the study of German is quite accessible for English speakers. No prior world language experience is necessary to begin the study of German. Many students find the study of German

enhances their comprehension of English grammar and gives them a unique insight into the English language.

The department offers a five year course of study in teading writing, and speaking German. Digital lab materials, most of which are available to students over the Web, and contemporary films supplement language immersion in the classicom. Students who complete GERM 300 with an honors grade are prepared to take the College Board Subject, lest, while completion of GERM 520 with an honors, grade prepares students for the Advanced Placement exam. Students at the second, third, and fourth levels also have the opportunity to participate in the National German. Exam as well as the American Association of Teachers of German three week summer study home stay program in Germany.

GERM-100/0 First-Level German

(a yearlong commitment)

Live-hour course. A yearlong elementary course in speaking, reading, writing, listening comprehension, and culture. No previous experience in German or any other world language is needed to enroll in this course. GFRM-100 offers significant daily structure and support in order to facilitate successful language learning. Current text: Deur ch. Aktuell. 1. 5th edition, by Kraft, supplemented by digital lab exercises, contemporary films, songs, and adapted short stories.

GERM-150/5 Accelerated First-Level German (T2)

(a two-term commitment)

Five class periods. Open to students who have completed the fall term of *GFRM-100* with distinction and who have been recommended by their instructor. Superior work in this course enables students to enter *GFRM-250* the following fall, followed by *GFRM-300* in the winter and spring terms, thereby completing three years of the study of German in two years. An accelerated course in grammar, speaking, listening comprehension, reading, and culture, this course may require more than the standard four to five hours of homework per week. Current texts: *Dewich Akmell 1* and 2, by Kraft, supplemented by video, digital lab exercises, contemporary films, poems, songs, and adapted short stories.

GERM-200/0 Second-Level German

la vearlong commitment)

Open to students who have successfully completed GERM-100 or its equivalent. The study of basic grammar, conversation, and reading skills is continued along with the introduction of theme writing. Current text: Deutsch heute. 9th edition, supplemented by digital lab exercises, contemporary films, songs, and adapted short stories.

GERM-250/1 Accelerated Second-Level German

Five class periods. Open to students with strong learning skills who have completed *GERM-150* or its equivalent with distinction. This accelerated course covers the

spring term GFRM-200 syllabus with the addition of intensive grammar review and writing. This course may require more than the standard four to five hours of homework per week. Successful completion of this course qualifies students to enter GFRM-300 in the winter term. Current texts. Emil und die Deiekirie, by Kastner, Vaier und Sohn, by Eppert; and Deutsch heute. 9th edition, supplemented by movies and digital lab exercises.

GERM-300/0 Third-Level German

a yearlong commitment

Four hour course. Open to students who have successfully completed GERM 200 or GERM 250 or its equivalent. This course develops the language skills in speaking, listening comprehension, reading, and writing through the introduction of German texts in the original Greater emphasis on classroom discussion as well as short essay writing is introduced. Current texts: Biedermann und die Brandstifier, by Frisch; Vater und Sohn, by Eppert, Deut chheute, 9th edition, and a selection of short stories and poems. A short theatrical presentation in German complements other classroom work. Digital lab exercises, contemporary films, and songs supplement the reading. Students who complete GERM 300 with an honors grade are prepared to take the College Board Subject Test. Additional practice tests are recommended.

GERM-400/1 GERM-400/2 GERM-400/3 Fourth-Level German

Five hour course. Open to students who have successfully completed GERM-300 or its equivalent. This course is identical to the yearlong course GERM-520 (Advanced Placement German). Students who are unsure of their commitment to taking the yearlong AP course should enroll in this course as it is term-contained and can be taken for one, two, or all three terms. Students who complete all three terms of GERM-400 with an honors grade are well prepared to take the AP exam in May.

GERM-520/0 AP German

(a vearlong commitment)

Five-hour course. Open to students who have successfully completed *GERM-300* or its equivalent. Students are exposed to a variety of German works in the original, including poems, plays, short stories, novels, and accounts of current events. Authors currently read: Brecht, Funke, Dürrenmatt, Kafka, Rilke, and Zweig. Vocabulary expansion, increased oral fluency through classroom discussion, and written accuracy through short essays are central to this course. Selective review of advanced grammar topics is incorporated as needed. Students who complete this course with an honors grade are well prepared to take the AP exam in May.

Fall term — Durrenmatt's play *Der Besuch der alten Dame*, concluding with a short theatrical performance.

Winter term - Novel and AP preparation.

Spring term - Short stories, continued AP preparation.

GERM-600/1 GERM-600/2

GERM-600/3 Advanced Topics in German

Four class periods. Open to students who have successfully completed three terms of fourth-level or AP German, or their equivalent, this course varies with the needs of the class. It is usually a seminar in the reading and discussion of German novels and plays. Authors currently read: Brecht, Goethe, Kafka, Dürrenmatt, Richter, Lenz, and Zweig. Offered only if there is sufficient enrollment.

GREEK

Through the study of Greek, the Department of Classics offers students a direct entry into Greek literature. The Greek alphabet is easily mastered in the first few class meetings, and students quickly discover that the poetic and expressive qualities of Greek language and literature stimulate the imagination and illuminate the early political and intellectual development of the Mediterranean basin. The regular sequence in Greek is *GREK-100, 200, 300,* and 400, though students wishing to accelerate may want to consider *GREK-150* followed by *GREK-300*, with the permission of the department.

GREK-100/0 First-Level Greek

(a yearlong commitment)

Five class periods. The course introduces the student directly to the classical Greek of Periclean Athens through a series of readings that present not only the vocabulary, forms, and syntax of the language, but also the thoughts, feelings, and actions that characterize Greek culture. Though preliminary selections are necessarily simplified, within the first year students are reading excerpts in their original form from various Greek authors.

GREK-150/0 First- and Second-Level Greek, Intensive

(a yearlong commitment)

Five class periods. The course is open to Seniors, Uppers, and others, with the permission of the department. It covers in one year the essential material of *GREK-100* and *GREK-200*, and basic forms and structure, along with ample selected readings from various Greek authors.

GREK-200/0 Second-Level Greek

(a yearlong commitment)

Five class periods. This course continues the format of *GREK-100*, with further systematic development of reading skills and control of vocabulary, forms, and syntax through the medium of more advanced selections from the Greek masterpieces, always with the purpose of understanding the spirit of the people who produced them.

GREK-300/0 Third-Level Greek: Iliad and Odyssey

(a yearlong commitment)

Four class periods. Students will study selected works of Homer, Herodotus, and Plato.

GREK-400/1 Fourth-Level Greek:
GREK-400/2 Philosophy and History,
GREK-400/3 Tragedy, Lyric

Four class periods. Ancient concepts of justice and morality are examined through the works of Plato and Thucydides. Human tragedy is explored in a play of Sophocles or Euripides. One term is devoted to the study of emotion and self-expression in the Greek lyric poets.

JAPANESE

JAPA-100/0 First-Level Japanese

(a yearlong commitment)

Five class periods. Open to all students. Seniors may take the course, but in situations of high enrollment, priority will be given to younger students to fulfill language requirement. Students will learn to express themselves in a variety of conversational situations and to read and write hiragana, katakana, and about 15 kanji, or Chinese characters. Classroom instruction will be based on Adventures in Japanese, Book 1, and its corresponding workbook. Students will learn not only the basic grammatical structures but also important elements of Japanese culture.

JAPA-130 Introduction to Japanese (not offered in 2010–2011)

Four class periods. This course is designed for students who are thinking of traveling to Japan and/or studying Japanese as a second language at Andover or in college. In addition to developing survival-level speaking skills, students will learn to read and write using katakana, biragana, and 50 to 75 kanji, or Chinese characters. Students also will sing and perform short skits, and will follow at least one popular animated film in Japanese. Selections from the textbook Japanese for Busy People, karaoke songs, audio and video tapes, visits by Japanese-speaking guests, and materials developed by the instructor will support classroom instruction. In the last weeks of the course, students will research a social, cultural, or historical topic in which they are personally interested and then present it to their classmates.

JAPA-200/0 Second-Level Japanese

(a yearlong commitment)

Five class periods. Open to students who have successfully completed first-level Japanese or its equivalent. A continuation of *JAPA-100*, the instruction will be based on *Adventures in Japanese, Book 2*, and its workbook. In this course there is an increased emphasis on grammar and an additional 150 *kanji*.

JAPA-300/0 Third-Level Japanese

la vearlong commitment)

Four class periods. Open to students who have success tulls completed second level Japanese or its equivalent, Instruction is given based on Adventures in Japanese, Book 3 and its workbook. Imphasis is placed on more conversational practice using the previously learned grammar and more advanced new grammar. Additional emphasis is placed on a significant increase in kanji characters. Students are expected to learn an additional 150 kanji by the end of the course.

JAPA-400/0 Fourth-Level Japanese

la yearlong commitment)

Lour class periods. Open to students who have successfully completed third level Japanese or its equivalent. Using the advanced textbook of Adventures in Japanese, Book 1 and its workbook, students will learn to express themselves more creatively and to communicate with status appropriate word usage. Students will learn an additional 150 kanji by the end of the course. Emphasis is placed on more advanced Japanese culture and understanding Japanese history and values. Projects include interviews, research, and the final papers.

JAPA-520/0 Japanese Language and Culture

a yearlong commitment)

This course is designed to be comparable to college university Japanese courses where students complete approximately 300 hours of college-level classroom instruction. Like corresponding college courses, this course supports students as they develop the productive, receptive, and cultural skills necessary to communicate with native speakers of Japanese Students' proficiency levels at the end of the course are expected to reach the intermediate-low to intermediate-mid range, as described in the American Council on the Teaching of Foreign Languages (ACTFL) Proficiency Guidelines.

JAPA-600/1 JAPA-600/2

JAPA-600/3 Advanced Topics in Japanese

Four class periods. This course focuses on the development of additional *kanji*, and on vocabulary expansion through the study of Japanese newspapers, short stories, and a feature-length film. Emphasis is placed on students' istening comprehension and speaking proficiency.

Prerequisite: Successful completion of JAPA-400 and/or the approval of the instructor

LATIN

The Department of Classics offers students a direct entry into the traditional Latin literary curriculum while at the same time providing students with an opportunity to develop a more sophisticated historical and international

perspective. Whenever possible, traditional language study is supplemented with readings in English that address both ancient and modern cultural concerns

LATN-100/0 First-Level Latin

(a yearlong commitment)

Five class periods. The purpose of the course is to teach students the basic features of the Latin language and of Roman culture in relation to other cultures, e.g., family life and societal relationships, slavery, travel, sports, life in the big city, entertainment, and education. Students learn the traditional forms and syntax. All six tenses, indicative and passive, are covered, as well as all five declensions of nouns, three declensions of adjectives, and the standard pronouns. There is extensive practice in recognizing endings of nouns, adjectives, pronouns, and verbs, as well as case uses and normal Latin sentence structures, with the goal of mastering basic techniques of accurate translation and comprehension of Latin sentences and stories. Students complete the textbook Jenney's First Year Latin, then study Jenney's Second Year Latin up through the ablative absolute.

LATN-130 Introduction to Latin

(1-S)

Five class periods. Comparable to the first term of *LATN-150*, but with less depth of coverage, this one-term course is for students seeking an introduction to the Latin language or those whose studies in other languages (including English) have aroused their curiosity about the workings of languages (grammar, syntax, and vocabulary). It offers special profit and fascination to students of French. Spanish, and Italian, since it gives a wider perspective on much of what they already know. For students who plan some day to study Russian or German, it serves as an introduction to the workings of highly inflected languages. It is a term-contained course, but students wishing to continue with Latin will have the opportunity to do so.

LATN-150/0 First- and Second-Level Latin, Intensive

(a yearlong commitment)

Five prepared class periods. This course covers in one year the essential elements of *LATN-100* and *LATN-200*.

LATN-200/0 Second-Level Latin

(a yearlong commitment)

Five prepared class periods. During the fall, the linguistic and cultural approach of *LATN-100* is continued as the class reviews and completes the basic grammar (including participles, subjunctives, and indirect statements) and reads about other aspects of Roman life. In the winter and spring, students read selections from Caesar, Livy, Ovid, and Apuleius' tale of *Cupid and Psyche*.

LATN-300/0 Third-Level Latin: Livy, Catullus, Cicero, Vergil

(a yearlong commitment)

Four prepared classes, all single periods. Students begin the fall with a thorough review of the Latin language in conjunction with correlated reading passages. In the latter half of the fall, students read selections from Livy or Cicero. In the winter, students read the lyric love poetry of Catullus and selections from Cicero's speech, *Pro Caelio*, defending one of Catullus's former friends against charges brought by the woman to whom Catullus wrote his most famous poems. In the spring, students read selections from Book II of Vergil's *Aeneid*, the story of the Trojan Horse and the destruction of Troy, a heroic backdrop for very human struggles of duty and loyalty among women and men, parents and children, leaders and followers, humans and their gods.

ADVANCED COURSES

LATN-520V and LATN-520L (Lyric, Horace, and Catullus) are open to students who have completed LATN-300 and have met other criteria set by the Department of Classics. Although students normally read Vergil (LATN-520V) the year after taking LATN-300 and Latin lyric (Horace and Catullus, LATN-520L) the year after reading Vergil, students completing LATN-300 may sign up for LATN-520L on a space-available basis, preference being given first to all completing LATN-520V, then to Uppers completing LATN-300 with honor grades, then to others at the discretion of the Department of Classics. Students may not switch between LATN-520V and 520L during the year.

LATN-520V/0 Vergil

(a yearlong commitment)

Five prepared class periods. Students read the entire *Aeneid* in English and substantial selections of Books I, IV, and VI in Latin, examining Vergil's literary form and technique, as well as the philosophical and political dimensions of his age. Book II, which students will have read in the spring of *LATN-300*, is reviewed quickly. Book I frames Rome's 1,000-year ascendancy in the rivalries of divine wills. Book IV tells the story of the tragic conflict between Aeneas' love for Queen Dido and his obligation to imperial Roman destiny. Book VI features Aeneas' descent into the underworld to gain prophetic visions of Rome's future greatness. Brief selections from Books VII–XII, the "Roman Iliad," round out the readings for the year.

Prerequisite: A grade of 5 or higher in LATN-300 or permission of the department.

LATN-520L/1 LATN-520L/2 LATN-520L/3 Horace, Catullus

Four prepared class periods. In the fall, students come face to face with the brilliance, passion, and candor of Catullus's lyric genius. In the winter term, they study the lyric poetry of Horace, experiencing firsthand his *curiosa felicitas*, admired and celebrated by other poets for 2,000 years. In the spring, students learn to compare and contrast these two monumental literary figures.

Prerequisite: A grade of 5 or higher in LATN-300 or permission of the department.

RUSSIAN

With the demise of the Soviet Union and resulting rapid expansion in East-West activity, the ability to communicate in Russian and knowledge of Russian culture have lost none of their importance. At the beginning of the 21st century, there are more contacts now with Russia and countries of the former Soviet Union than ever before. Not only are American business, science, and technology clamoring for Russian speakers to work in and with the new Russia, but Russian remains the *lingua franca* in all the former Soviet republics, making it extremely important now for national security reasons as well.

No prior world language experience is necessary to begin the study of Russian. Before studying Russian, many consider it strange and difficult, but its alphabet and vocabulary have the same sources as English, and it follows many of the same principles of grammar. Continuous oral, visual, and instructional use quickly make Russian familiar and enjoyable.

The Russian department offers a five-year course of study. This well-established program ensures confident progress in speaking, aural comprehension, reading, and writing. Elementary courses use a unique digital textbook to strengthen grammar skills and improve vocabulary learning. At the upper levels, students use Russian word processors for their compositions and the Web for research and course work. Video is used throughout to improve understanding of culture as well as language. Students who have had success in another world language or who have some prior experience with Russian are encouraged to consider taking *RUSS-150* after the fall term introduction. It is the policy of the World Language Division to use the target language exclusively in the classroom.

RUSS-100/0 First-Level Contemporary Russian

(a yearlong commitment)

Five class periods. A yearlong elementary course in speaking, listening, reading, and writing. Texts: all-digital text-book developed by the department for exclusive use at Phillips Academy; reference materials.

RUSS-130 A Short Course in Beginning Russian

Lour class periods. A term contained introduction to speaking, reading, and writing Russian, using conversational text materials, this course enables students to feel comfortable with the somewhat different features of a Stavic language. It also gives a sound foundation for continuing courses in Russian language, history, and literature, whether at Andover or in college.

RUSS-150/5 Accelerated First-Level Russian (T2)

(a two-term commitment)

Five class periods. Open to students who have completed the fall term of RUSS 100 with distinction and who have been recommended by their instructor. Superior work in this course enables students to enter RUSS-250 in the fall, followed by RUSS 300 in the winter and spring terms, thereby completing three years of Russian language in two years. An accelerated course in grammar, speaking, listening comprehension, reading, and culture, this course may require more than the standard four to five hours of homework per week. Texts: the same as those of RUSS-100 and RUSS-200

RUSS-200/0 Second-Level Contemporary Russian

(a yearlong commitment)

Five class periods. Completion of the elementary course with continued emphasis on active use. Texts: all-digital textbook developed by the department for exclusive use at Phillips Academy; reference materials.

Prerequisite: Succes ful completion of RUSS-100

RUSS-250/1 Accelerated Second-Level Russian

Five class periods. Open to students with strong learning skills who have completed RUSS-150 or its equivalent with distinction. This accelerated course completes the work of RUSS-200 with the addition of intensive grammar review and writing. Successful completion of this course qualifies students to enter RUSS-300 in the winter term. This course may require more than the standard four to five hours of homework per week. Texty: the same as those of RUSS-200 and fall term of RUSS-300.

RUSS-300/0 Third-Level Russian

a vearlong commitment)

Four class periods. Students will improve conversation and composition skills through work with selected 19th- and 20th-century short stories and with video materials. A review of problematic areas of grammar is integrated into the course. Work with video and audio materials in the Language Learning Center constitutes an important component of the course

Prerequisite: Succe tul completion of RUSS-200 or 250.

RUSS-400/1 RUSS-400/2

RUSS-400/3 Fourth-Level Russian

Four class periods. Further work in conversation and composition. Over the course of the year, there is a transition from texts that are lightly adapted to texts in the original. The focus of materials in the winter and spring terms is the 20th century. The winter term is devoted to a single text, fall and spring terms examine shorter texts and video materials. Work with video and audio materials in the Language Learning Center constitutes an important component of the course.

Prerequisite: Successful completion of RUSS-300

RUSS-520/0 Advanced Fourth-Level Russian

(a yearlong commitment)

Five class periods. The core materials of the course are identical to those used in *Fourth-Level Russian*. In addition, however, one of the five weekly meetings will be devoted to preparation for the newly announced Advanced Placement Russian test. The additional material will be selected to reflect the structure of the AP exam. This course may require more than the standard four to five hours of homework per week.

Prerequisite: Successful completion of RUSS-300 or permission of the department chair.

RUSS-600/1 RUSS-600/2

RUSS-600/3 Advanced Topics in Russian

Four class periods. A central goal of this course is to provide students with an overview of the major themes and developments in the last two centuries of Russian literature and history. Students will be expected to integrate this knowledge into the base they have acquired in their previous Russian study. At the same time, students will work to improve their ability to diagnose their own language-learning strengths and weaknesses, and, where relevant, to plan their approach to the continued study of Russian at the college level. Current events are a major component of the spring term.

Prerequisite: Successful completion of RUSS-400.3 or 520.

SPANISH

The Department of Spanish offers a six-year course of study Students who demonstrate unusual ability and interest during the first year are invited to join an accelerated sequence. The language of the classroom is Spanish, and extensive use is made of the Language Learning Center. Students learn to understand, speak, read, and write the language, and also are given a comprehensive introduction to the literature and culture of Spain and Latin America. To enhance a student's language experience, the opportunity to study in Zaragoza is offered through the School Year Abroad program. Information is available through the SYA program director. Upon completion of any fourth-

level course sequence or combination, a student will be prepared to take the AP language exam.

SPAN-100/1 First-Level Spanish

Five class periods. This course is designed for those students who have had no previous world language experience. The course emphasizes listening comprehension and the use of basic conversational patterns of Spanish speech. Elementary grammatical and idiomatic structures are introduced, as well as appropriate reading material. All classwork is conducted in Spanish. (Text: Descubre 1)

SPAN-110/1 First-Level Spanish

Five class periods. This course is designed for those students who have had previous experience in Spanish or in another world language. The course emphasizes listening comprehension and the use of basic conversational patterns of Spanish speech. Elementary grammatical and idiomatic structures are introduced, as well as appropriate reading material. All classwork is conducted in Spanish. (Text: Descubre 1)

SPAN-110/5 First-Level Spanish (T2)

(a two-term commitment)

Five class periods. This course is a continuation of the first-level Spanish course for those students not enrolled in SPAN-120 (Accelerated First Level Spanish). (Text: Descubre 1)

SPAN-120/5 Accelerated First-Level Spanish (T2)

(a two-term commitment)

Five class periods. Especially competent students will be recommended for this accelerated course at the conclusion of SPAN-100/1 or SPAN-110/1. Superior work in SPAN-120 enables recommended students to enter SPAN-220. Descubre 2 serves as the primary text (see above) and is supplemented with reading selections and proficiency-oriented exercises.

SPAN-200/0 Second-Level Spanish

(a yearlong commitment)

Five class periods. Using the *Descubre 2* text, this course completes the introduction of grammar begun in the first year. Topics covered are imperfect, imperfect/preterite contrast, subjunctive, perfect tenses, future, and conditional. Extensive thematic vocabulary is integrated into each lesson. There are integrated video and audio programs by which the grammar and vocabulary are reinforced. Significant emphasis is placed on oral practice. Writing and reading skills are further developed. Various Latin American countries are studied.

SPAN-220/0 Accelerated Second-Level Spanish (a yearlong commitment)

Five class periods. This is an accelerated second-year course that develops communicative competence, and provides intensive reading and writing practice. At least eight Latin American and Spanish short stories are read in the first trimester, followed by the theatrical play La Muerte y la doncella in the second trimester, and Relato de un naufrago in the third trimester. Advanced concepts of grammar and idiomatic expressions are studied and put into practice in three-page essays. In order to work on pronunciation and speaking proficiency, PowerPoint and oral presentations are required, as is acting out specific scenes from the theatrical play. Students normally must maintain an honors grade to remain in the course. There are at least three tests per trimester, not including final exams. This course enables students, upon departmental recommendation, to enroll in a 400/420-level course. Open to students who have completed SPAN-120 with distinction and other qualified students with departmental permission.

SPAN-300/0 Third-Level Spanish

(a yearlong commitment)

Four class periods. During the fall term, students read short stories, testimonies, and poems of diverse Hispanic traditions that explore notions of family, individual and collective identities, and personal and social relationships. These texts also serve as structural and thematic models to various written exercises and other class activities.

The primary objective of the winter term is to expose students to a challenging and sophisticated literary text, *Crónica de una Muerte Anunciada* (Chronicle of a Death Foretold), while enforcing their structural skills and communicative competence through a series of grammar, vocabulary, and comprehension exercises based on the novel.

In the spring, students read Las Bicicletas Son Para el Verano (Bicycles Are for Summer) and a play about the Spanish Civil War by a contemporary Spanish playwright, and then perform selected scenes from this work.

ADVANCED COURSES

SPAN-400/1

SPAN-400/2 Current Events and Multimedia
SPAN-400/3 Approaches to the Hispanic World

Four class periods.

Fall term—(Hispanic America)—Students will refine speaking, writing, and listening skills in Spanish and the ability to express current issues through a cultural context. This course will use canonical Latin American literary texts, film, and journalism in order to provide a basis to discuss current and historical issues of four Latin American countries: Argentina, Chile, Colombia, and Mexico. Furthermore, the course will begin a comprehensive review of basic to advanced grammar structures for students thinking about taking the various national Spanish exams. Class requirements include three essays

with subsequent corrections, three tests (not including the final exam), and a class presentation made in PowerPoint Daily class participation is essential

Winter tern - Spanish and Latin American Film) through the study and analysis of various films from Spanish-speaking countries, students further develop oral and written proficiency in the language. Representative cinematic works of Cuba, Spain, Argentina, and Mexico serve as an artistic medium for discussion of historical, cultural, and political issues. These films serve to enhance students' knowledge of the complexity and richness of Hispanic cultutes. In addition to weekly tests on vocabulary and general con prehension of the films, students will produce an orighal script and a short video at the end of the term. Students also will enhance their writing by creating four essays based on issues presented on the films. The study of grammar will concentrate on the more challenging structures for English speakers, continuing the grammar review with systematic exercises that were started in the previous SPAN 400/1 Daily class participation is essential

Spring term—(Hispanic Caribbean)—Students will refine speaking and writing through the analysis of poetry and short stories of select Caribbean authors. This course will use canonical Caribbean poetry, short stories, film, music, and journalism in order to provide a basis to discuss and analyze current and historical issues of Puerto Rico and Cuba. In addition, the course will complete the review started in the fall and winter trimesters of basic to advanced grammar structures. Class requirements will include two essays with subsequent corrections, a class presentation made in PowerPoint, a midterm exam, and a final exam. Daily class participation is essential.

SPAN-401/1 SPAN-401/2 Introduction to SPAN-401/3 Hispanic Literature

Four class periods. Each trimester the class aims to develop language skills through reading, discussion, oral presentations, and regular writing assignments centered around major writers and texts of the contemporary Hispanic world. This course also emphasizes some of the finer Spanish grammar points and idiomatic expressions.

Fall term — Students will be exposed to short stories by contemporary Latin American and Spanish authors as varied as Carlos Fuentes, J.L. Borges, Gabriel García Marquez, among others.

Winter term—In the winter, the focus is on Spanish and Spanish American drama and contemporary Hispanic poetry.

Spring term — Students will read selected literary short novels from the Hispanic world.

SPAN-500/1 Advanced Spanish Language

Three class periods. This course is designed for students of Spanish who have completed their language requirement and desire to take the AP Language Exam in May Students will continue to sharpen their linguistic competencies in speaking, listening, writing, and reading and will explore an assortment of anthentic media in doing so. These sources will reflect the diversity of registers heard throughout the Spanish speaking world and will expose students to a wide range of cultural, social, and historical phenomena. Students will have many opportunities to synthesize and analyze these topics through various communicative modes (interpersonal, interpretive, and presentational) in class discussions and written work, in oral/aural exercises in the HC, and in presentations delivered to their peers. Activities will mimic those found on the AP Spanish Language Exam and will include a mock AP Spanish flanguage exam. fexts will include a monolingual grammar. manual and an AP Spanish Language Exam preparation manual. Students must take this course in order to be considered for SPAN-520 or continue with a 500-level sequence, currently in development.

SPAN-520/5 Modern Hispanic Culture and the Emerging Global Economy (a two-term commitment)

Three class periods. This course seeks to provide knowledge of the Hispanic world by looking at its major transformative historical, cultural, literary, and socio-economic milestones of the last century. In analyzing these major events, students will apply critical thinking and analytical reasoning through the lens of economic models and concepts while perfecting written and oral communication. By employing historical documents, literary texts, and general economic principles, the course aims to foster integrative learning as students develop the ability to use applied knowledge in addressing real-Hispanic-world settings. Students will research major Hispanic companies. how to track them on Hispanic stock exchanges, and how they function in free market and regulated economies of the Spanish-speaking world. The major events to be studied are, the Spanish-American War, the Panama Canal, the Mexican Revolution, Hispanic dictatorship, and the political treaties of NAFTA, MERCOSUR, and CAFTA.

Prerequisite: SPAN-500/1
